# Accommodation Procurement Policy for Homeless Households

---

## Section 1: Introduction and Scope

1. This policy sets out:
  - Challenges facing the council in procuring accommodation for homeless households, both for temporary accommodation and for private rented sector offers (“PRSOs”) to discharge the council’s homelessness duties (see below for a detailed explanation of the differences between them).
  - The general principles that will be followed when procuring private accommodation for homeless households.
  - An estimate of the number of properties that are needed for these purposes and an action plan for meeting these needs.
  - An action plan for procuring properties for homeless households.
2. This policy will be monitored and formally reviewed after it has been in operation for 12 months and annually thereafter.
3. **Temporary Accommodation** comprises two forms of accommodation. First, emergency accommodation (called stage 1), for use during the relief stage of homelessness and whilst a household’s homeless application is being assessed. Secondly, there is longer-term, (stage 2) accommodation. This accommodation is for households where the council has accepted a housing duty to them and is provided until suitable longer term accommodation is available.
4. Stage 1 accommodation is generally ‘nightly-booked’ as it is only intended to be for short periods of time and is more expensive than longer term Stage 2 accommodation. In addition to this, the council has 350 hostel spaces for general needs homeless households, which is cost neutral to the council.
5. The council has arrangements with local landlords and also a small number of registered providers (housing associations) to provide Stage 2 accommodation. In addition to these leased forms of accommodation, the council uses its own vacant stock which is decanted and planned for regeneration.
6. **Private rented sector offers (“PRSOs”)**  
These are offers made by the council to homeless households where it has accepted a housing duty to them of private rented accommodation on the basis of a fixed term Assured Shorthold Tenancy. The council has decided to make these offers to provide people with sustainable, affordable and more settled accommodation as an alternative to a long wait in temporary accommodation for social housing.

## Section 2: Procurement challenges

7. There are severe constraints on the amount of temporary accommodation that can be procured from registered providers or by direct purchase. While the council will continue to pursue such opportunities where they are available, a key component in the council’s procurement strategy is accommodation sourced from the private sector.

8. The council aims to procure as much private accommodation for homeless households in Southwark - or as close to it as practicable – as it can. This is the best way of helping households to remain in their communities and to enable the council to meet its legal duty to house homeless households in Southwark wherever “reasonably practicable”.
9. However all local authorities are finding temporary accommodation increasingly difficult to procure to meet increasing demand, as the private sector rents increase and the number of landlords willing to let to households on benefits is reducing.
10. Securing private rented properties which are affordable to homeless households in Southwark is extremely (and increasingly) challenging. Private rents here are amongst some of the most expensive in London (and, indeed, the United Kingdom as a whole) and the majority of homeless households have low incomes. Currently (mid 2018) around 90% of the 2,700 households in temporary accommodation are in receipt of either Housing Benefit or Universal Credit. An earlier report from 2017 showed that 29 households were affected by the overall benefit cap and 17 households were in receipt of Discretionary Housing Payment, which is a temporary payment towards the shortfall in rent.
11. Table 1 shows the difference between allowable temporary accommodation Local Housing Allowance (LHA) rates (Inner SE London, rounded) and average advertised rents in Southwark in January 2021. The gap in the weekly rates is most pronounced for larger bedroom properties.

Table1:

| Accommodation type           | 20/21 LHA rate | Effective monthly LHA rate | Median rents in Southwark (Jan 2021 <sup>1</sup> ) | Gap between LHA and rents |
|------------------------------|----------------|----------------------------|----------------------------------------------------|---------------------------|
| <b>Shared Accommod. Rate</b> | 118.87         | 515.10                     | 700                                                | -267.92                   |
| <b>One bedroom</b>           | 264.66         | 1,146.86                   | 1,517                                              | -562.84                   |
| <b>Two bedroom</b>           | 310.68         | 1,346.28                   | 1,800                                              | -559.67                   |
| <b>Three bedroom</b>         | 385.48         | 1,670.41                   | 2,058                                              | -556.8                    |
| <b>Four bedroom</b>          | 506.30         | 2,193.97                   | 2,500                                              | -607.07                   |

12. For vulnerable households struggling to pay their rent, initiatives such as assuring private tenants' rent may help to retain their tenancies and avoid homelessness. In exchange, the households must show the council that they have taken steps to increase their incomes, including by embarking on training programmes.
13. In April 2017 the DWP Temporary Accommodation Management Fee (TAMF) scheme was replaced by the Flexible Homelessness Support Grant (FHSG). Under the TAMF, funding could only be used for intervention when a household is already homeless, rather than on preventing this happening in the first place. Funding that would have been expected under the TAMF for Southwark for 2017/18 was £909,289, under the FHSG Southwark received £3,616,000 for 2020/21.
14. The new grant will reduce the weekly rent element for households renting in self contained nightly rate and leased temporary accommodation by £40 per week. This will result in more affordable accommodation expenses for these households and the cost of this to Southwark will be recovered through the FHSG preventative solutions.
15. The overall benefit cap for non-working single people is £296.35 per week and £442.31 per week for couples and families in London.

