Overview and Scrutiny Committee – 8 October 2025

Item 5: Southwark Community Safety Partnership

[Supplementary Information / correction] Presentation: Southwark Community Safety Partnership

Page 5 of the presentation 'What the assessment tells us' refers to increases in hate crime, radicalisation referrals, and serious violence (knife and gun crime). The reference to hate crime and serious violence should be disregarded. (see explanation below).

The majority of data used has been sourced from the Metropolitan Police Service (MPS) Data office. This unpublished data may differ from official MPS figures.

The new police recording and reporting system called CONNECT replaced CRIS in February 2024. This has led to issues with data quality and content affecting the ability to conduct in-depth analysis. This means that for some crime categories for example, Domestic Abuse, Hate Crime and Knife and Gun Crime we are unable to compare 2024/25 data with the previous period. This issue affects every Community Safety Partnership in every London Borough. This is on the advice of the MPS Data Office, as they do not advise comparing pre-CONNECT data set, with post-CONNECT data set.

Further work is being undertaken in partnership with the MPS, Mayor's Office for Policing and Crime and London Councils to address the issues and increase data quality.
