

Item No.	Classification: Open	Date: 27 October 2022	Decision Taker: Cabinet Member for Health and Wellbeing
Report title:		Winter of Food and Fun 2022 holiday programme grant recommendations	
Ward(s) or groups affected:		All	
From:		Strategic Director of Children's and Adults' Services	

RECOMMENDATIONS

1. That the Cabinet Member for Health and Wellbeing approve the use of £201,608 for 22 providers identified for the Winter of Food and Fun Holiday Programme as part of the Holiday Activities and Food (HAF) programme for 2022. The recommendations are set out in Appendix 1 of the report.
2. That the Cabinet Member approve the use of the remaining £25,000 of the winter grants budget to support providers to make places available for children with Special Educational Needs and Disabilities.

BACKGROUND INFORMATION

3. Since 2018, the Department for Education (DfE) has invested in local programmes that deliver healthy meals and fun activities to disadvantaged children during the summer holidays. In summer 2020, they invested £9 million in 17 local authorities, including the Southwark and Lambeth Summer of Food and Fun which took place across the two boroughs and was facilitated by a partnership between Kitchen Social (a Mayor's Fund for London charity), Southwark Council and Lambeth Council.
4. The Holiday Activity and Food (HAF) programme expanded in 2021 enabling all English local authorities to offer free healthy meals and enriching activities to children between the ages of 4 and 16 years old eligible for benefits-related Free School Meals (FSM) over the Easter, summer and winter holidays. Towards the end of 2021, the DfE confirmed that the HAF programme will continue to be funded for the 2022 – 2024 school holidays.
5. Southwark Council has been allocated £1,522,530 of grant funding from the DfE to cover the cost of coordinating and delivering the HAF programme over Easter, summer and winter school holidays in 2022. The majority of this funding will be directly awarded as grant funding to local

holiday provision providers to deliver the programme. This grant funding will be paid in two instalments. The first instalment of £1,218,024 was received in April 2022 and the second instalment of up to £304,506 will be received in the 2023/2024 financial year, dependent on delivery plans and reports submitted to the Department for Education. This is a similar but slightly lower level of funding than what was allocated to Southwark Council for the 2021 programme. Alongside this funding, £50,000 from the Community Health Ambassador budget has been allocated to the holiday programme to help recruit ambassadors within this programme to share important health promotion and health protection messaging within these communities including how to improve health and wellbeing and to prevent the spread of COVID-19. In total £1,572,530 worth of funding is available for Southwark's 2022 HAF programme.

6. For the Easter and summer 2022 programmes, £1,273,188 was spent to cover the provision of over 43,601 places across both holiday periods. For winter, the HAF team have budgeted £285,058 to cover the provision of 6,952 places across the 2 week holiday period.
7. The programme's objectives are to encourage eligible children to:
 - Eat more healthily
 - Be more active
 - Take part in engaging and enriching activities
 - Be safe and not isolated
 - Have greater knowledge of health and nutrition
 - Be more engaged with school and other services
 - Have greater knowledge and awareness of holiday club provision
8. The Department for Education also requires that:
 - Provision is inclusive and accessible
 - Provision is offered to all FSM children in the local authority
 - Ideally provision is offered four hours a day, four days a week, for four weeks in the Summer and for one week at Easter and Christmas

KEY ISSUES FOR CONSIDERATION

Winter of Food and Fun grants: assessment and funding recommendations

9. The final funding round of the Southwark HAF 2022 programme is for the winter holidays and the application process has been shared widely including amongst the Holiday Provision Network, schools, Ofsted-registered out of school settings and prospective providers who have previously expressed an interest in the programme in order to encourage all eligible organisations to apply.

Criteria

10. The grant criteria are designed to ensure all providers meet the required standards of both Southwark Council and the Department for Education.
11. Organisations applying for winter grant funding are required to meet **all** the following general and specific criteria.

