

Item No. 2.5	Classification: Open	Date: 23 November 2016	Meeting Name: Borough, Bankside and Walworth Community Council
Report title:		Local traffic and parking amendments (Borough wide junction protection project)	
Ward(s) or groups affected:		Cathedrals, Chaucer, East Walworth, Faraday and Newington	
From:		Head of Highways	

RECOMMENDATIONS

1. It is recommended that the following local traffic and parking amendments, detailed in the appendices to this report, be approved for implementation subject to the outcome of any necessary statutory consultation and procedures:
 - 1.1 All Borough, Bankside and Walworth community council wards – upgrade all existing single yellow lines to double yellow lines on all road junctions, to improve intervisibility and road safety for all road users.

BACKGROUND INFORMATION

2. Paragraph 20 of Part 3H of the Southwark Constitution sets out that the community council will take decisions on the following local non-strategic matters:
 - the introduction of single traffic signs
 - the introduction of short lengths of waiting and loading restrictions
 - the introduction of road markings
 - the setting of consultation boundaries for consultation on traffic schemes
 - the introduction of destination disabled parking bays
 - statutory objections to origin disabled parking bays
 - determination of objections to traffic management orders that do not relate to strategic or borough-wide issues.
3. This report gives recommendations for local traffic and parking amendments, involving traffic signs, waiting restrictions and road markings.
4. The origins and reasons for the recommendations are discussed within the key issues section of this report.

KEY ISSUES FOR CONSIDERATION

5. The entire Borough, Bankside and Walworth community council area is covered by controlled parking zones (CPZs). This means that currently all road junctions do have either single or double yellow lines.
6. At present the majority of road junctions in the community council area do have double yellow line protection. Our proposal aims to upgrade those junctions with

single yellow lines to double, to prevent parking at all times. We do not expect this to have a significant negative impact on demand for on-street parking as it is merely formalising prevention of parking in areas that are not safe to park anyway.

7. The rationale for this proposal is discussed in the associated Appendix. A detailed design of the proposal is included.

Location	Proposal	Appendix
All Borough, Bankside and Walworth wards	To upgrade all existing single yellow lines to double yellow lines on road junctions, to improve intervisibility and road safety for all road users.	1

Figure 1

Policy implications

8. The recommendations contained within this report are consistent with the policies of the Transport Plan 2011:
 - Policy 1.1 – pursue overall traffic reduction
 - Policy 4.2 – create places that people can enjoy.
 - Policy 8.1 – seek to reduce overall levels of private motor vehicle traffic on our Streets.

Community impact statement

9. The policies within the transport plan are upheld within this report have been subject to an equality impact assessment.
10. The recommendations are area based and therefore will have greatest affect upon those people living working or traveling in the vicinity of the areas where the proposals are made.
11. The introduction of yellow lines at junctions gives benefit to all road users through the improvement of inter-visibility and therefore road safety.
12. There is a risk that new restrictions may cause parking to be displaced and, indirectly, have an adverse impact upon road users and neighbouring properties at that location. However this cannot be entirely preempted until the recommendation have been implemented and observed.
13. With the exception of those benefits and risks identified above, the recommendations are not considered to have a disproportionate effect on any other community or group.
14. The recommendations support the council's equalities and human rights policies and promote social inclusion by:
 - Providing improved access for key services such as emergency and refuse vehicles.
 - Improving road safety, in particular for vulnerable road users, on the public highway.

Resource implications

15. All costs arising from implementing the recommendations will be fully contained within the existing public realm budgets.

Legal implications

16. Traffic management orders would be made under powers contained within the Road Traffic Regulation Act (RTRA) 1984.
17. Should the recommendations be approved the council will give notice of its intention to make a traffic order in accordance with the Local Authorities Traffic Order (Procedure) (England and Wales) Regulations 1996.
18. These regulations also require the council to consider any representations received as a result of publishing the draft order for a period of 21 days following publication of the draft order.
19. Should any objections be received they must be properly considered in light of administrative law principles, human rights law and relevant statutory powers.
20. By virtue of section 122, the council must exercise its powers under the RTRA 1984 so as to secure the expeditious, convenient and safe movement of vehicular and other traffic including pedestrians, and provision of suitable and adequate parking facilities on and off the highway.
21. These powers must be exercised so far as practicable having regard to the following matters
 - a) The desirability of securing and maintaining reasonable access to premises
 - b) The effect on the amenities of any locality affected including the regulation and restriction of heavy commercial traffic so as to preserve or improve amenity
 - c) The national air quality strategy
 - d) Facilitating the passage of public service vehicles and securing the safety and convenience of their passengers
 - e) Any other matters appearing to the council to be relevant.

Consultation

22. For the recommendations in paragraph 1, the implementation of changes to parking requires the making of a traffic order. The procedures for making a traffic order are defined by national regulations¹ which include statutory consultation and the consideration of any arising objections.
23. Should the recommendations be approved the council must follow the procedures contained with Part II and III of the Regulation which are supplemented by the council's own processes. This process is summarised as:
 - a) publication of a proposal notice in a local newspaper (Southwark News)

¹ <http://www.legislation.gov.uk/uksi/1996/2489/contents/made>

- b) publication of a proposal notice in the London Gazette
- c) display of notices in roads affected by the orders
- d) consultation with statutory authorities
- e) making available for public inspection any associated documents (eg. plans, draft orders, statement of reasons) via the council's website² or by appointment at 160 Tooley Street, SE1
- f) a 21 day consultation period during which time any person may comment upon or object to the proposed order

24. Following publication of the proposal notice, any person wanting to object must make their objection in writing, state the grounds on which it is made and send to the address specified on the notice.

25. Should an objection be made that officers are unable to resolve so that it is withdrawn, it will be reported to the community council for determination. The community council will then consider whether to modify the proposal, accede to or reject the objection. The council will subsequently notify all objectors of the final decision.

Programme timeline

26. If these items are approved by the community council they will be progressed in line with the below, approximate timeline:

- Traffic orders (statutory consultation) – Summer 2017
- Implementation – Winter 2017.
