**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

| Calton Avenue |  |  |
|---------------|--|--|
| Proposal      | Concern/Objection  | Response   |
| Overall       | Traffic volumes on Calton Avenue have not been addressed, especially during peak times. The study regarding coaches and HGVs using Calton Avenue should have been part of this scheme and not an independent exercise. Weight/width restrictions on Calton Avenue are a priority issue regarding school children and cyclist safety. | <p>Traffic reassignment modelling carried out revealed point closures or measures to reduce traffic volumes had a significantly disproportionate impact on other sections of the Quietway and surrounding road network. See more details in the <i>Dulwich Village Initial Traffic Reassignment Modelling Technical Note</i>, in the appendices .</p> <p>Larger area-wide network study is outside of the scope of Quietway project.</p> <p>The Foundation Schools Coach service plays an important role in home to school transport provision in Dulwich Village. Any changes to this service to deal with concerns raised by local residents are outside the scope of the Quietways project. However, Southwark Council and the Dulwich Foundation schools have agreed to work together to investigate ways to manage the impact of the coach service. A study has been commissioned and the results will be shared with the local community in summer 2016.</p> |
|               | Congestion and pollution will increase on Calton Avenue as the volumes of traffic will increase. Traffic chaos at peak times.  | No increase in traffic volumes is anticipated as a result of the Quietway measures proposed on Calton Avenue.  |
|               | Alignment of Quietway through Calton Avenue.   | The alignment of the Quietway route has been previously consulted and agreed as part of the Southwark Cycling Strategy in 2015 and aims to deliver part of a London-wide cycle network. Quietway 7 goes through residential areas connecting these neighbourhoods with destinations along the route. It also links with proposals within the London Borough of Lambeth.  |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

|  |  |   |
|--|--|---|
|  | Perceived as a scheme prioritising cycling over other road users.                          | While improving conditions for cyclists, the objectives of the Quietway scheme are to improve road safety and accessibility for all road users and enhance the streetscape quality.   |
|  | AM and PM peak traffic – no measures to address this.                                      | Through investment in cycling infrastructure and by making cycling more attractive, it is hoped that there will be a change in current travel habits to more sustainable modes of travel such as cycling resulting in a reduction in peak period traffic volumes.   |
|  | Loss of parking due to introduction of the new zebra crossing and buildouts.               | There would be no overall loss of parking in the vicinity of the junction as a result of the removal of the traffic island north east of Woodward Road and the introduction of the proposed zebra crossing.<br>For additional information on the zebra crossing proposals refer to related section below.   |
| <b>Swapping of traffic islands in Calton Avenue with footway buildouts</b> | Traffic islands are safer than buildouts as they provide a two-phase crossing opportunity. | <p>Footway buildouts reduce the time pedestrians must spend in the road or in the middle of the road. The existing traffic islands do not provide adequate waiting widths to accommodate large numbers of pedestrians, disabled users or parents with prams. Additionally, inappropriately parked vehicles can obstruct the visibility of pedestrians when crossing at the existing traffic islands.</p> <p>Traffic islands create pinch points and bring vehicles and cyclists into conflict, while build outs remove this conflict. Footway buildouts also encourage cyclists to maintain the primary riding position. Cont./</p> <p>The proposed footway buildouts approximately 20metres south of the Calton Avenue / Townley Road junction will not be constructed. However, the existing traffic islands at this location will be removed.</p> <p>This will remove the pinch point for cyclists while encouraging pedestrians to cross closer</p> |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

|  |  |   |
|--|--|---|
|  | <p>Buildouts are dangerous as they introduce conflicts between vehicles and cyclists.</p>  | <p>to the junction where a central refuge island with adequate width is to be maintained and will allow parking at a location where not previously possible due to the proximity to the traffic islands.</p> <p>For more details regarding the use of buildouts as a traffic calming technique, refer to <i>Traffic Calming</i>, LTN 1/07, DfT (<a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/lt-1-07_Traffic-calming.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/lt-1-07_Traffic-calming.pdf</a>), and the <i>London Cycling Design Standards</i>, TfL (<a href="https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit">https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit</a>)</p> |
|  | <p>The traffic islands at the Calton Avenue / Townley Road junction should not be removed as they provide a safe crossing for school children.</p> | <p>The proposals do not include the removal of the traffic islands at the Calton Avenue / Townley Road junction.</p>  |
|  | <p>Loss of parking will have a negative impact on the local businesses which will lose customers. Speeds will increase along the route.</p>        | <p>The extension of double yellow lines aims to improve visibility at or near junctions and reduce the likelihood of collisions occurring by removing obstructive and dangerous parking. Visibility should generally be sufficient to allow road users to see potential conflicts or dangers in advance of the distance in which they will be able to brake and come to a stop. The Highway Code (Rule 243) specifies that motorists must not stop or park opposite or within 10 metres (32 feet) of a junction, except in an authorised parking space.</p>   |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

