

COUNCIL ASSEMBLY
(ORDINARY)
WEDNESDAY 16 JULY 2014
MEMBERS' QUESTIONS

1. QUESTION TO THE LEADER FROM COUNCILLOR MICHAEL MITCHELL

One of the main aims of the cross party Dulwich "Lollipops for Life" campaign is to secure the long term funding of all our crossing patrol personnel. With the beginning of a new council term will the leader take the opportunity of a fresh start and consult with his cabinet colleagues and find the £18,000 necessary to ensure all Dulwich's crossing patrol personnel are funded from within the core mainstream budget and not have to rely on surviving an annual competitive bid from the devolved cleaner, greener, safer revenue budget?

RESPONSE

The council is committed to improving road safety. We believe that the decision to declare Southwark a 20mph borough and our road safety education programme offered to all schools will have a greater impact on reducing collisions and improving road safety across the borough than the single patrols at a handful of locations.

While current Road Safety GB and the Royal Society for the Prevention of Accidents (RoSPA) guidelines for school crossing patrols do not require a patrol at any of these sites, we understand that locally people often want them. That is why it is right for community councils to use money on crossings when there is a local demand. The cleaner, greener, safer fund is to pay for things not covered centrally – including steps like this to make the area safer.

We will continue to keep this under review, but with continued cuts from the coalition government, we simply have less money to do things like this which we would otherwise have wanted to do.

2. QUESTION TO THE LEADER FROM COUNCILLOR LUCAS GREEN

Can the leader tells us what indication the council has been given from government about the likely budget settlement next year and what implications this will have on the delivery of council services?

RESPONSE

The coalition government has already cut Southwark's budget by more than a quarter, now they are planning a further cut of 14.7% – £33.5million next year.

The illustrative 2015/16 settlement funding assessment (SFA) shows a fall from £227.5 million in 2014/15 to £194.0m in 2015/16, which represents a 14.7% cut, totalling £33.5 million.

The Liberal Democrats and Conservatives in government are hitting the poorest the hardest. They continue to slash local government spending and hit councils with higher social need like Southwark hardest. Our cut is again higher than the national average.

The Liberal Democrat/Conservative government has refused to acknowledge the real damage being caused by their cumulative cuts over the last four years. Southwark's Labour council has worked hard to do more with less money, spending wisely to ensure we can continue to deliver services and protect residents from the worst affects of the Liberal Democrat/Conservative cuts. We will continue to spend every penny wisely and ensure all service departments seek to identify further efficiencies, while making every effort to minimise any impact on front line services.

3. QUESTION TO THE LEADER FROM COUNCILLOR ANOOD AL-SAMERAI

Would the leader please provide a list of all the scheduled major works on estates, including the specific improvements that will be included in each project and the date by which each will be completed?

RESPONSE

The full schedule is set out in the tables below.

Major Works

A list of scheduled major works on estates, including the specific improvements that will be included in each project, where they have been agreed.

1 High Investment Needs Estates

Programmed works	Estate	Work / details	Progress	Area	Ward	Status / Comments

5 Sheltered Accommodation

The works programme for the borough's twenty Sheltered Housing Units includes fire safety upgrades (front and communal doors; ceiling renewal; fire stopping and escape routes), installation of sprinkler systems, and communal internal and external decorations, along with remedial work as necessary. Work is also being carried out to renew boilers and pipework. Where these works have been identified as overlapping with the scope of the Warm, Dry and Safe programme, the packages are being coordinated to minimise resident disruption.

4. QUESTION TO THE LEADER FROM COUNCILLOR JANE LYONS

Herne Hill and particularly the shopkeepers were hard hit last August by flooding and we were all grateful for the support shown by the council in their prompt response and for providing a £100,000 fund as well as extracting a similar amount from Thames Water. Is the leader aware that the area is about to be blighted again, this time by Network Rail taking seven weeks to refurbish the bridge, and that Network Rail plan to reduce traffic to a single lane for much of that time? This is expected to lead to traffic chaos across a wide area and once more deter people from shopping and eating in the area. What steps has he and the council taken to engage with Network Rail and persuade them to change their plans to minimise the disruption for the local people in Herne Hill?

RESPONSE

Network Rail approached Lambeth Council about works to the rail bridge in May last year with the aim to carry out work in August to October 2013. Due to other work they were doing in the area which was also going to cause disruption we, in partnership with Lambeth, asked them to replan their works for 2014.

We have said to Network Rail that any work should cause a minimum of disruption – particularly given the difficulty that local businesses have faced following the flood last summer. Network Rail has employed a traffic management company to design a traffic management system to minimise disruption. The new traffic management scheme would use multi-phased traffic signals with pedestrian facilities. There will be no need for any road closures.

I have asked officers to continue to monitor traffic flows during the works and that any changes that are identified which would improve traffic flows be implemented at the earliest opportunity. The works are proposed to start on 28 July 2014. Following our work with Network Rail, they have now reduced the duration 7 weeks.

5. QUESTION TO THE LEADER FROM COUNCILLOR BILL WILLIAMS

Can the leader give an update on the progress of the council's plan to bring superfast broadband to Rotherhithe?

RESPONSE

The provision of broadband is a technical matter in a regulated market. The council has therefore decided to appoint technical specialists to help in understanding the deficiencies of the broadband service in Rotherhithe and the options for creating a fit for purpose service.