General criteria

- Organisations eligible for funding include registered charities, voluntary, community or faith organisations, companies limited by guarantee, Community Interest Companies, Social enterprises, Schools, and Parent Teacher Friends Associations. All organisations are required to run a not-for-profit HAF programme.
- Based in and/or providing services within the London Borough of Southwark
- Operate from fit for purpose premises and show evidence of ability to adapt services during the COVID-19 pandemic to ensure they continue to meet the needs of their clients
- Have quality assurance measures in place

Specific criteria

- The programme will be free of charge for eligible families
- Providers must include the following in their programmes every day:
 - Food and nutrition skills aimed at improving knowledge and awareness of healthy eating
 - Structured physical activity for at least 60 minutes each day
 - Enriching activities which offer children the opportunities to develop new skills or knowledge or have different experiences
- Hubs must be able to provide at least one meal a day and all food provided, inclusive of snacks, must meet school food standards.
- Providers must be running or linked to an Ofsted-registered child provision if children of 8 years or below are attending (where their parents/carers are not on the premises) for:
 - More than 2 hours per session
 - More than 14 days a year
 - Unless their programme is exempt if the club is registered as an activity-based setting offering no more than two types of activities

Cross-programme criteria

12. The following criteria have been applied when considering applications to ensure the Winter of Food and Fun programme as a whole is inclusive and caters to the level of need in the borough:
 - The winter programme as a whole has sufficient geographical spread across the borough with a focus on areas of higher need in terms of food insecurity and mapped against the Income Deprivation Affecting

- Children Index (IDACI). The geographical spread of applicants was checked using Google Maps to ensure all wards within the borough had adequate holiday provision to minimise cold spots.
- The winter programme as a whole caters to the full age range stipulated by the Department for Education (4-16 year old school children). A particular focus has been placed on 12-16 year olds as previous holiday periods have shown a lack of sufficient provision for and/or engagement with this age group.
 - There is sufficient provision available to support eligible children and young people with Special Educational Needs and Disabilities (SEND) requirements.
 - Delivery is in line with the “gold standard” model as stipulated by the DfE i.e. hubs can deliver provision a minimum of 4 hours a day, 4 days a week for 1 week during the winter holiday period.
13. In order to maximise both the engagement with Southwark residents who are the target beneficiaries of the holiday programme and the attendance of programme participants, the following additional selection criteria were applied:
- Prioritising holiday clubs with evidenced relationships with the target community in the geographical area within Southwark they’re requesting funding to operate from
 - Prioritising Southwark based organisations that identify as Black Asian or ethnic minority led as recommended in the Southwark Stands Together strategy
 - Prioritising established Food and Fun holiday clubs who have consistently engaged fully with Southwark’s holiday programme including engaging with the local community to advertise their programme and maximise attendance, attending provider briefings and being compliant with quality assurance and data collection processes. Parents and communities involved with the programme previously have fed back to the council the importance of continuing to fund established programmes in the same locations where possible to help families access them and children to feel settled quickly, and to enhance cohesion and trust within communities
14. Providers were asked to provide details of the number of days they can operate over the winter period and how many places they can provide per day. This information was then used to calculate how many places on a holiday programme each hub could make available over the winter period.
15. The team have amended the base grant funding levels based on feedback from previous holiday programmes in Southwark, other local authorities, meal suppliers the team have worked with, the underspend from Easter and summer and the budget available for winter. Due to the cost of living crisis, the base grant funding level has been set to £29 per child per day, which is an increase of £7 from the summer programme. This £29 covers a variety of costs associated with the programme including resources for enriching activities, equipment for physical activities, staffing and

administrative costs, nutritional education and healthy meals for participants.

16. The applications received for the winter programme are summarised in the table below:

Total number of applications	31 providers for 46 holiday programmes
Applications that meet the criteria and have been recommended for funding	35
Applications that have not been recommended for funding	11
Hubs that are able to provide SEND provision	23
Approximate total number of individual children who will be supported over winter as estimated by holiday club providers	2,135
Total number of holiday club places for children over winter being recommend	6,952
Total amount of grant funding allocated	£226,608

17. Officers have assessed applications based on the criteria stipulated in paragraphs 10 – 13. Applications need to meet all the required general and specific criteria to be considered for funding. Applications were then assessed as a group to ensure cross-programme criteria were also satisfied. Providers were asked to provide details of the number of days they can operate over the winter period and how many places they can provide per day. This information was then used to calculate how many places on a holiday programme each hub could make available over the winter period.