|  |  |  |
|--|--|--|
|  | <p>Controlled parking zone restrictions tailored to discourage commuter parking and prioritise residents.</p> <p>Abuse of parking restrictions - enforcement issues.</p> | <p>It is part of a LBS Borough-wide initiative to implement no waiting restrictions at any time (Double Yellow Lines) within 7.5 metres of a junction to ensure adequate visibility and increase safety for all road users. This addresses the conflicts between vehicles as well as vehicles and pedal cycles, and vehicles and pedestrians. It should be highlighted that obstructive parking practices and poor visibility at junctions are more dangerous for vulnerable road users, such as young children and people with disabilities.</p>  |
|  | <p>Parking displacement on Dekker Road, Desenfans Road and Druce Road</p>  | <p>Proposals regarding parking restrictions have been reviewed and the proposed double yellow lines will be reduced to eliminate all parking loss, subject to any future road safety audits undertaken on the Quietway 7 proposals. The proposed parking restrictions on Court Lane in particular will be reduced to the minimum required (one parking space lost instead of three).</p> <p>Please refer to the Highway Code for more information on safe parking practises<br/> <a href="https://www.gov.uk/guidance/the-highway-code/waiting-and-parking-238-to-252">https://www.gov.uk/guidance/the-highway-code/waiting-and-parking-238-to-252</a></p>   |
|  | <p>Double yellow lines all the way to Gilkes Crescent are excessive as it is a no-through road.</p>  | <p>Parking restrictions south west of Gilkes Crescent are proposed to improve road safety for users and facilitate access to the signalised junction. A loading bay is proposed to cater for the needs of nearby businesses and short term parking has been provided where considered safe.</p> <p>However, due to lack of support for this proposal, the extent of parking restrictions has been reviewed. In order to minimise parking loss, no restrictions will be added opposite the junction. The Double Yellow Lines will begin 7.5m south west of the junction to ensure elimination of pinch points in this particularly narrow section of Calton Avenue.</p> <p>Although 4 parking spaces are removed due to this proposals the net loss is 0 since additional parking provisions are made available</p> |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

|   |  |  |
|---|--|--|
| <b>New zebra crossing south west of Woodward Road</b> | Location of zebra crossing   | Due to a large number of comments regarding the suitability of this site for the introduction of a zebra crossing, further investigation was undertaken. The zebra crossing will now be introduced at the location of the existing traffic islands (north east of Woodward Road), as this is the location the majority of pupils cross.            |
|   | No requirement for zebra crossing and impact on nearby residents   |  |
|   | Proposed geometry of road layout will restrict vehicle manoeuvres and create a pinch-point for two way vehicles. | Vehicle swept path analysis has been undertaken for manoeuvres to / from Woodward Road with no additional constraints proposed.  |
|   | The proximity of the proposed zebra crossing to uncontrolled crossing at traffic island.                         | The traffic island north east of Woodward Road would be removed as part of the initial proposals.  |
| <b>Provision of marked parking bays</b>               | The marked bays will lead to fines for vehicles going outside the dashed line.                                   | The provision of marked bays was initially proposed as a visual aid demonstrating where it is safe to park without causing an obstruction. They would not have been enforceable, so no fines would have been issued. However, due to high levels of opposition, and re-examination of the proposals, this aspect is to be removed from the design. |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

---

|  |  |   |
|--|--|---|
| <b>Removal of centre line markings</b> | <p>The removal of the centre line road markings will lead to confusion especially with coaches and HGVs that will cover all available road space. The lack of centre lines could be particularly dangerous during the dark hours of the day.</p> | <p>Due to the regularity of parked vehicles in Calton Avenue the effective road width is often reduced to &lt;5.5m, as such, drivers might expect a road marked with a centre line to be wide enough for opposing lanes of traffic to pass. Removal of this centre line will promote safer driving behaviours, such as reduction in speeds along the route, and will support the existing 20mph speed limit.</p> <p>However, due to lack of support for this aspect of the proposals, the removal of the centre line marking will only be trialled where carriageway resurfacing is proposed. Existing centre lines will be maintained elsewhere along the route.</p> <p>TfL has recently published related research highlighting the above, which can be accessed online at the following link <a href="http://content.tfl.gov.uk/centre-line-removal-trial.pdf">http://content.tfl.gov.uk/centre-line-removal-trial.pdf</a></p> |