A tendering exercise is underway and an appointment should be made by the end of July. The appointed specialists will be expected to meet with the Rotherhithe Broadband Group and, as appropriate, with commercial broadband providers. We are also exploring with other neighbouring authorities whether there are other commercial solutions available.

The strategic director of finance and corporate services and I have met with representatives from BT and discussed their plans for introducing fast broadband to the Rotherhithe area.

BT have explained the difficulties that they face extending fast broadband but have also confirmed that they are currently working up a detailed business case for rolling out the newest fast broadband technology to the area and that they are keen to work with local landlords to help reduce their set up costs.

The council eagerly await the outcome of this business case that should be finalised later this year. In the meantime, local residents are encouraged to continue to make sure that BT are aware of their individual needs and to register these directly with BT so that they are fully aware of the significant demand that already exists. The council will continue to work, together with the Greater London Authority (GLA), to support BT's programme for the earliest possible roll out.

6. QUESTION TO THE LEADER FROM COUNCILLOR LISA RAJAN

When will residents be able to access the free swimming and gym admission he and his cabinet have promised them? How much will this policy cost to implement? What expansion plans are being proposed to cope with a potentially huge increase in demand at peak times?

RESPONSE

This administration is proud of our commitment to introduce free swimming and gyms. We hope that the Liberal Democrats do not repeat their mistake over free school meals where they opposed and opposed and then had to perform an embarrassing u-turn. We hope that they get behind us from the beginning to help make this a success for all our residents.

The draft Council Plan which comes before cabinet this month includes a target date of 2016/17 for delivery of this commitment. Ahead of this, officers are doing the work necessary to meet this date.

Officers are already in negotiations with our leisure provider on delivery of this promise, and the leisure team and public health team are working up options for delivery to support healthier lifestyles. The cost of the scheme is dependent on the success of the negotiations and can vary significantly depending on how we implement it, so I have asked officers to present us with a full set of options by September.

As a first step, we will test out the free gym and swim offer with 100 patients identified as 'inactive' between now and end of September. Free gym and swim will form part of a health improvement package offered through the NHS Health check lifestyle hub and through GP referrals to a new strand of the exercise referral programme to be called 'kickstart'.

Our leisure centres are currently operating under capacity in some areas and at some times, and detailed modelling of this is going on as part of the work on options. We are continuing to invest in our leisure provision which will expand that capacity, with the Castle leisure centre due to open in Spring 2015, refurbishment of Peckham Pulse and Seven Islands, bringing back the Southwark Athletics Centre into full use as well as a second phase of Olympic Legacy Funding.

7. QUESTION TO THE LEADER FROM COUNCILLOR MAISIE ANDERSON

Can the leader give an update on the progress of the delivery of 11,000 new council homes?

RESPONSE

The council is already meeting its commitment to build 11,000 new homes by 2043, the first 1,500 of which will be built by 2018. Alongside this, the council continues to invest in its existing housing stock. £180 million has already been invested, up to April 2014.

An independent report which included a new homes investment plan, was presented to cabinet in January 2014. This confirmed it was reasonable to conclude that the council's ambition to build 11,000 new council homes was both realistic and deliverable. Residents' representatives, via the Future Steering Board (FSB), were "delighted" to see the council's clear and strong commitment to building 11,000 new homes. The FSB continue to provide an important tenant and homeowner perspective on the delivery of 11,000 new homes

The strategic director of housing and community services, working with colleagues from across the council, is putting in place the necessary capacity to oversee further programme delivery and a further report will be presented to cabinet on 22 July 2014.

That report will put in place the specific actions required to deliver a programme of borough-wide and estate by estate housing investment and renewal, including the building of 11,000 new council homes by 2043.

Most importantly, residents will be at the front and centre of our plans. A charter of principles to govern our approach to engagement on housing investment and renewal has been drafted for consultation with all local residents. We will consult through the summer and a report on feedback will be brought back to cabinet in October.

8. QUESTION TO THE LEADER FROM COUNCILLOR ELIZA MANN

Is the leader aware of concerns about potential asbestos exposure from the Thames Tunnel site at Chamber's Wharf, which is due to rubble from a demolished cold storage building remaining on-site for more than a year? Will he order Thames Water to clean up the site immediately?

RESPONSE

We are aware of this situation and have been in discussion with Thames Water, to mitigate any risks in relation to this issue. As a result, Thames Water has reduced the risk to health through the clearing of the loose asbestos debris on the site and by the covering of the stockpile on site to prevent 'wind whip' of any dust and fibres from it and the site is not causing any statutory nuisance.

Control of asbestos on construction sites is enforced by the Health & Safety Executive, not the council. We are in dialogue with the Health and Safety Executive in terms of any enforcement action that they are undertaking, in relation to Chambers Wharf.

It is disappointing that Riverside Ward councillors have not raised this with officers given their concerns about the situation.

9. QUESTION TO THE LEADER FROM COUNCILLOR JASMINE ALI

Can the leader tell me what the council will do to meet demand for primary and secondary school places in the borough?

RESPONSE

Last autumn, we agreed a school expansion programme which is now underway. We are confident that this programme will ensure that we meet the demand for places in September.

Some temporary classes are being added in the coming year in schools where there will be permanent expansions in the future. In addition we will have new schools in the borough. Bellenden, Cherry Garden Special School and Belham Free School are currently working with architects on their new school designs.