18. Due to the number of applications received, the council are unable to fund all places applied for. To ensure the allocation of funding amongst eligible organisations was fair, the following rules were applied to the organisations that applied for funding:
- i. All individual programmes were recommended funding for a maximum of 4 days over the 2 week holiday period as stipulated by the DfE as the “gold standard” model of HAF provision;
 - ii. All individual programmes were capped at 200 places per day per location;
 - iii. Programmes from new providers and/or new locations were capped at a maximum of 50 places per day as experience from previous programme cycles has shown it can be a challenge for providers new to the holiday programme to reach their projected numbers;
 - iv. Programmes that have previously taken part in Southwark’s Food and Fun programme were capped to the number of participants per day that attended previously as evidenced in the monitoring and attendance data from previous programme cycles;
 - v. Holiday clubs with evidenced relationships with the target community in the geographical area within Southwark they plan to operate from were prioritised; and
 - vi. Returning applicants that have consistently complied with the data collection requirements of the programme and have reached their projected attendance in previous programme cycles were prioritised.
19. Based on the feedback received from holiday clubs during previous programme cycles, it was important to increase the minimum base funding level to £29 per child per day in order to help providers run a cost-effective programme bearing in mind the cost of living crisis. Applying the above cut offs and rules enables the council to fund as many eligible providers as possible for up to 4 days of provision, which maximises the number of individual eligible beneficiaries the programme can reach over the winter period.
20. The attached recommended allocations in appendix 1 recommend that 22 applicants are awarded funding because they have met the required criteria, funding these providers enables us to best meet the cross-programme criteria, and the total amount of grant allocation falls within the total allocated budget for winter.
21. Grant funding allocations for each organisation are based on the following information provided in the application form:

- a. Number of days their holiday programme will be running over winter; and
 - b. Number of children that providers stipulated they could provide provision for per day.
22. Applications were received from 11 other holiday programmes. For a number of reasons, they were not recommended for funding. These reasons include:
 - i. Non-compliance with the data collection requirements of the programme during previous programme cycles;
 - ii. Issues with providers previously double funding children;
 - iii. Data collected from previous programme cycles showing low attendance figures without providers evidencing their outreach to the target beneficiaries of the programme;
 - iv. Not funding new providers geographically close to established Food and Fun programmes that offer almost identical programmes in order to prevent competition between Southwark's Food and Fun holiday clubs;
 - v. An ongoing investigation into an organisation due to a complaint about their previous provision. It's not appropriate to recommend this club for funding before this investigation concludes; and
 - vi. Applications not being received by the required deadline.
23. The council will not fund organisations that are not compliant with the requirements of the Food and Fun holiday programme including data collection and actively engaging with the target beneficiaries of the programme to reach expected attendance figures.
24. Providers will be responsible for ensuring they deliver a COVID-secure holiday programme dependent on the COVID-19 government restrictions and guidance for the winter holidays, including following recommendations for considering group sizes in their settings.
25. The Public Health division will support providers to ensure their COVID-19 risk assessments are accurate and up to date, and that the relevant guidance is adhered to.
26. 14 providers across 23 programmes have confirmed that they can make places available for children with SEND needs. The holiday programme team have allocated the remaining grants budget for winter (£25,000) to provide additional funding for those who provide places for children with SEND needs, which is a similar amount of the budget allocated for SEND provision over winter 2021. During previous holiday periods, some

providers were unable to accept children onto their programmes due to last minute requests from parents and the lack of SEND funding available at the time. This budget will be awarded based on programme registration and attendance data and evidence of SEND-specific expenditure. This will be an addition to the base grant funding awarded per child. 50% of the SEND grant will be paid before the holiday period and 50% will be paid afterwards following the submission of evidence of SEND-specific expenditure. This funding will be used to support SEND children to access the programme by enabling providers to pay for support workers and specialist equipment. The HAF team will verify the details of children eligible for additional SEND funding with the relevant team in Southwark Council.