## Dulwich Village Junction

### Main Consultation Issues and Responses

Issue repeatedly raised within feedback

| Dulwich Village Junction |  |   |
|--------------------------|--|---|
| Proposal                 | Concern/Objection  | Response  |
| Overall                  | Congestion at the junction will increase due to reduction in available road space.                       | <p>There is only one location where the number of traffic lanes is being reduced – on Calton Avenue approach. The removal of one traffic lane will allow there to be a safe, segregated area for cyclists. Lane utilisation is currently poor at this location with the vehicles turning from Court Lane blocking the use of all lanes.</p> <p>The proposals will reduce the overall cycle time at the junction resulting in the junction operating more efficiently. Pedestrian wait times will also be reduced.</p> |
|                          | Alignment of Quietway through Dulwich Village junction.  | <p>The alignment of the Quietway route has been previously consulted and agreed as part of the Southwark Cycling Strategy in 2015 and aims to deliver part of a London-wide cycle network. Quietway 7 goes through residential areas connecting these neighbourhoods with destinations along the route. It also links with proposals within the London Borough of Lambeth.</p>  |
|                          | AM and PM peak traffic – no measures to address this.  | <p>Through investment in cycling infrastructure and by making cycling more attractive, it is hoped that there will be a change in current travel habits to more sustainable modes of travel such as cycling resulting in a reduction in peak period traffic volumes.</p>  |
|                          | Consultation was inadequate and rushed - further engagement is required with the residents associations. | <p>Pre-consultation workshops, meetings with residents associations and other stakeholders were all held prior to the formal consultation. In addition to this the consultation response period was held open for an additional week to ensure all feedback was incorporated into the consultation process.</p>   |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

|  |   |   |
|--|---|---|
|  | Available data is insufficient as it was not collected during term peak times - no evidence of modelling that corresponds to the situation.   | Data used to model Dulwich Village junction was collected on 4 <sup>th</sup> February and 7 <sup>th</sup> July 2015 (during Spring & Summer Term times respectively) and as such, any concerns regarding the accuracy of the data are unsubstantiated.  |
|  | Extension of segregated cycle facility in to Calton Avenue.   | Due to limited available space, extension of this segregation beyond the junction with Court Lane is not feasible.  |
|  | Residents are not convinced that the proposed changes will result in an improvement in the use of the Dulwich Village junction.   |   |
|  | The proposals should be trialled before they go in and the changes should be easy to reverse if proven ineffective. Modelling that the residents will understand should be undertaken, such as microsimulation of the junction. | Traffic modelling results indicate that the junction will operate more efficiently under the proposed layout.<br><br>Please refer below for more information regarding trialling the proposals.   |
|  | Request for more radical measures to further encourage cycling.   | More radical measures were considered, such as road closures, but were shown to result in significantly disproportionate negative impacts on other sections of the Quietway and surrounding road network. See more details in the <i>Dulwich Village Initial Traffic Reassignment Modelling Technical Note</i> - see appendices |
|  | Request for a shared space approach.  | Given the heavy traffic volumes during peak times, providing a shared space and removing all controlled crossing facilities for pedestrians in an area with significant pedestrian demand raises safety concerns. At this location, these concerns are  |

|  |   |   |
|--|---|---|
|  | <p>Requests for more radical re-arrangement of the junction, such as the mini-roundabout solution similar to Poynton in Cheshire: <i>'This proposal treats Dulwich Village Junction as a series of T-junctions. 3 mini-roundabouts would operate at each T, causing the traffic to self-regulate as no one stream can dominate the other. It would remove the need for traffic lights and cost less to operate.</i></p> <p><i>Other shared space arrangements would be possible. These could deal with all the objections noted above, handling the traffic better and safer, by reducing speeds and increasing mutual interaction and respect between all classes of road users. They would also reduce or remove the present dividing effect of the traffic lights on Dulwich Village. Also, such schemes would regulate themselves without the need for traffic light setting and maintenance; They also have the potential to cost less.'</i></p> | <p>particularly prominent as young school children will be expected to share a space with high volumes of motorised traffic.</p> <p>The Southwark Streetscape Design Manual highlights that <i>'...Shared surfaces (...) will generally only be acceptable in quiet low trafficked street environments where pedestrians will dominate.'</i> which reflects the available national guidance by the Department for Transport.</p> <p>The suggested Poynton solution presents similar concerns to a shared space approach, with a significant disadvantage to pedestrians and cyclists due to the removal of signal control.</p> <p>Additionally, given the significant amounts of traffic on this route and the lack of segregation mini roundabouts introduce, negotiating a multiple mini-roundabout arrangement would be a barrier to a novice or child cyclist. This would go against the Quietway objectives.</p> <p>For more details on shared space solutions, refer to <i>Shared Space</i>, LTN 1/11, DfT (<a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/3873/lt-1-11.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/3873/lt-1-11.pdf</a>) and <i>Total Shared Surface and Non-Standard Level Surface streets and spaces</i> (DS.224), Southwark Streetscape Design Manual (<a href="http://www.southwark.gov.uk/downloads/download/3339/design_standards_-_accessibility">http://www.southwark.gov.uk/downloads/download/3339/design_standards -_accessibility</a>).</p> |
|--|---|---|