Longer term we are committed to expanding secondary provision to meet future demand. The council wants a secondary school on the Dulwich Hospital Site and welcomes the two parent led campaigns who are backing two excellent school providers on the site. I am very disappointed that despite this, the Liberal Democrat/Conservative government is currently considering this site for Harris Nunhead Primary School and is arguing that they should prioritise this as plans for a secondary school are under development

10. QUESTION TO THE LEADER FROM COUNCILLOR DAMIAN O'BRIEN

In March 2013, the leader announced that his trip to the MIPIM conference in Cannes had been a success because he was able to secure a personal commitment from Boris Johnson for a Bakerloo Line extension to Camberwell and Peckham. At the time, the leader told local media that Boris said "It's a deal", adding that this "wasn't a flippant comment, but a serious end to a conversation". Is the leader now disappointed that the Mayor has reneged on the personal promise he made to him in Cannes?

RESPONSE

Our priority is and has always been for the Bakerloo Line to be extended to Camberwell, a proposal that dates back to the 1930s. However, the Old Kent Road is also desperately in need of better transport, particularly given its new designation as an opportunity area. We think that the case is strong for both routes. Many tube lines have several spurs and we would like to see the Bakerloo Line serve both Camberwell and the Old Kent Road.

The fact that we are having the debate about where a preferred route for the Bakerloo Line would go shows the progress this administration has made in making the case to the Mayor of London for the extension – something the previous Liberal Democrat/Conservative coalition failed to do.

The Mayor has recently endorsed further development work on extending the Bakerloo Line. Although not currently in Transport for London's (TfL) business plan there is growing momentum behind this proposal which shows a strong business

case in terms of return on investment. Officers are working to support TfL in developing this business case further.

No decision has been made on preferred route alignment within Southwark, or on the extent of the route to the south. TfL's current forecasts suggest that an alignment via Old Kent Road would have the strongest business case, but an alignment via Camberwell also shows a very strong case well in excess of TfL's required threshold for investment. Under the current development timetable the detailed route would not be confirmed until 2017/18.

As part of a wider review of rail services in south London, TfL are also now reviewing the potential to reopen the national rail station at Camberwell in order to bring better connectivity to the area.

We were proud to make this our manifesto commitment and to secure the Mayor's backing. It is disappointing that the Liberal Democrats chose to ignore this and as with so many issues are now playing catch up. However, I do welcome their late support for this issue and hope they will now join us in campaigning to bring the tube south.

11. QUESTION TO THE LEADER FROM COUNCILLOR KARL EASTHAM

How will the leader ensure that the council continues to operate in an open and transparent way following the significant reduction in the number of opposition councillors?

RESPONSE

This administration will be open, honest and accountable. We welcome effective scrutiny from the public, media and councillors which will help improve policy and the effectiveness of our delivery.

It was the voters, not this administration, who decided that the Liberal Democrats would not have enough seats to retain call-in powers, to not hold a majority on a single community council or to have no more than one or two members on any committee.

Members of all parties have a duty to hold the cabinet to account. They have a responsibility to represent the interests of residents and to challenge the cabinet if we get things wrong. They can help improve the work that the council does by engaging in these processes.

The Liberal Democrats were not an effective opposition for the last four years. They were more interested in getting a quick press release than really engaging in the work of the council. This let down people in the borough who responded by not voting for them in May.

I am confident that council assembly made a good decision in electing Councillor Edwards as chair of overview and scrutiny committee (OSC). He has shown that he is not afraid to challenge the council in his role as chair of the housing scrutiny sub-committee. He has also challenged the cabinet on issues where he thinks we are wrong. His appointment will be good for scrutiny and in holding the cabinet to account. It is worth noting that in the previous four years of an opposition-chaired OSC, the committee did not submit one single detailed written report to the cabinet, but instead left all of this work to sub-committees. I understand that this is

one of the first things which Councillor Edwards will address and will mean OSC digs into the detail of how we deliver services far more effectively.

I am also aware that the chair of OSC has asked officers to implement live streaming of OSC meetings and posting video of these meetings online and officers are currently considering options to take this forward; another sign that this council is committed to more openness and transparency.

Despite their disastrous election results, we have changed the constitution to enable three members to call in a decision, which means that the Liberal Democrats can call decisions in without the need of a Labour member. It is important that opposition councillors do still have this power. However, for a party with its worst election result since 1982, who could not secure even a quarter of the seats, the relevance and influence of the Liberal Democrats in Southwark is greatly diminished.

12. QUESTION TO THE LEADER FROM COUNCILLOR DAVID NOAKES

What measure has been made of the productivity lost amongst council workers due to IT problems in the last year? What financial penalties have been imposed on Capita as a result of these problems? What is the council's final deadline for updating its computer network to modern software?

RESPONSE

The council needs good quality IT so we can continue delivering high quality, value for money services to local people in these tough financial times.

I have given responsibility for IT to the cabinet member for finance, strategy and performance. Councillor Colley has met with senior representatives of our main IT contractor, Capita, to discuss this with them and to seek reassurance that the chief executive and senior management are doing all the council can, in partnership with Capita, to improve the situation in the short term whilst also working towards implementing a new system later this year.

The council is working to develop a shared service with the Corporation of London, which will provide increased stability and expertise into the long term.

