

Developing Integrated Care in Southwark

Health and Well Being Board meeting, October 2013

Sarah McClinton and Tamsin Hooton

Content:

Shared objectives

Progress of integration in Southwark

Changes to services for older people

Future priorities and working with SLIC

The role of the Health and Wellbeing Board

Integration Transformation Fund

Shared objectives:

People accessing care at the right time, right place, right for them

Fewer people attending A&E

People living more independent lives

Fewer people in care homes and more living in their own homes

Commissioning for outcomes and attaining a more financially sustainable system

Progress on Integration:

History of integration in Southwark

Recent focus on frail elderly

Intensive redesign process led by SLIC with wide stakeholder engagement

Development of new pathways

Guys and St Thomas' charity funding to pump prime transformation within the SLIC programme

Transfer of funding from acute hospitals to community based care achieved

Long term conditions are the next area of focus

Changes to services

Frail elderly:

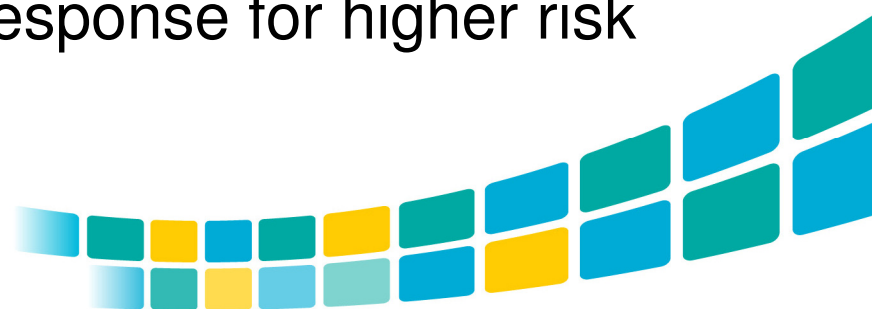

Range of admission avoidance services in the community, including Homeward and Enhanced Rapid response, including re-ablement and social work input

Homeward being extended for winter 13/14 and integrated with other services under @home branding

Primary care incentivised to risk stratification, holistic health assessments and case management of at risk elderly

Geriatrician hotline

Community Multi-disciplinary teams (CMDTS) provide forum for developing integrated response for higher risk elderly

Future priorities

- Ambition to see integration more fully embedded in the borough
- Extension of CMDT approach to younger adults
 - Better care in nursing homes
 - Simplified discharge pathways
 - Workforce transformation, skills in the right place to build confidence in more community based care

Planned workshop on 6th November: Southwark vision of integration

SLIC work in three areas:

- Integrated commissioning framework
- Financial levers including capitated budgets
- Integrated Care organisation

The role of the Health and Wellbeing Board

To understand what is happening in our local health and care system and enable change

To agree a vision for Southwark and the outcomes we want to achieve

To approve the use of the Integration Transformation Fund to drive change

To agree a set of metrics to measure impact and performance

To enable the wider system to support integration

To make connections between integration and delivery of the Health and Wellbeing Strategy

Integration Transformation Fund (ITF): local plan, national conditions

- Engage providers, patients and the public in plan
- Demonstrate how the plan protects social care
- Support 7 day hospital discharges
- Support data sharing across the system
- Provide for joint assessments and an accountable professional

- Sets out total system-wide spend and ITF investments
- 25% paid on improved outcomes

ITF performance measures (tbc)

Delayed transfers of care from hospital

Emergency admissions

Effectiveness of reablement

Admissions to residential and nursing care

Patient and user experience

+ local measures