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

|  |   |   |
|--|---|---|
|  | <p>Request for a more radical approach to the problem of traffic volumes at the peak times, such as a Controlled Zone concept operating during school drop-off and pick-up times.</p> | <p>Daily journeys to schools are perceived to form a large proportion of the traffic observed at the Dulwich Village junction at peak hours. However, more comprehensive traffic investigation studies would be required to quantify the above.</p> <p>Several road closures were considered along the proposed Quietway route and the undertaken traffic reassignment modelling showed these had a significantly disproportionate impact on other sections of the Quietway and surrounding road network. See more details in the <i>Dulwich Village Initial Traffic Reassignment Modelling Technical Note</i>.- see appendices</p> <p>Introducing a controlled School Zone would require a number of peak period road closures (Dulwich Village and neighbouring roads) and extensive planning of traffic reassignment for the wider area. While a larger area-wide network study would be required before such a controlled zone is implemented, this is outside the scope of Quietway project, and it is not clear that such a scheme could be successfully implemented without significant enforcement.</p> |
| <p><b>Introduction of staggered pedestrian crossings</b></p> | <p>Staggered crossings compromise pedestrian accessibility and safety at the junction.</p>  | <p>To improve pedestrian facilities, pedestrian count down aspects advising on crossing times will be considered to provide pedestrians with more information at this junction.</p> <p>To achieve a reduction in the total signals cycle at Dulwich Village junction and to improve the operation of the junction, the pedestrian phase needs to be divided into two movements and to accommodate this, staggered crossing islands are required. With straight crossings, a reduction in the overall cycle time would not be possible. This also facilitates provision of safe cycle facilities at the junction. Pedestrian wait times will be reduced as a result of the proposals - 82sec(AM Peak) / 72sec(PM Peak) instead of 77sec / 69sec respectively. More green time is given to crossing pedestrians (Turney Road -13sec and Calton Avenue - 6sec).</p> <p>The width of the islands has been dictated by the geometry available at the junction</p>  |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

|  |  |  |
|--|--|--|
|  |  | <p>and consideration of the numbers of crossing pedestrians using existing crossings. The proposed staggered crossings locations do not currently experience high levels of pedestrian usage – the crossing outside the school is the busiest. A pedestrian comfort assessment for the proposed crossing layout is currently been undertaken to ensure that the staggered islands will be able to accommodate the flow of pedestrians.</p> <p>The construction of the traffic islands with high kerbs will act as a constraint for pedestrians and minimise the likelihood of pupils ‘spilling’ into the road.</p>           |
| <b>Segregated cycle facility with separate cycle signals</b> | <p>The proposals introduce conflicts between cyclists and pedestrians at the internal stop lines. No cyclists will stop (at the internal stop lines) by choice to allow for pedestrians to cross - enforcement issues.</p> | <p>With the new junction layout cyclists are offered a separate phase to clear the junction before general traffic. However, this phase is shared with pedestrians crossing the exits arms of Turney Road and Calton Road. This means that if there is pedestrian demand at the above crossings, cyclists will be held at a red light and will have to stop at the stop lines before these crossings. Adequate space is provided for cyclists to stop and wait at these locations. Careful monitoring of the compliance to the internal stop lines will be undertaken and enforcement carried out if deemed appropriate.</p> |
| <b>Removal of pedestrian guardrail at the junction</b>       | <p>Removal of pedestrian guardrail will have a significant impact on road safety at the junction. If replaced, alternative provisions should be considered.</p>  | <p>An independent safety review will be undertaken to identify the extent of the guardrail removal. Some sections of the guardrail on the western side of Dulwich Village can be maintained, but relocated to the new kerblines, to prevent pupils from ‘spilling’ into the road.</p> <p>A pedestrian comfort assessment is currently been undertaken to identify locations where unnecessary pedestrian guardrailing sections are reducing available footway widths.</p>  |
| <b>Widening of footways</b>                                  | <p>Widening footways will reduce junction capacity.</p>  | <p>Reducing available road space at this location is predicted not to negatively affect the operation of the junction. Widening of footways will improve school children safety and help alleviate pedestrian congestion at peak hours.</p>  |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

|  |  |  |
|--|--|--|
| <b>Change in priority at the Calton Avenue / Court Lane junction and new Court Lane layout</b> | <p>Court Lane is the main through route. Changing the priority will result in traffic having difficulty to access the junction and building up on Court Lane. Drivers will opt to use narrow residential streets (Dekker Road, Desenfans Road, Druce Road) and Woodward Road to access Calton Avenue. Speeds and rat-running traffic will increase on these streets and Calton Avenue.</p> | <p>The proposed layout on Court Lane and the change in priority allows for the introduction of the segregated cycling facility at the approach to the signalised junction. They also discourage rat running on Court Lane.</p> <p>The change in priority from Court Lane to Calton Avenue will be trialled, with a view to reverse the layout if the trial is unsuccessful. Proposals taken forward will allow for the simple reversal of this change of priority if considered necessary at a later date.</p> <p>With views of improving pedestrian safety and comfort, the crossing facilities at the bottom of Court Lane will be improved with the introduction of courtesy crossing features, such as contrasting paving materials.</p> |
| <b>Banned left turn from Dulwich Village northbound into Turney Road</b>                       | <p>Banning the left turn from Dulwich Village northbound into Turney Road will reassign traffic to Burbage Road, Boxall Road, Pickwick Road, and Aysgarth Road.</p>  | <p>This banned turn facilitates wider pedestrian refuge islands. As such, it is an important improvement for pedestrian accessibility.</p> <p>Traffic data suggests that the volumes of traffic turning left is very light (peak times: 9veh/hr AM and 18veh/hr PM) and any reassignment would be negligible.</p> <p>It is proposed to drop this feature, subject to detailed design and monitoring post-implementation.</p>   |