<sup>1</sup> Median Advertised Rents in Southwark, from [Southwark Housing Market Trends Bulletin, January 2021](#)

16. Considerable work has been done to procure and to retain as much temporary accommodation within (or as close to it as practicable) Southwark as possible. The figures in Table 2 show the council's current usage of temporary accommodation for homeless households and its location. 58% of it is in Southwark and 42% is outside. The proportion of out of borough placements was 28% in mid 2014 which remained the same (28%) in mid 2017 but by August 2018 it has increased to 42%.

Table 2:

| <b>Location of Southwark's temporary accommodation</b>         |                                        |          |                                         |          |

17. Rising rents and a very competitive market locally and in London is making it harder to procure new properties here or nearby. Frequently, given the current demand for rented property, when current leases end (both in Southwark and in Greater London more widely), landlords often move into new markets for which they can achieve higher rents. The result is that emergency nightly booked is being used for longer periods after a housing duty has been accepted; this is helping to drive up the cost of temporary accommodation (although it should be noted that costs of longer term leased accommodation are also increasing).
18. Rising homelessness levels across London and the resulting growth in demand have led to an increasingly competitive temporary accommodation market in London and the South East. Most London boroughs face similar challenges and are finding few properties with rents that are near LHA rates more difficult to procure.
19. The reduction in the household benefit cap for non-working households (from £26k to £23k in London for families and couples and from £18k to £15.4k for single people) will make it harder for all boroughs to find affordable private rented accommodation for non-working households. 347 households in Southwark are estimated to be affected as of January 2017.
20. Universal Credit full service (UC) was introduced in Southwark in November 2015 with expansion to cover most Southwark postcodes by November 2016. UC replaces working age means tested benefits and tax credits, including housing benefit. Households placed outside of Southwark in areas where UC has not yet been rolled out can continue to claim Housing Benefit. In 2016/17, the TA rent collection rate for Southwark's UC accounts was 77.6% compared to 91.5% for housing benefits accounts. Consequently, landlords are wary to take on UC households without additional guarantees or incentives.

