Hi,

I live at [REDACTED] and wish to object to the above TMO on the following grounds.

1. The introduction of pinch points in the road will inevitably lead to an increase in air pollution at peak times caused by stationary or slow moving cars waiting to pass through . This will negate any benefit derived from the recent expansion of the ULEZ.
2. The reduction in parking spaces available to residents, visitors and service and delivery vehicles ( compounded by the siting of a Cycle Hanger o/s 31 Wood Vale and the additional demand that will arise from the housing development at 17/19) will undoubtedly cause problems for residents in neighbouring roads and increase incidents of antisocial and hazardous parking.

Visitors to the Horniman museum and gardens already use the Lordship Lane end of Wood Vale for parking and the proposed changes will only compound the parking problems.

Could you kindly acknowledge receipt of my objection

Kind regards,

[REDACTED]

[REDACTED]