## Turney Road

### Main Consultation Issues and Responses

Issue repeatedly raised within feedback

| Turney Road  |  |   |
|--|--|---|
| Proposal   | Concern/Objection  | Response  |
| Overall  | Alignment of Quietway through Calton Avenue – Use of College Road & Fountain Drive.        | The alignment of the Quietway route has been previously consulted and agreed as part of the Southwark Cycling Strategy in 2015 and aims to deliver part of a London-wide cycle network. Quietway 7 goes through residential areas connecting these neighbourhoods with destinations along the route. It also links with proposals within the London Borough of Lambeth.   |
|  | Traffic volumes on Turney Road – area wide strategy required.                              | <p>Traffic reassignment modelling carried out revealed point closures or measures to reduce traffic volumes had a significantly disproportionate impact on other sections of the Quietway and surrounding road network.</p> <p>See more details in the <i>Dulwich Village Initial Traffic Reassignment Modelling Technical Note</i>, see appendices</p> <p>Larger area-wide network study is outside of the scope of Quietway project.</p>  |
| Swapping of traffic islands with footway buildouts | Traffic islands are safer than buildouts as they provide a two-phase crossing opportunity. | <p>Footway buildouts reduce the time pedestrians must spend in the road or in the middle of the road. Most of the existing traffic islands are not designed for pedestrians as they are less than 1.5m wide and do not include tactile paving. Hence, they do not provide adequate waiting widths and the provisions to accommodate large numbers of pedestrians, disabled users or parents with prams. Additionally, inappropriately parked vehicles can obstruct the visibility of pedestrians when crossing at the existing traffic islands.</p> <p>Traffic islands create pinch points and bring vehicles and cyclists into conflict, while build</p> |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

|   |  |  |
|---|--|--|
|   |  | <p>outs remove this conflict. Footway buildouts also encourage cyclists to maintain the primary riding position.</p> <p>For more details the use of buildouts as a traffic calming technique, refer to <i>Traffic Calming</i>, LTN 1/07, DfT (<a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/lt-1-07_Traffic-calming.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/lt-1-07_Traffic-calming.pdf</a>), and the <i>London Cycling Design Standards</i>, TfL (<a href="https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit">https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit</a>)</p>  |
|   | Loss of parking from the introduction of buildouts.  | The proposed buildouts will replace existing traffic islands. Parking at the island locations would currently cause an obstruction, so there is no overall loss in parking as a result of replacing the islands with footway buildouts.  |
| <b>Double yellow lines at junctions</b> | Parking loss - DYL lines are excessive as currently the roads are not congested and visibility around the junctions is good. | <p>The extension of double yellow lines aims to improve visibility at or near junctions and reduce the likelihood of collisions occurring by removing obstructive and dangerous parking. Visibility should generally be sufficient to allow road users to see potential conflicts or dangers in advance of the distance in which they will be able to brake and come to a stop. The Highway Code (Rule 243) specifies that motorists must not stop or park opposite or within 10 metres (32 feet) of a junction, except in an authorised parking space.</p> <p>It is part of a LBS Borough-wide initiative to implement no waiting restrictions at any time (Double Yellow Lines) within 7.5 metres of a junction to ensure adequate visibility and increase safety for all road users. This addresses the conflicts between vehicles as well as vehicles and pedal cycles, and vehicles and pedestrians. It should be highlighted that obstructive parking practices and poor visibility at junctions are more dangerous for vulnerable road users, such as young children and people with disabilities.</p> <p>Proposals regarding parking restrictions have been reviewed and the proposed double yellow lines will be reduced to minimise parking loss, subject to any future road safety audits undertaken on the Quietway 7 proposals.</p> |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

|  |  |   |
|--|--|---|
|  | Parking displacement on Burbage Road, Boxall Road, Aysgarth Road and Pickwick Road   | Please refer to the Highway Code for more information on safe parking practises <a href="https://www.gov.uk/guidance/the-highway-code/waiting-and-parking-238-to-252">https://www.gov.uk/guidance/the-highway-code/waiting-and-parking-238-to-252</a>   |
| <b>Double yellow lines east of Croxted Road</b>  | Impact on nursery pick-up and drop-off times.  | The extension of double yellow lines at Croxted Road is required to remove obstructions underneath the bridge that create pinch points and reduce the effective capacity on the approach to the junction.   |
| <b>Provision of marked advisory parking bays</b> | Request for H-Bar Markings   | The provision of H-Bar markings is against Southwark Council policy and as such, it is not recommended this is included in the proposals.   |
|  | Residents without off-street parking will have difficulty finding a parking space with the introduction of the parking bays. | The provision of marked bays was initially proposed as a visual aid demonstrating where it is safe to park without causing an obstruction. They would not have been enforceable, so no fines would have been issued. However, due to high levels of opposition, and re-examination of the proposals, this aspect will be removed from the design. |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