Under the contract with Capita for IT managed services, performance levels are specified very clearly. Any failure to achieve these targets are fed into a contractual model (which is subject to commercial confidentiality) that generates sums payable by way of penalty to council. The overview and scrutiny committee have reviewed performance issues on at least two occasions and directly interviewed senior Capita managers. A major system change was made over a month ago, in mid-June, and it is encouraging to see that the serious issue of log in times has been resolved.

The council together with Capita continues to target the implementation of a new infrastructure for IT by the end of this year. This will provide a platform for further technology enhancements moving forward.

13. QUESTION TO THE LEADER FROM COUNCILLOR DAN GARFIELD

Following the recent accusations from the opposition that the council "wasted money" by separating the Mayor Making ceremony and the annual constitutional

meeting, can the leader confirm the cost to the council of combining the Mayor Making ceremony with the Annual Civic Awards compared with previous years?

RESPONSE

There is no like for like comparison as this was the first time that the civic awards and mayor making were combined to achieve efficiencies.

However, if a comparison is made between the cost of the combined civic awards and mayor making this year and the total costs of the separate civic awards and mayor making events under the previous administration this is as follows:

Year	Total costs
2014/15 combined civic awards and Mayor making	£9,428
2006/2007 separate ceremonies	£18,420.63
2007/2008 separate ceremonies	No awards ceremony took place
2008/2009 separate ceremonies	£12,510.28
2009/2010 separate ceremonies	£11,904

The saving achieved in these comparisons varies between £8,992 and £2,460.

14. QUESTION TO THE LEADER FROM COUNCILLOR JAMES OKOSUN

Can the leader provide an update on negotiations with BT and other relevant parties in regards to bringing high speed broadband to Rotherhithe?

RESPONSE

See answer to question 5.

15. QUESTION TO THE LEADER FROM COUNCILLOR CLAIRE MAUGHAM

Can the leader explain how the council is performing on school places planning?

RESPONSE

In April the government published a scorecard based on their analysis of all authorities' school capacity submissions. I am pleased to report that Southwark was given the highest green rating.

The raising was based on three criteria:

- Quantity of new places – Southwark has provided 2,130 new places between 2009/10 to 2012/13 and plans to deliver 2,310 new places between 2013/14 to 2015/16. As a result the authority is rated green for performance, because no additional places are needed to meet demand across the local authority in 2015 as estimated in the summer of 2013.
- Quality of places – Southwark is again rated green because we have a higher percentage of new places in good and outstanding schools - 95% against the England average of 79%. In addition Southwark has created 49% of new places in above average schools, compared to the England average of 28%.

- Cost – Southwark's cost of expansions in permanent buildings is 34% less than the England average, which is therefore also a good score.

In addition to the government's positive review, we have also had an independent assessment conducted by Mouchel in August 2013 to consider the methodology we use to plan school places. They concluded that Southwark was within the range of best practice against national guidance.

16. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR KIERON WILLIAMS

What plans does the council have to improve public transport provision in the borough?

RESPONSE

This administration has long been committed to an extension of the Bakerloo Line to Camberwell and Peckham. I am pleased that the Mayor of London has acknowledged that the south of the borough is desperately in need of better transport connections, has designated Old Kent Road as an opportunity area and given his support of an extension of the Bakerloo Line.

The case is still strong for an extension of the Bakerloo Line for both the Old Kent Road, and Camberwell and Peckham routes. We will continue to lobby Transport for London (TfL) to realise these much needed transport improvements for local people.

We will continue to press for service improvements to improve rail access to and from Peckham Rye and Denmark Hill following the withdrawal of South London Line services. We will also seek to promote better services for those using Thameslink services from Herne Hill and Elephant and Castle stations.

We continue to work with network providers to improve access to our stations in the borough. At the start of July a new platform lift was opened at Queens Road Peckham – the first time the station has been fully accessible since it opened 150 years ago. Lifts are to follow at Peckham Rye and we will continue to press for access improvements at all our stations.

With a lack of other options in parts of the borough, bus services are particularly important to us in Southwark. We recently achieved the extension of the 136 bus route to help fill a gap in bus route coverage and will continue to press TfL to improve route coverage and service quality across the borough.

We are also working with TfL to extend Cycle Hire further into Southwark, including Bermondsey, Rotherhithe, Walworth, Camberwell and Peckham.

17. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR TOM FLYNN

How will the council drive up levels of cycling in the borough and improve cycling safety standards?

RESPONSE

I welcomed cycling safety and infrastructure experts from Denmark and Holland last month and participated in a three day planning session to help develop our long term vision for sustainable and safer cycling in Southwark. The sessions brought together key officers from amongst others, our highways, engineering, transport planning, public health, regeneration, and parks teams as we intend to embed our vision throughout the council.

The aim of this work is to create a cycling strategy that will bring together the variety of local initiatives aimed at making cycling more safer and accessible for everyone; increasing permeability, reducing road conflicts, and where possible increasing segregated cycling opportunities. We will then develop a network map that will promote this. I am committed to there being a reduction in cycling related casualties as cycling increases. We will also ensure greater realisation of the social, health and economic benefits of cycling and an increase in the overall cycling opportunities in the borough.

18. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR STEPHANIE CRYAN

What steps will the council take to improve Canada Water for local residents?

