

Item No. 9.	Classification: Open	Date: 19 November 2019	Meeting Name: Planning Sub-Committee A
Report title:		TPO confirmation 9 Baldwin Crescent SE5 9LQ	
Ward(s) or groups affected:		Camberwell Green	
From:		Director of Planning	

RECOMMENDATION

1. That the provisional TPO reference 534 be confirmed unamended.

BACKGROUND INFORMATION

2. A Tree Preservation Order (TPO) was served on 5 June 2019 following an application reference 19/AP/1301 to reduce a rear garden Strawberry tree within Camberwell New Road Conservation Area.
3. The TPO protects an individual tree. One objection has subsequently been received, which according to the council's standing orders must be considered at planning committee before the order can be confirmed.

KEY ISSUES FOR CONSIDERATION

4. The presumption exists that trees within conservation areas greater than 7.5cm stem diameter should be retained where they are assessed to contribute positively to the character and appeal of the area, unless substantiating evidence is provided as to why they must be removed.
5. In order to continue to have effect the TPO attached in Appendix 1 must be confirmed within 6 months from the date of being served. Should it not be confirmed the tree described in the schedule and shown in the plan revert to the protection afforded by its status within the conservation area.
6. The TPO includes an individual tree which has been assessed as contributing to amenity and because of its value to screening and biodiversity.
7. The tree was assessed as attaining a score of 18 (out of a potential total 25) under the Tree Evaluation Method for Tree Preservation Orders (TEMPO), resulting in a decision guide indicating that making a TPO is definitely merited.
8. The confirmation of a TPO cannot be appealed. However, any subsequent refusal of an application for works to a TPO or imposition of conditions upon consent can be appealed to the Secretary of State via the Planning Inspectorate.
9. Anyone proposing to carry out works to a tree or trees subject to a TPO must seek permission from the local planning authority. This involves completing an application form identifying the trees, detailing the works proposed and explaining the reasons for the works. The council's planning officer will usually

inspect the trees prior to making a decision and may recommend alternative works or refuse consent. If authorisation is given to fell a protected tree, a new tree will usually be required to be planted as a replacement. However, this will in turn require a new TPO to be served.

10. If a tree protected by a TPO is felled, pruned or willfully damaged without consent, both the person who carried out the works and the tree owner are liable to be fined up to £20,000 through the Magistrates Court or, if taken to the Crown Court, an unlimited fine. There are exceptional circumstances, such as when a tree is dead, dying or dangerous, when permission is not required. However, in order to avoid the risk of prosecution advice must be sought from the council and five days notice given before carrying out any works (except in an emergency).

Policy implications

11. The law on Tree Preservation Orders is in Part VIII of the Town and Country Planning Act 1990 as amended and in the Town and Country Planning (Tree Preservation) (England) Regulations 2012.
12. Section 197 of the Act imposes a duty on the local planning authority to ensure the preservation and protection of trees whenever appropriate.
13. London Plan Policy 7.21 Trees and woodlands states that trees and woodlands should be protected, maintained, and enhanced, following the guidance of the London Tree and Woodland Framework.
14. The draft New Southwark Plan P60 states that in exceptional circumstances removal of trees protected by TPO or conservation area status will be permitted where sufficient evidence has been provided to justify their loss. Replacement planting will be expected where removal is agreed. The replacement of TPO trees must take into account the loss of canopy cover as measured by stem girth and biodiversity value.
15. The current recommendation supports the relevant national legislation, London and draft Southwark policies to retain trees with proven amenity value.

Objection to the order

16. One objection has been received from a neighbor in Baldwin Crescent.
17. The objection relates to alleged damage to a garden wall, and that the tree has been left to grow uncontrollably and is sited over a main sewer.
18. The basis of the objections is that the tree is causing damage to property and is unmanaged.
19. Officers have visited the property and noted the following observations;

T1 Strawberry Tree located 300mm from boundary wall.
Bowling to 2 course brick Boundary wall, depicting a lack of lateral restraint. The ground level at 9 Baldwin Crescent is higher than neighbouring property and the wall is not designed as a retaining wall. Flexible mortar has been applied, but the wall requires bracing.
20. Following the visit, officers were also able to advise on a revised specification for

tree works which was sent on 3rd July 2019, however the council is yet to receive any further application for works to this tree..

21. The law requires that in order for a TPO to be served the amenity must be assessed. The TEMPO methodology has in this instance been applied correctly taking into account any evidence of trees being a nuisance based on the available evidence.
22. The Strawberry tree is an evergreen tree in a reasonable condition without structural defects or signs of decay, with a safe useful life expectancy of at least 40 years. The specimen is a large size for its species, forming part of a group of mature rear garden trees which can be seen from County Grove, a publically accessible space adjacent to 15 Baldwin Crescent.
23. No application prior to 2019 has been received by the council in relation to this tree.
24. The initial reduction by 3m was not considered appropriate. This is due to the risk of premature decline, together with significant loss of amenity. A photo of the tree is included within the TPO at Appendix 1.
25. There is no reason why the tree could not continue to be maintained on a regular basis under the protection of a TPO.
26. Should the recommendation be accepted and the order confirmed then an application to carry out works can be submitted in the usual way with consent or refusal considered on the basis of any further evidence provided.

Consultation

27. The TPO was lawfully served to the property and affected parties and included in the TPO register which is publically available online. Once confirmed the planning and land charges registers are updated.

Conclusion

28. Making a TPO affects the ability of a tree owner to manage and deal with the tree as they see fit. The trees in question must be of sufficient quality to be considered worthy of protection to justify the imposition on the owner that a TPO constitutes. It is noted that the one stem of the tree has been previously reduced in the past without seeking prior approval from the council in contravention of Sec.211 of the Town and Country planning Act 1990. A TPO is warranted to ensure ongoing compliance by current and future owners.
29. It is recommended for the reasons set out above that the tree is of sufficient quality to justify TPO status.
30. In this instance it is claimed within one objection that damage has occurred to one boundary wall and that the subject tree is the cause of that damage.
31. In an urban or suburban setting most trees will have the ability at some stage in their lifespan to potentially affect the built environment around them. A degree of proportionality has to be exercised as to the extent of that impact and what might constitute mitigation of any proven damage or nuisance.

32. Whilst there is no right of appeal against confirmation, the affected parties can apply with further evidence to carry out works to the tree should that be considered necessary. This is considered to be sufficient protection of the rights of all parties concerned and their ability to enjoy and protect their property.
33. Should the provisional TPO not be confirmed, any subsequent conservation area application to remove or pollard the tree unnecessarily and without substantiating evidence will result in the re-serving of a TPO.
34. It is therefore recommended that in order to avoid repeated recourse to a TPO that the provisional order is confirmed unamended. Any refusal of consent for works to the tree in future may then be appealed to the Planning Inspectorate for an independent assessment and decision to be made by that body in the usual way.

SUPPLEMENTARY ADVICE FROM OTHER OFFICERS

Director of Law and Democracy

35. The original Tree Preservation Order was made on 5 June 2019 and this protects the trees for up to six months unless confirmed and made permanent.
36. The report refers to the duty imposed upon Councils by virtue of section 197 of the Town and Country Planning Act which requires the authority to ensure the preservation and protection of trees where appropriate.
37. In this instance, one objection to the Order has been received.

REASONS FOR URGENCY

Legislative requirement

38. The TPO lapses on 5 December if not confirmed.