|   |  |  |
|---|--|--|
| <b>Additional road humps</b>                | Already adequate traffic calming.  | <p>In order to discourage vehicle speeds in excess of 20 miles per hour along the Quietway 7 route, the spacing between existing road humps was reviewed. Three new sinusoidal road humps are necessary to ensure steady speed along Turney Road.</p> <p>Refer to <i>Traffic Calming</i>, LT N 1/07, DfT (<a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/ltn-1-07_Traffic-calming.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/ltn-1-07_Traffic-calming.pdf</a>) for more details on traffic calming techniques.</p>   |
| <b>Removal of centre line road markings</b> | Centre line is a good reference point and should be maintained for separation. | <p>Due to the regularity of parked vehicles in Calton Avenue the effective road width is often reduced to &lt;5.5m, as such, drivers might expect a road marked with a centre line to be wide enough for opposing lanes of traffic to pass. Removal of this centre line will promote safer driving behaviours, such as reduction in speeds along the route, and will support the existing 20mph speed limit.</p> <p>However, due to lack of support for this aspect of the proposals, the removal of the centre line marking will only be trialled where carriageway resurfacing will take place. Existing lines will be maintained elsewhere along the route.</p> <p>TfL has recently published related research highlighting the above, which can be accessed online at the following link <a href="http://content.tfl.gov.uk/centre-line-removal-trial.pdf">http://content.tfl.gov.uk/centre-line-removal-trial.pdf</a></p> |

## Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7) Calton Avenue to Farquhar Road

### Main Consultation Issues and Responses

Issue repeatedly raised within feedback

| Dulwich Wood Avenue / Farquhar Road |  |  |
|-------------------------------------|--|--|
| Proposal                            | Concern/Objection  | Response   |
| Overall                             | Alignment – concerns around use of Gipsy Hill for cyclists.                                      | The alignment of the Quietway route has been previously consulted and agreed as part of the Southwark Cycling Strategy in 2015 and aims to deliver part of a London-wide cycle network. Quietway 7 goes through residential areas connecting these neighbourhoods with destinations along the route. It also links with proposals within the London Borough of Lambeth.  |
|                                     | The Gipsy Hill / Dulwich Wood Avenue junction.   | This junction layout will be reviewed within the completion of the design to improve safety for all road users. Co-ordination with Lambeth Council will be undertaken to improve traffic calming on Gipsy Hill.  |
|                                     | Request for parking restrictions on the inside of the bend between Colby Road and Farquhar Road. | These safety concerns will be investigated within the completion of the design, and subject to any safety audits that will be undertaken.  |
| Swapping of                         | Traffic islands are safer than buildouts as they provide a two-phase crossing opportunity.       | Footway buildouts reduce the time pedestrians must spend in the road or in the middle of the road. The existing traffic islands are not designed for pedestrians as they are less than 1.5m wide and do not include tactile paving. Hence, they do not provide adequate waiting widths and the provisions to accommodate large numbers of pedestrians, disabled users or parents with prams. Additionally, inappropriately parked vehicles can obstruct the visibility of pedestrians when crossing at the existing traffic islands. |
|                                     | Buildouts are dangerous as they introduce conflicts  |  |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)**  
**Calton Avenue to Farquhar Road**