RESPONSE

The regeneration of Canada Water has reached an exciting stage and over the next few months local people will have the opportunity to help shape plans for a comprehensive remodelling of the town centre.

We have already announced our support to create a major new campus for Kings College University as part of the redevelopment of the former printworks at Harmsworth Quays, most of which the council owns. Since that announcement in November 2013, officers have been in discussion with Kings and British Land, our tenants of the site, about the form of development. That work included public consultation, during which it became clear local people wanted to see Harmsworth Quays redeveloped as part of an integrated treatment of the whole town centre.

British Land has responded to the comments of local people by recently announcing their intention for the comprehensive redevelopment of the Surrey Quays Shopping Centre, which will be done within the framework of a masterplan that will include Harmsworth Quays.

Officers are currently working through the practical implications of British Land's announcement but it is anticipated the redevelopment will include: the long-term replacement for the Seven Island Leisure Centre; a significant expansion of the retail offer; a major new campus for Kings College and new housing, including a significant number of affordable homes. The regeneration has the potential to create many new jobs, business start ups and training opportunities.

As part of this process officers will review the demand for additional school places and later this year will be consulting local people on proposals for the Lower Road gyratory system.

To support this development we have identified changes to the road network in the Surrey Quays area that will improve access to the Rotherhithe peninsula and create a better environment for local people. I expect proposals to be brought to public consultation later this year.

19. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR JOHNSON SITU

How will the council work with local residents to improve Peckham town centre?

RESPONSE

I am pleased that my colleague, Councillor Fiona Colley, officers in regeneration and Network Rail acted in response to local concerns about the pace of the Gateway to Peckham project and has successfully agreed with the Greater London Authority (GLA) an extension to the GLA's funding agreement timescales.

We are now working with the GLA, residents, businesses and Network Rail to ensure that residents and businesses have the opportunity to help shape the project so that we get the best outcome for Peckham; a financially viable scheme that provides a thriving town centre and a new public square that incorporates retail, creative arts, and opportunities for local people.

We have also been working on an innovative scheme to revitalise neglected and forgotten spaces in the town centre. A number of trials in these spaces this summer have proven very popular and we are now looking to make these permanent.

We are also planning to improve walking and cycling routes to and from the town centre with improvements planned for both the Bellenden and Brayard's Road areas.

20. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR ELEANOR KERSLAKE

How will the council use regeneration schemes to provide local jobs?

RESPONSE

We have a commitment to support 5,000 local people into jobs and create 2,000 apprentices, many of which will be provided as a result of the regeneration projects in the borough.

To date, regeneration schemes at Bermondsey Spa, Elephant & Castle, Aylesbury and Canada Water have created 350 jobs for local residents and 35 apprenticeship or National Vocational Qualifications training opportunities.

Regeneration Scheme	Jobs Created	Sustained Jobs	Apprentices	Status
Bermondsey Spa	28	19	4	Complete
Aylesbury	84	47	1	Ongoing
Canada Water	160	101	25	Complete
Elephant & Castle	78	13	5	Ongoing
Totals	350	180	35	

The Canada Water and Bermondsey Spa sites are now complete. Work on the Elephant & Castle and Aylesbury sites are on going and are anticipated to create over 1,200 sustainable jobs for local residents and in excess of 350 apprenticeships over the course of the developments.

In addition to jobs secured through development and regeneration in the borough Southwark Council also assists residents into work by commissioning employment support services such as Southwark Works and the Youth Fund. Last year, across all our programmes, 884 residents were supported into work and 545 residents were helped to sustain jobs for a period of 26 weeks or more.

21. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR ADELE MORRIS

What is the actual cost to the council to date on legal fees and other costs in relation to its appeal against the order to disclose the viability report for the Heygate Estate redevelopment? How much more does the council anticipate it will spend on this case?

RESPONSE

The barristers fees are £59,736.20 and are wholly recoverable from Lendlease, so will not cost the council anything. Other costs to the council have been in officer time.

Any estimate of future costs would be speculative.

22. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR JAMES BARBER

Transport for London has decided to stop installing Puffin crossings. The UK is the only western country to have such a signaled crossing design where pedestrians have no signal or display facing them while crossing the road. Research has shown that Puffin crossings are also unpopular with the public. Considering this, will the cabinet member agree to convert and upgrade existing Puffin crossings in Southwark to Pelican crossings with pedestrian countdown displays to enhance and improve the walk-ability of the borough?

RESPONSE

Transport for London's (TfL) draft Pedestrian Safety Action Plan outlines a number of key actions which they believe will directly target the key factors in collisions and help further reduce pedestrian casualties across London. The actions include:

- By 2016, TfL will double the number of pedestrian crossings operating pedestrian countdown from around 200 to more than 400, roughly 10 per cent of all pedestrian crossings in London. TfL will also be strongly encouraging boroughs to adopt pedestrian countdown as standard to reduce pedestrian uncertainty at crossings.
- Building on its innovative crossing technology trials, a new 'gold standard' for all new and upgraded pedestrian crossings will be developed. This would look to include far-sided pedestrian indicators on all crossings, with pedestrian countdown timers to give pedestrians a clear indication of how

much time they have to safely cross the road, as well as ensuring that all pedestrian crossing times take account of national safety standards and the level of pedestrian demand.

