

Timed Collection Scheme

Michael McNicholas

Borough, Bankside and Walworth
Community Council
Saturday 21st November 2015

What are the problems with waste in Walworth Road?

- Businesses and residents leaving waste in sacks on the pavement at all times of day.
- Collection of waste in sacks by different service providers at different times.
- Waste bins stored permanently on the pavement.

Outcomes

- Constant presence of waste in sacks and bins on the pavement in Walworth Road
- **Unightly, offensive, obstructive**
- Negative impact on Walworth Road as a place to live, trade, visit and spend time

Why a Timed Collection Scheme?

- Manage the times of day when waste in sacks can be left on the pavement for collection
- Manage the times of day when waste is collected
- Prohibit the permanent storage of waste bins on pavements
- Inclusion of parts of roads nearby

Outcome:

- Pavement free of waste for 20 hours every day
- No waste bins on the pavement at all
- More pleasant environment, a better place to live, trade and visit

How do timed collections work for businesses and residents?

- Two one-hour long slots every day for residents and businesses to leave sack waste out for collection – the 'Put-waste-out slot'
- Both followed immediately by one hour long slots when the waste must be collected – the 'Timed collection slot'
- Leaflets and signs to communicate these times
- Waste from residents in flats above shops will be collected by the council during the 'Timed collection slot'
- Businesses must arrange with their sack waste collection service provider for collections during the 'Timed collection slot'
- Enforcement action may be taken for waste out at the wrong times

Next steps

- Consultation process to find out the most convenient times
- Communication of go-live date for the scheme using leaflets, signs and web-site – most likely during January 2016
- Removal of bins on pavement
- Monitoring and enforcement of scheme after go-live
- Review the outcomes of the pilot – July 2016