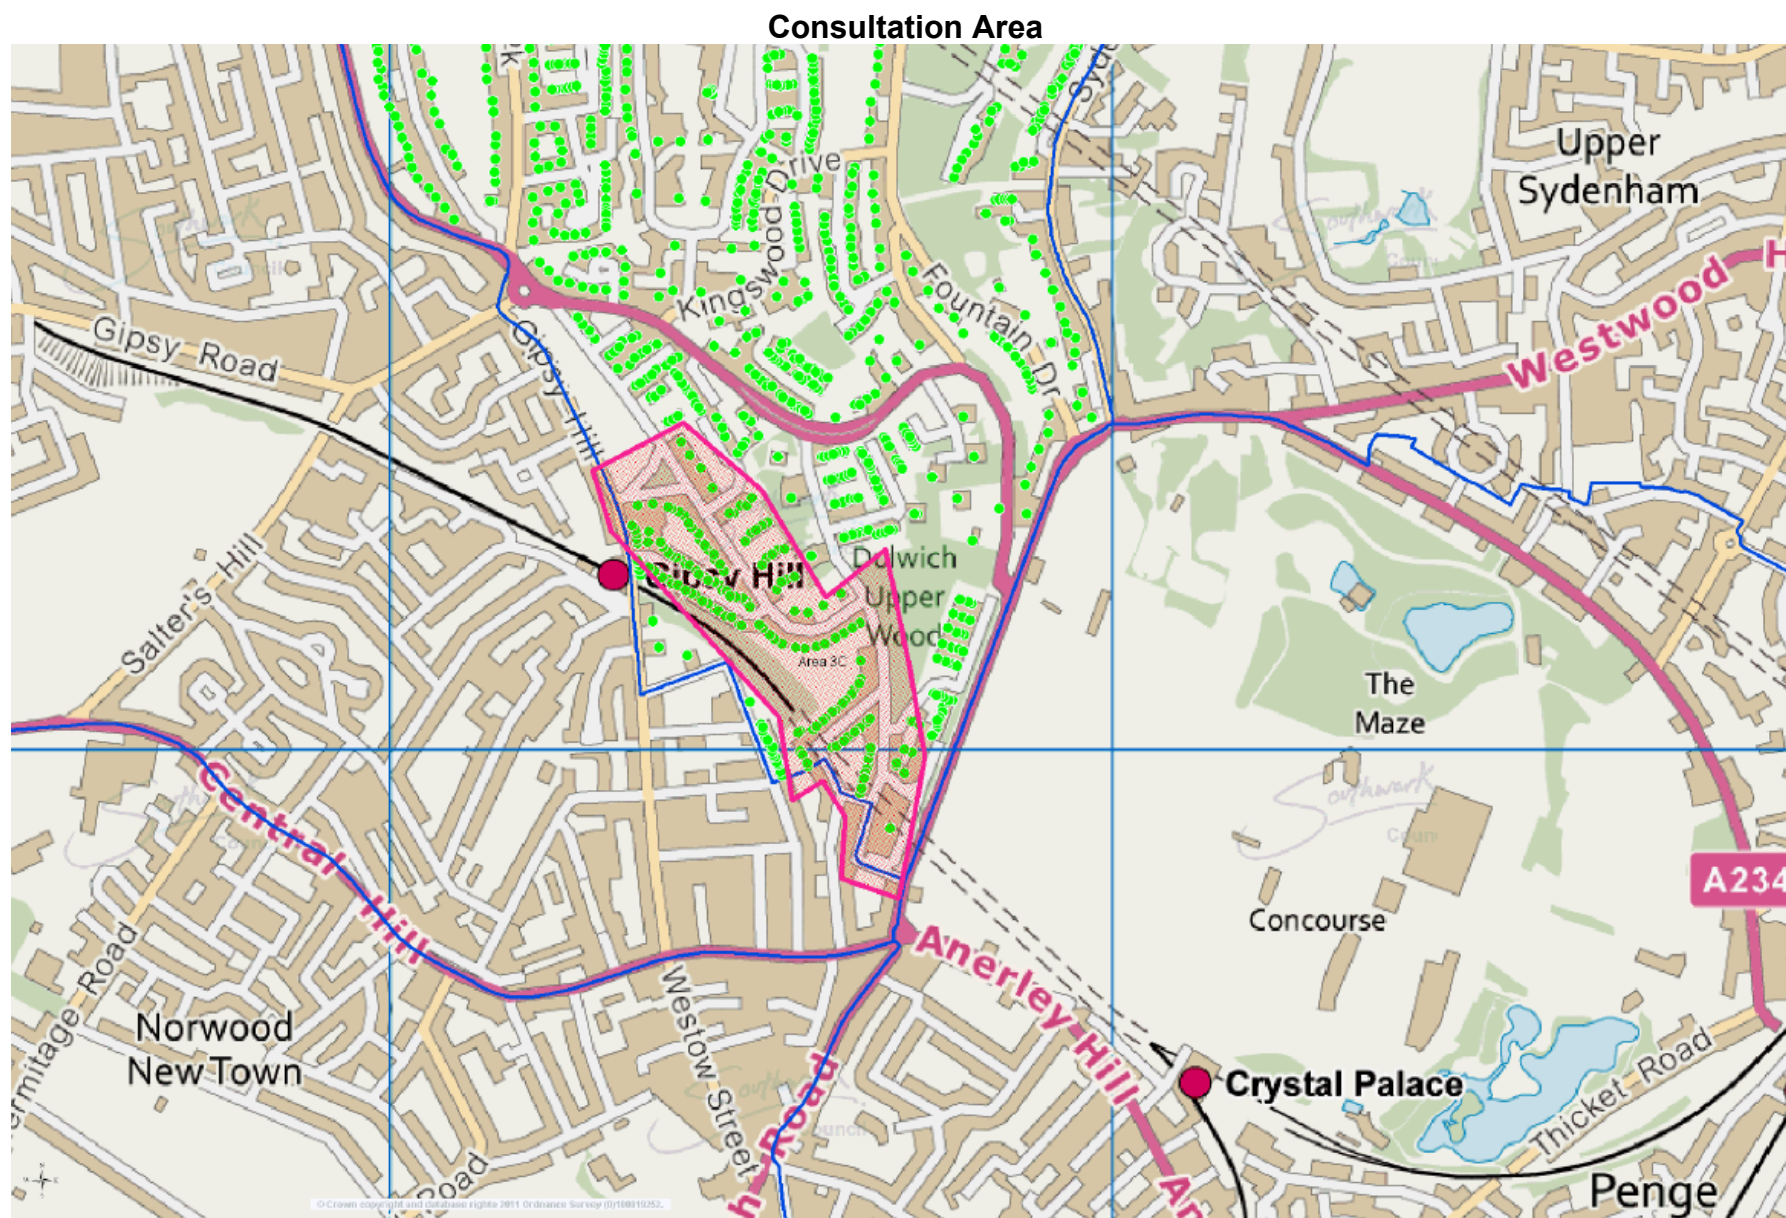

|   |  |  |
|---|--|--|
|   | among road users.  | <p>Traffic islands create pinch points and bring vehicles and cyclists into conflict, while build outs remove this conflict. Footway buildouts also encourage cyclists to maintain the primary riding position.</p> <p>For more details the use of buildouts as a traffic calming technique, refer to <i>Traffic Calming</i>, LT N 1/07, DfT (<a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/ltn-1-07_Traffic-calming.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/ltn-1-07_Traffic-calming.pdf</a>), and the <i>London Cycling Design Standards</i>, TfL (<a href="https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit">https://tfl.gov.uk/corporate/publications-and-reports/streets-toolkit</a>)</p>  |
| <b>Double yellow lines at the junctions</b> | <p>Parking loss – Double yellow lines opposite the junctions are excessive as currently the roads are not congested and visibility around the junctions is good.</p> | <p>The extension of double yellow lines aims to improve visibility at or near junctions and reduce the likelihood of collisions occurring by removing obstructive and dangerous parking. Visibility should generally be sufficient to allow road users to see potential conflicts or dangers in advance of the distance in which they will be able to brake and come to a stop. The Highway Code (Rule 243) specifies that motorists must not stop or park opposite or within 10 metres (32 feet) of a junction, except in an authorised parking space.</p> <p>It is part of a LBS Borough-wide initiative to implement no waiting restrictions at any time (Double Yellow Lines) within 7.5 metres of a junction to ensure adequate visibility and increase safety for all road users. This addresses the conflicts between vehicles as well as vehicles and pedal cycles, and vehicles and pedestrians. It should be highlighted that obstructive parking practices and poor visibility at junctions are more dangerous for vulnerable road users, such as young children and people with disabilities.</p> <p>Proposals regarding parking restrictions have been reviewed and the proposed double yellow lines will be reduced to minimise parking loss, subject to any future road safety audits undertaken on the Quietway 7 proposals. On Dulwich Wood Avenue, the double yellow lines opposite the junctions with Rusholme Grove and Colby Road will not be introduced.</p> |