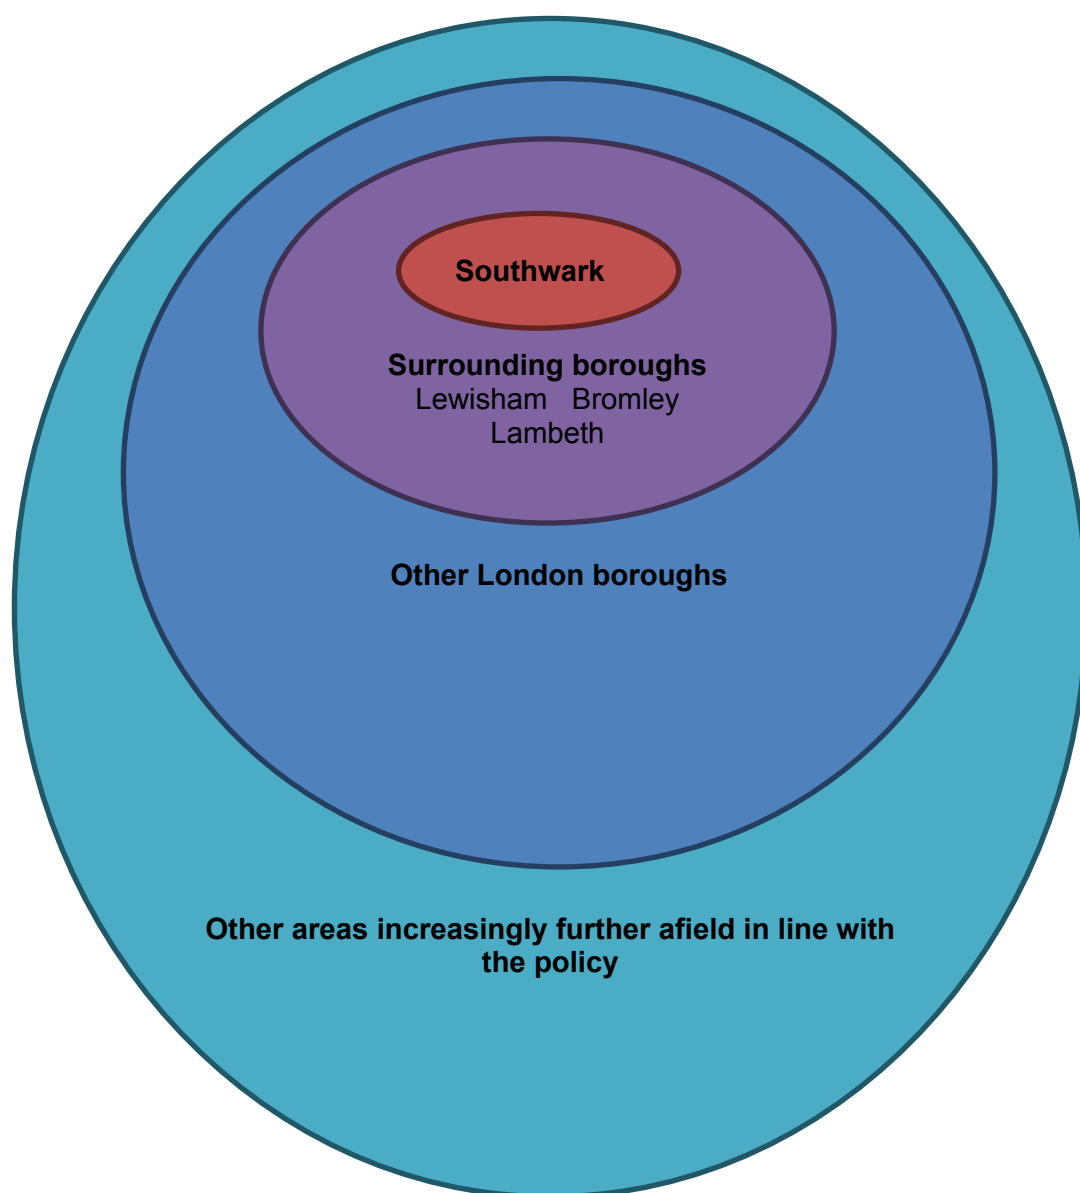

### Section 3: Procurement principles

21. The following principles will apply when procuring properties for both temporary accommodation and private rented sector offers:
- The council will act to ensure it is compliant with all relevant legal obligations and have regard to all relevant legal guidance.

- The properties need to be affordable and sustainable in the longer term to the households that occupy them so they are within benefit levels and temporary accommodation subsidy rates. This will give homeless households the best opportunity to settle in an area and the lowest likelihood of them having to move again.
- The properties we offer to households will be suitable, compliant with health and safety specifications and be in a decent condition.
- The council's first priority will be to secure accommodation in Southwark, where it is not possible to secure good quality affordable accommodation in Southwark the council will next look in surrounding boroughs, then in other London boroughs and then in other areas increasingly further afield. The council will also work to secure accommodation for those households who wish to live outside of this area.
- Regard will be had to the Pan London Agreement on Inter-Borough Accommodation Placements dated 8 March 2011. This aims to ensure that where a borough is placing a household in temporary accommodation they will not offer the landlord more than the receiving borough would.
- Landlords may on occasions be offered incentives above temporary accommodation subsidy rates or LHA levels in order to procure properties to prevent homelessness - and where the practice will help secure longer-term savings. Where these incentives are offered the council will not offer more than the host borough if the properties are outside Southwark.
- The affordability of properties will be a key factor when procuring properties. Properties should be cost neutral to the council and within allowable subsidy rates or benefit levels in order to meet budgetary targets. Over the past two years, temporary accommodation has cost the council £3 - £4m per annum as it has not been possible to procure properties within the subsidy rate.
- Where the council is procuring properties outside Greater London it will, as far as possible, focus on more urban areas whose diversity so far as practicable reflects that of Southwark and so are likely to have more facilities and support networks for people from Southwark with particular protected characteristics. Evidence of the scope and range of employment opportunities will also be taken into account.
- To support delivery against these principles, research was undertaken by the council to better understand where there may be affordable properties. Chart 1 shows the areas that were looked at.