27. The 22 providers and 35 programmes recommended for funding are well distributed across the borough according to areas of high need and cater to all eligible age groups.
28. Full details of the recommended allocations for grant funding can be found in appendix 1.
29. To ensure the programme meets the Department for Education standards, Southwark Council will also be directly procuring the following:
 - I. [Take and Make Boxes](#) through Kitchen Social, distributed to children each week. These are healthy recipe-kit boxes that support families to cook nutritious meals together at home, supported with physical recipe cards and online videos. The budget for this is £21,600; and
 - II. Deliveries of fresh fruit from an East Street Market trader to support our providers in offering healthy snacks as part of their programmes. The budget for this is £3,500.

Conditions of Grant Funding

30. Organisations awarded grant funding are subject to monitoring through the council's Conditions of Grant Funding (COGF). Schedules to these cover the key areas of: governance and employment; finance; employment practices and monitoring and information. In addition to a requirement to comply with these conditions, organisations are subject to an annual monitoring visit, and the monitoring framework includes a monitoring checklist, which assesses each of the areas covered within the COGF as well as service delivery.

31. Where any significant issues are identified during monitoring which could give rise to a breach in the COGF, the council will write to the relevant organisation and set out what action needs to be taken. In such cases they will be advised that the funding continuation is subject to their taking the necessary remedial action to address concerns. Failure to do so may result in the council taking the appropriate action to terminate the funding by way of a further report.

Policy framework implications

32. The Food and Fun holiday programme directly contributes to Southwark Council's Fairer Future Commitments of tackling health inequalities and ensuring all children have the best start in life by providing children who are eligible for benefits-related free school meals with nutritious meals and a safe and enriching environment during the school holidays¹.

Community, equalities (including socio-economic) and health impacts

Community impact statement

33. The Food and Fun holiday programme intends to provide targeted support to children, young people and families vulnerable to food insecurity to access nutritious food and enriching activities over the school holidays in 2022.
34. The 2019 Survey for Londoners highlighted the stark issue of food insecurity in Southwark. 23.5% of people over 16 years and 25.8% of children surveyed were food insecure, equating to approximately 75,000 of residents over 16 years and over 15,000 Southwark children². Food insecurity for both adults and children is worse in Southwark than the London average (21% for adults and 17.5% for children)².
35. In 2019, there were clear inequalities that existed within those struggling with food insecurity in Southwark. People of Black ethnicities, people living in social housing, families with dependent children, unemployed or low paid adults, and those in debt were identified as priority groups more vulnerable to food insecurity².
36. The pandemic has further exacerbated the issue of food insecurity across the country. The Food Foundation's survey series on the impact of coronavirus on children's food has continually demonstrated that families with children have suffered significantly. Their most recent data published in March 2021 highlighted that 41% of households with children on free school meals reported experiencing food insecurity in the last 6 months, equating to four million people including 2.3 million children³. Black and

¹ [Southwark Council. 2020. Southwark's Borough Plan 2020-2022. Council Plan Refresh.](#)

² [Southwark Council. 2021. Household Food Insecurity, Southwark's JSNA.](#)

³ [Food Foundation. 2021. The Impact of Covid-19 on Household Food Security.](#)

mixed ethnicity households with children continue to experience higher levels of food insecurity than their white counterparts³.

37. The school holidays can be a pressure point for some families because of increased costs (such as food and childcare) and reduced household incomes. For some children, this can lead to a holiday experience gap – with children from low income families less likely to access organised out-of-school activities; more likely to experience ‘unhealthy holidays’ in terms of nutrition and physical health; and more likely to experience social isolation. COVID-19 is likely to have increased the need for this provision, with more families experiencing reduced household incomes and increased food insecurity.
38. The Food and Fun programme intends to benefit a cohort of Southwark’s most vulnerable children and young people, contributing to the reduction of health inequalities over the long term. A joint Equalities and Health Impact Assessment was completed earlier this year for the programme and can be found in appendix 2. This assessment demonstrates that the holiday programme shows no potential for discrimination and the holiday programme team have taken all appropriate opportunities to advance equality of opportunity and foster good relations between people with different protected characteristics.