**Appendix D- Elephant & Castle to Crystal Palace Quietway (QW7)  
Calton Avenue to Farquhar Road**

|  |   |   |
|--|---|---|
|  |   | Please refer to the Highway Code for more information on safe parking practises<br><a href="https://www.gov.uk/guidance/the-highway-code/waiting-and-parking-238-to-252">https://www.gov.uk/guidance/the-highway-code/waiting-and-parking-238-to-252</a>  |
| <b>New segregated cycle lanes on Dulwich Wood Avenue and Farquhar Road</b> | Light segregation (such as armadillos) should be introduced to ensure cyclist safety.   | The introduction of a mandatory cycle lane will improve safety for uphill cyclists. The provision of light segregation will be considered during the completion of the design.  |
| <b>Additional road humps</b>   | Existing traffic calming is ineffective   | Existing speed cushions will be replaced with sinusoidal road humps which are more effective in speed reduction and encourage safer driving behaviours for all road users, including motorcyclists and drivers of large vehicles. An additional sinusoidal road hump will be introduced to ensure vehicle speeds are appropriate for the 20mph speed limit along the route.<br><br>Please refer to <i>Traffic Calming</i> , LT N 1/07, DfT<br>( <a href="https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/ltn-1-07_Traffic-calming.pdf">https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/329454/ltn-1-07_Traffic-calming.pdf</a> ) for more details on traffic calming techniques. |
| <b>Removal of centre line road markings</b>                                | As Farquhar Road is a hill, and everyone (drivers, cyclists) speed downhill, the existing centre line marking should remain for safety. | Removal of this centre line will promote safer driving behaviours, such as reduction in speeds along the route, and will support the existing 20mph speed limit.<br><br>TfL has recently published related research highlighting the above, which can be accessed online at the following link <a href="http://content.tfl.gov.uk/centre-line-removal-trial.pdf">http://content.tfl.gov.uk/centre-line-removal-trial.pdf</a><br><br>However, due to lack of support for this aspect of the proposals, the removal of the centre line marking will only be trialled where carriageway resurfacing will take place. Existing centre lines will be maintained elsewhere along the route.   |