*NOTE: The findings do not mean that properties can/will (or cannot/will not) be procured in these areas at any given point in time, as they only represent rental data at the time the research was carried out and procuring properties depends on a range of factors such as landlords' willingness to enter into agreements with the council and to rent their properties to homeless households. The data is however indicative of where the council should focus its efforts when seeking properties. They support the conclusion that it is unlikely to be reasonably practicable to procure enough private properties to meet need in and around Southwark and that the council will have to look further afield.*

**Chart 1: Private rental markets – areas researched**

## Section 4: Estimating and meeting need

### 22. Temporary accommodation demand and supply

Demand for temporary accommodation comes from new households that are accepted as homeless and households that need to move within temporary accommodation (because they are overcrowded, for example). Homeless demand in the longer term is difficult to predict as it is driven by a complex range of socio and economic factors, including changes to national legislation and policy. A national shortage of truly affordable housing and unaffordable rents in the private sector in and around Southwark remains an important driver. These factors have led to a continued increase in homelessness applications shown in Table 4. 2019-20 indicates that homelessness was plateauing before the impact of Covid-19 which will see applications reach a record close to 4,000.

**Table 4: Homeless applications in Southwark**

| Year    | Homeless approaches    |
|---------|------------------------|
| 2011-12 | 1,013                  |
| 2012-13 | 1,049                  |
| 2013-14 | 1,086                  |
| 2014-15 | 1,822                  |
| 2015-16 | 2,253                  |
| 2016-17 | 2,354                  |
| 2017-18 | 2,607                  |
| 2018-19 | 2,953                  |
| 2019-20 | 2,841                  |
| 2020-21 | 2,884 (as at Dec 2020) |

**Table 5: Demand for social housing and supply in Southwark**

| Financial year | Households in temporary accommodation | Social lets |
|----------------|---------------------------------------|-------------|
| 11/12          | 671                                   | 2,453       |
| 12/13          | 705                                   | 2,385       |
| 13/14          | 772                                   | 2,212       |
| 14/15          | 943                                   | 2,106       |
| 15/16          | 1,341                                 | 1,701       |
| 16/17          | 1,778                                 | 1,176       |
| 17/18          | 2,332                                 | 1,489       |

Source: DCLG P1E statistics and internal records.

23. Based on projected homelessness demand; impact of the impending Homelessness Reduction Act which may see more households in temporary accommodation and possibly for longer periods; natural churn within temporary accommodation as households move into social housing; anticipated lease ends as providers move into different markets; Right to Buy sales in the short term exceeding the Council's commitment to build 11,000 new council homes before 2043, it is estimated that the council needs to have a temporary accommodation portfolio of 3,000 – 3,500 properties until at least 2020/2021. The majority of these units will need to be suitable for families, predominantly with two bedrooms.

24. At the same time, the council has the objective of maintaining zero usage of nightly rate 'B&B style' temporary accommodation for families.

**25. Private rented accommodation for private rented sector offers**

The council is rolling out a policy to offer homeless households private rented tenancies to discharge the council's main housing duty (Appendix 2). This is intended to contain temporary accommodation demand and costs and to help give homeless households more sustainable, long-term housing options and avoiding the uncertainty of long waits for social housing.

**Temporary Accommodation Supply Action Plan**

26. Specific initiatives for procuring both temporary accommodation and private rented sector offers are set out below.

**Table 6: Temporary Accommodation Supply Action Plan**

| Action                                                                                                                                                          | Target Number                                                                                                                                                                      | Timescale                          | Impact                                           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|--------------------------------------------------|
| <b>Temporary accommodation</b>                                                                                                                                  |                                                                                                                                                                                    |                                    |                                                  |
| 1. Work with Resident Services to make the best use of void properties in regeneration areas by using them for temporary accommodation for as long as possible. | Target monthly average number of units available with continued increase in usage of estate voids of 18.5% per year.<br>19/20 – 850<br>20/21 – 990<br>21/22 – 1180<br>22/23 - 1390 | Projections up to March 2023       | Growth in reduced cost TA                        |
| 2. Continue to set aside 50% of one bed council voids for the use as temporary accommodation to reduce reliance on nightly rate accommodation.                  | 10 per month (contributes to target numbers in Action 1)                                                                                                                           | Review in October 2021             | Growth in reduced cost TA                        |
| 3. Convert nightly paid Temporary accommodation into Leasing scheme usage.                                                                                      | 100 per year                                                                                                                                                                       | March 2022<br>Reviewable each year | Growth in reduced cost TA<br><br>Greater pool of |