I am broadly in support of this approach, although officers have recently requested Department for Transport (DfT) undertake some further research on the benefits of different types of pedestrian crossing as there is a need for up to date research since the DfT's position is that puffin crossings have safety benefits over pelican crossings.

Notwithstanding our broad support for TfL's position, this would only apply to new crossings. I have asked officers to review the Borough Road safety data to see if any of the locations of puffin crossing have been implicated in any accident. If this is the case we will review the provision of puffins at those locations

23. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR BEN JOHNSON

Bermondsey Street is an important route for cyclists in both directions, and although the contraflow cycle lane was welcome when it was introduced in 2010, in practice the lane is often blocked by parked vehicles and offers no protection from oncoming traffic on a narrow road. Will the cabinet member commit to improving this cycling route?

RESPONSE

I am committed to improving cycling routes across the borough. I have asked officers to prepare a cycling action plan/strategy for cabinet to consider later this financial year. I will ensure Bermondsey Street is considered as part of this process and is made as safe as possible for all road users, including cyclists.

24. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR DAVID HUBBER

In view of the fact that a reversion to two-way working in Lower Road, Rotherhithe, appears still to be a long way off, will the cabinet member consider removing the restriction on vehicles emerging from Plough Way and crossing Lower Road to enter the gyratory system?

RESPONSE

Feasibility work for the reintroduction of two-way working in the Surrey Quays area is well advanced and I expect proposals to be brought to public consultation later this year. Traffic analysis shows that removing much of the one-way system is possible and this will open up more direct routes to the peninsula as well as creating opportunities to improve the local environment. Removing the current restrictions on traffic exiting Plough Way will be part of these proposals. Analysis shows, however, that this can only work when introduced in conjunction with the wider traffic scheme.

25. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR HAMISH McCALLUM

What discussions have been had between Southwark council and Transport for London relating to congestion issues on Jamaica Road and, in particular, relating to the provision of a 'box junction' at the junction with Bevington Street?

RESPONSE

We have been working closely with Transport for London (TfL) in order to identify and promote improvements to Jamaica Road. Cycle Superhighway Route 4 (CS4) will run along this route and presents an opportunity to address a number of concerns as well as to provide a safer environment for cyclists. CS4 will result in a complete redesign of the Bevington Street junction. Changes at the Rotherhithe roundabout are also covered by CS4 and this is key to reducing congestion on Jamaica Road and adjacent local streets. We are disappointed that TfL have recently deferred delivery of CS4 until 2016 and will continue to press for these improvements to be brought forwards as soon as possible.

26. QUESTION TO THE CABINET MEMBER FOR REGENERATION, PLANNING AND TRANSPORT FROM COUNCILLOR MARIA LINFORTH-HALL

How many complaints have there been about the conduct of vehicles operated by the council and its contractors since 1 January 2011? Please list details of each complaint, including the date and the action taken by the council.

RESPONSE

Further to the response given by Councillor Barrie Hargrove in March when this question was last asked, there have been a further four Drivecare complaints in cleansing services, three in building services and one in parks.

Otherwise for the time period between 1 January 2011 and March 2014 the response given in March still stands, as there were no new incidents for this period. For ease of reference, the answer from Councillor Hargrove can be found here:

<http://moderngov.southwark.gov.uk/documents/s45593/Members%20Question%20Time%20Report.pdf>

27. QUESTION TO THE DEPUTY LEADER AND CABINET MEMBER FOR COMMUNITIES, EMPLOYMENT AND BUSINESS FROM COUNCILLOR SUNNY LAMBE

Can the cabinet member tell me what investment is being made in the adult learning service?

RESPONSE

This administration understands that educational attainment is a continual path to be supported, not only for young residents but for adults too. This is demonstrated by our £670,000 investment from the capital programme into the Thomas Calton Centre.

£520,000 is for building works to address issues with the fabric of the building and £150,000 is to modernise ICT. This will benefit service users through improving the learning environment and by significantly improving access to learning through the use of new technology. It is the second phase of a programme a £1 million

investment programme completed in 2011 to improve both the interior and the physical access to the building.

The service is entirely funded through an annual settlement from the Skills Funding Agency (SFA) with no direct call on council revenue. Funding is paid in return for delivering agreed numbers of learners to set quality standards. Failure to deliver can result in funding being clawed back by the SFA.

In recent years, the service has successfully met these targets, therefore securing its full funding allocation. In addition to delivering courses from the Thomas Calton Centre a range of community and voluntary sector organisations are contracted to deliver learning in locations across the borough, ensuring wide geographical access to courses and making good use of local expertise.

To demonstrate how well we are meeting targets the most recent Ofsted report (2012) noted that the service provides good value for money and recent audits have noted the effective management of resources.

28. QUESTION TO THE DEPUTY LEADER AND CABINET MEMBER FOR COMMUNITIES, EMPLOYMENT AND BUSINESS FROM COUNCILLOR EVELYN AKOTO

Can the cabinet member provide an update on the High Street Challenge?

RESPONSE

The High Street Challenge (HSC) is an integral part of the council's priority to create thriving town centres and high streets. Our main aim is to assist local businesses to rejuvenate and support the local community.

Following the launch in February 2014 eleven businesses and groups were awarded over £160,000 to aid their projects. An additional five projects are now being recommended for a further £60,000.

Projects we have funded across the borough include street markets, creative events and festivals, improvement to public and commercial spaces and support for local business groups to stimulate improvements to their town centres and high streets.

