

<p>Vision</p>	<p>To support a sustainable, confident and resourceful voluntary and community sector (VCS) that can work in collaboration with the public and private sector to create a safer and fairer Southwark</p>			
<p>Objectives</p>	<p>To improve quality and outcomes for residents that reduce and prevent future demand on high cost, high demand services</p>		<p>To sustain and build strong, cohesive communities where no one group or community is left behind.</p>	
<p>Priorities</p>	<p>Better partnership working to improve outcomes for residents</p>	<p>Improved commissioning and grant-giving to focus on outcomes and be more collaborative, and community-led</p>	<p>Better use of community assets as a route to revitalize neighbourhoods and create preventative places</p>	<p>More resilient communities that are connected and more resourceful</p>
<p>We will achieve this by...</p>	<p>Changes in how we work together and embed the principles of co-production in everything we do in order to maximize social value</p>	<p>Fuller involvement of stakeholders in the commissioning cycle that is outcomes focused. To achieve this, we want to develop collaborative commissioning approaches and invest in developing local consortia/partnerships</p>	<p>Harnessing the value of the borough's outside spaces to improve wellbeing, engagement and community cohesion.</p>	<p>Unlocking the assets and social value that exist in communities so that resources, time and talents can support the development of more resourceful and connected communities</p>
	<p>Creating more responsive and joined up ways of working using existing structures (such as the Local Care Networks) to harness the power and knowledge of local communities to help reduce the impact of reductions in local authority and NHS resource</p>	<p>Changes to how we use contracts and grants with a balance between longer funding cycles and support for innovation to help develop different, more efficient and more impactful services for residents. We will develop a longer-term outlook in terms of grants and commissioning</p>	<p>Developing an approach to enabling asset transfer to take place in the right circumstances.</p>	<p>Enabling and supporting the development of community connectors. Acting as navigators and supporters for local communities; connecting individuals, neighbourhoods and communities</p>
	<p>Encouraging the VCS to work more in collaboration and to provide mutual support to help improve outcomes for residents</p>	<p>Agreeing a set of core outcomes (Common Framework) for the benefit of the whole community of Southwark against which impact is measured and aligned against Council and CCG plans</p>	<p>Taking advantage of co-location opportunities. We want through co-location and sharing assets to improve preventative services and outcomes for residents.</p>	<p>Enabling individuals and groups to be agents of change, ready to shape the course of their own lives. We will achieve this supporting volunteers and other forms of social action</p>
	<p>Greater engagement with the business sector leading to more placed based giving and crowd funding initiatives</p>	<p>Building services around the needs of the local community and there is a presumption that local provision is the default position. Using digital approaches to transform our services</p>	<p>Embedding co-production and co-design when considering place based strategies, to create improved outcomes for residents, through community-led approaches.</p>	
<p>Delivery</p>	<p>VCS/Council Liaison Group implementation planning groups hold others to account for delivery and implementation</p>
