

Non-strategic Traffic and Highway improvement

Appendix	1819CH-020
Location	Lyndhurst Grove
Proposal	Install one cycle hangar with a capacity to hold six bicycles
Community Council	Camberwell
Ward(s) affected	St Giles

Non-strategic Traffic and Highway improvement

A non-strategic traffic and highway improvement is a small project where the council proposes to modify the existing Highway layout. This may include changes to waiting and loading restrictions, traffic calming, improved crossing facilities etc.

Under Part 3D of the council's constitution, the Cabinet Member is responsible for Transport Issues: To decide to implement a traffic and highway improvement project, subject to statutory consultation.

Background / Request

- Due to increased demand for cycle storage, residents have requested more hangars to be installed in the St Giles ward.
- One hangar is available using S106 funding.

Location

- The proposed location is outside no.41 Lyndhurst Grove
- The road isn't within a Controlled Parking Zone or a conservation area.

Investigation and conclusions

- A local consultation was carried out in June 2017 to see if there would be support for a new hangar. 10 properties were sent the consultation questionnaire, and 7 replied: 7 (100%) were in favour.
- Residents in favour requesting the hangar outside their property, as they are split into apartments.

Recommendation

Based on our investigation and conclusions, we recommend installing one hangar at the location attached in the detailed drawing of the proposal provided within this document.

This proposal is subject to a Traffic Management Order (TMO) statutory consultation. A TMO is the legal mechanism the council as traffic authority uses to control aspects of the way that the highway is used. They provide the legal backing to highway modifications and allow them to be enforceable.

Next steps

Should this non-strategic Traffic and Highway improvement proposal be approved, then arrangements will be made to carry out a statutory consultation. Following the statutory consultation period, the council will make arrangements to install a cycle hangar. Should objections be received during the statutory consultation period, these will be presented to the Cabinet Member for determination.