The fulcrum of the HSC is to attract more people to Southwark's high streets and town centres, and to increase the amount that those shoppers spend. Local shops, business groups and community groups can apply for funding via one of four themes: promotion, transformation, diversification or participation. The next call for proposals is scheduled for September.

The projects planned, as well as those ongoing demonstrate the real passion of local businesses to revitalise our town centres and so help support a strong local economy and ensure a fairer future for all.

29. QUESTION TO THE DEPUTY LEADER AND CABINET MEMBER FOR COMMUNITIES, EMPLOYMENT AND BUSINESS FROM COUNCILLOR ANNE KIRBY

How is the council continuing to support businesses in Herne Hill following the floods last year?

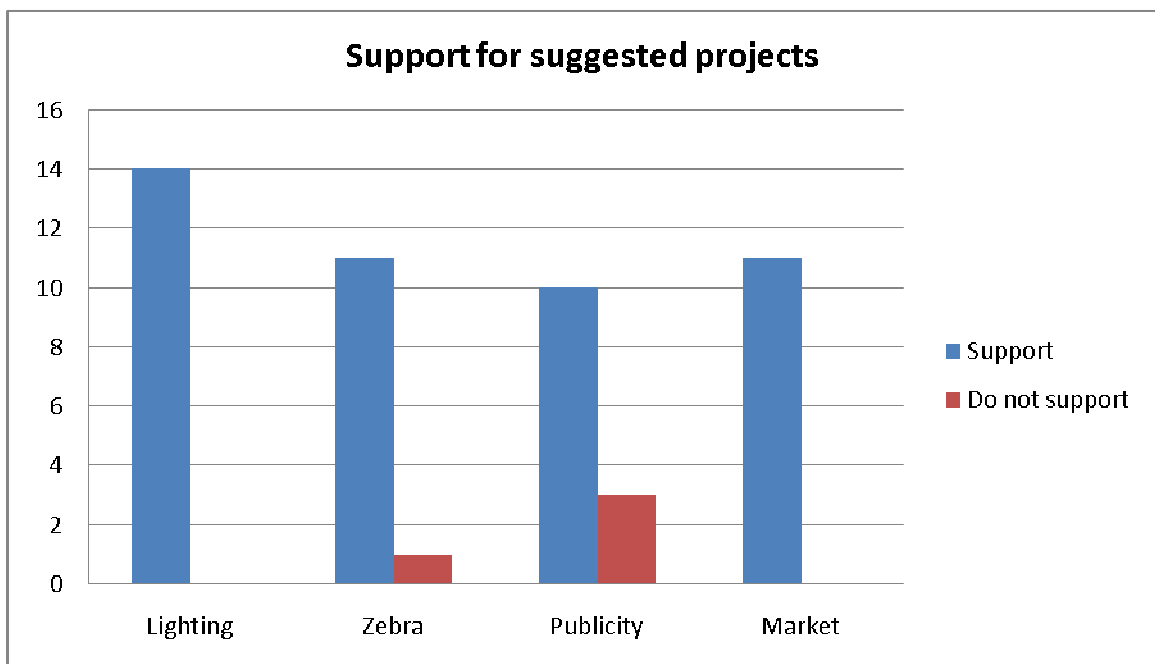

RESPONSE

In the uncertain days immediately after the flood, the council committed £100,000 to an emergency support fund. A total of £88,000 has been awarded to 18 businesses to help them make emergency repairs and payments in order to reopen as soon as possible and keep trading.

The remainder of the emergency fund was used by the council's events team to commission the Herne Hill Christmas Fayre in December.

Thames Water matched the council's contribution after lobbying from the council. Following receipt of the Thames Water's £100 000, consultation with traders on its use has been undertaken on the basis that local business priorities should determine how the money is spent. Living Streets have undertaken extensive consultation with the local traders (at no cost under their service level agreement with the council's public realm team).

Having written to all traders in the flood area and met with business representatives from Half Moon Lane and Herne Hill Forum, Living Streets identified four main areas for support. A survey on these areas yielded 14 returned questionnaires with the results below.

- Lighting – installation of lights on the tree outside number 22 and smaller trees on the northern side of Half Moon Lane.
- Zebra crossing – installing a zebra crossing just beyond Stradella Road.
- Publicity and marketing campaign to promote the area and attract footfall through a programme of events.
- Extension of the Sunday Market from Railton Road to Half Moon Lane- additional stalls (up to 20) on the southern footway on Half Moon Lane.

Development work on the four identified projects is now being taken forward in collaboration with the planning projects and public realm teams. This includes

feasibility on the zebra crossing and lighting and further consultation on the market extension.

30. QUESTION TO THE DEPUTY LEADER AND CABINET MEMBER FOR COMMUNITIES, EMPLOYMENT AND BUSINESS FROM COUNCILLOR VIJAY LUTHRA

Can the cabinet member inform council assembly about his plans for the Voluntary Sector Commission?

RESPONSE

The voluntary and community sector (VCS) in Southwark is an asset to the borough with thousands of groups of various sizes, working alongside us to support the most vulnerable in our communities, making a major contribution to the economy locally and bringing in investment to supplement what the council invests in the voluntary sector.

The VCS is also a key partner in finding innovative ways of delivering on our vision of a fairer future for all and creating a borough where everyone realises their potential. This is why we have committed to supporting an independent voluntary sector commission that finds new ways of delivering and transforming services in the face of the deep cuts that central government has made to our budgets.

On 24 July 2014 the health and wellbeing board will be asked to agree the terms of reference for the VCS Commission. The work on establishing the commission is being led by Community Action Southwark working in partnership with the council and other public agencies like the Health Service and all of us have had an input into the terms of reference.

Like the Housing Commission, the VCS Commission will be independently chaired and made up of independent experts with the addition of a small number of experts from the council and our partners on the health and wellbeing board. It will listen to evidence from a range of sources and carry out research and analysis to inform its independent findings reporting back to the health and wellbeing board in March 2015.

The commission will develop a set of practical recommendations that look at how the council and its partners can support early action or prevention activities that support people living healthy and independent lives and deal with the causes rather than the symptoms of issues that individuals in our communities face. It will look at how all partners can build better relationships with the voluntary sector, how our commissioning processes can better address current need as well as reduce need, and how we get better integration of services for the benefit of residents.

This is a unique opportunity for the voluntary and public sectors to consider how working together with the VCS we can address rising demand for public services at a time of significantly reduced resources.

31. QUESTION TO THE CABINET MEMBER FOR CHILDREN AND SCHOOLS FROM COUNCILLOR ROSIE SHIMELL

Further to the council assembly question on 22 January 2014 by former Councillor Blango about children missing from care, can the cabinet member give an update about how many children in care went missing for more than 24 hours in 2013/14?

How many children are currently missing from care, and for how long have they been missing in each case?

RESPONSE

In 2013-14 there were 119 missing incidents recorded for 38 young people. At present we do not have any children reported missing from care.

I am pleased that there has been a reduction in the number of incidents from the previous year, although any child going missing from care continues to cause us concern because of the possibility that they could be at risk of harm or danger.

32. QUESTION TO THE CABINET MEMBER FOR HOUSING FROM COUNCILLOR SANDRA RHULE

Can the cabinet member tell me what steps are being taken to address a number of issues on estates in Nunhead, including overheating and pest control issues on the Cossall Estate, and reducing anti-social behaviour in communal areas of blocks of flats on the Pomeroy Estate?

RESPONSE

In terms of pest control issues, the estate is experiencing an infestation of oriental cockroaches and is currently receiving a comprehensive service by our pest control team as part of our wider block treatment programme.

This involves fortnightly visits, initially to all properties to locate the pest problems and then, as each property is cleared of the problem, the team focuses on those that are still found to have pests present. All residents are however asked to contact us again if they experience a recurrence of the problem.

As cockroaches are extremely hardy and difficult to eradicate, regular access to every home is essential. Whilst the vast majority of residents are keen to work with the team, a few consistently refuse to allow access. We are therefore preparing warrant applications to be served at the end of July to seek court permission to undertake forced entries to those properties that have not allowed access for an inspection.

Whilst this may seem a drastic measure, it must be carried out as some of the properties we have not been able to inspect and treat will be harbouring the pests and will cause other properties to become re-infested if allowed to go untreated.

An estate-wide blitz has already been undertaken on the 7 July 2014 and included treating all the common parts of the estate including bin rooms, landings and riser cupboards. This has proved very effective in the past and will be repeated if required. The current results show a decrease in the number of pest cases being found in the properties on the estate and the team will continue to work until the problem has been eradicated.

In terms of reducing anti social behaviour (ASB) there has been a multi agency response. Housing operations, Southwark anti-social behaviour unit and the local policing team have undertaken a number of estate visits. The purpose of these estate visits were to gather intelligence, encourage reporting and put in place solutions for any ASB identified. Officers are also working with the local tenants and residents association to identify projects to provide positive activities for young

people. Both the police and council wardens have been asked to patrol in the area to address concerns raised about anti social behaviour in the blocks. Community safety figures show low levels of reported crime and the estate does not come up as a repeat crime location.

A two year door entry programme for 2013-15 was approved by cabinet in May 2013, after consultation with resident groups, along with an annual budget of £726,000. Since the initial programme was agreed, the council has received further requests for the installation of door entry systems to over 400 blocks, including for the Pomeroy Estate. The council is currently developing a programme to commence from 2015/16 onwards. Given the large number of requests and the limitations of the budget, the council will need to prioritise each request based on need. Each block will be evaluated on a number of criteria including levels of anti-social behaviour, police support, reported crime and support from tenants and leaseholders. The council cannot determine at this stage where Pomeroy Estate will sit amongst the list of priorities, but expect to have a draft programme for consultation in the autumn.

In terms of heating issues, officers are aware of the issue of overheating on the Cossall Estate. Options to alleviate the problems in the short-term have been explored, such as fitting individual heating controls, but these would be expensive and provide only marginal benefits by reducing temperatures by a degree or so. The fundamental issue of overheating is a result of the design of the system, which has pipe work embedded in concrete. The problem has been compounded by recent Warm, Dry and Safe works which has improved the thermal efficiency of the properties on the estate, with for instance, the installation of new double glazed windows. Officers are in the process of exploring options to resolve this design problem, including re-routing the pipe work but there is no easy or immediate solution. There are other estates with similar issues and officers will report the options and costs for resolution to the cabinet member for housing and ensure that local ward members are kept advised.