Equalities (including socio-economic) impact statement

39. The joint Equalities and Health Impact Assessment found in appendix 2 was undertaken in order to assess the need for the provision to be delivered as part of the Food and Fun holiday programme and the cohort of children and families who would be most likely to benefit from it. The holiday programme is anticipated to have positive impacts for all children, young people and families that it reaches.
40. Despite the programme being universally advertised to all children eligible for benefits-related free school meals, as illustrated in the joint Equalities and Health Impact Assessment, particular groups are more likely to experience food insecurity and health inequalities than others. For example, children and young people with Special Educational Needs and Disability (SEND) needs are more likely to be eligible for free school meals and thus be at a greater risk of food insecurity than other students. Alongside this, in 2019 a higher proportion of black residents were vulnerable to food insecurity compared to white residents.
41. The Food and Fun programme specifically targets families vulnerable to food insecurity in Southwark through recruiting hubs across the borough with a focus on areas with higher levels of deprivation as well as programmes that deliver SEND provision across eligible age groups. These areas of high socio-economic disadvantage also have a higher concentration of black residents. It’s anticipated that the programme will continue to have a positive impact on this community as evidence suggests a higher proportion of children and young people of black

ethnicity will be eligible for the programme and the programme locations have been mapped to ensure they're in areas of high deprivation. The Holiday Programme team works with the wider Public Health team to advertise the programme directly to asylum seeker and refugee families based in temporary accommodation who may not otherwise be reached by this programme.

42. To ensure the holiday programme is an attractive offer to the diversity of prospective participants, a variety of holiday clubs have been recommended for funding including sports programmes, religious groups and camps offering dance, arts and crafts. All holiday clubs are supported to serve food that is culturally varied and takes into consideration religious preferences.

Health impact statement

43. As described in the joint Equalities and Health Impact Assessment, the Food and Fun holiday programme is anticipated to have positive health impacts for all children, young people and families that it reaches. Providing nutrition education to participants and their families and recipe boxes to every child that attends the programme helps improve the food security of Southwark residents by supplying a meal for 4 people per box to be enjoyed at home. The recipes in these boxes are healthy, low cost and simple to make to encourage families to cook healthy meals easily beyond the scope of the programme which will ultimately improve their health and wellbeing.

Climate change implications

44. To reduce the impact the delivery of the programme has on the environment and climate change, the Take and Make recipe boxes and fresh fruit will be delivered in bulk to the holiday clubs rather than across multiple days. The Holiday Programme team will be looking to ensure that delivery vehicles used to deliver any food to the holiday hubs are low or zero emission.
45. The Take and Make Recipe Boxes contain exclusively vegetarian recipes, which supports the children and families attending the Food and Fun holiday programme to learn to cook, taste and enjoy meat-free meals. Holiday clubs cooking their own meals for the programme are also trained on how to create a more environmentally sustainable menu with more plant-based options. This is likely to contribute to a shift in mind-sets around vegetarian and vegan meals, which may encourage families to eat meat-free options more often. This has benefits for sustainability as meat consumption contributes significantly to the climate emergency.
46. During the 2021 holiday programme, Kitchen Social (the Take and Make recipe box supplier) incorporated education around sustainability into the recipe videos and added information about sustainability into their recipe cards including information on increasing specific food groups to make a meal more planet-friendly and tips on how to reduce food waste. This

helps encourage conversations around eating an environmentally sustainable diet which ties into the training new and existing holiday clubs receive about adjusting the food served during the programme to benefit the environment.

Resource implications

47. Public Health staff have been managing the grants programme, with the support of a HAF Programme Consultant.
48. Please see financial implications section for impact on financial resources.

Legal implications

49. Please see the concurrent report from the Director of Law and Governance from paragraph 58.

Financial implications

50. Southwark Council has been allocated £1,522,530 of grant funding from the DfE to cover the cost of coordinating and delivering the HAF programme over Easter, summer and winter school holidays in 2022. The majority of this funding will be directly awarded as grant funding to local holiday provision providers to deliver the programme. This grant funding will be paid in two instalments. The first instalment of £1,218,024 was received in April 2022 and the second instalment of up to £304,506 will be received in the 2023/2024 financial year, dependent on delivery plans and reports submitted to the Department for Education. This is a similar but slightly lower level of funding than what was allocated to Southwark Council for the 2021 programme. Alongside this, £50,000 from the Community Health Ambassador budget as mentioned in paragraph 5.
51. The total budget available for Southwark's 2022 HAF programme is £1,572,530. Having spent £1,273,188 on Easter and summer provision, the remaining budget for the winter period is £299,342. £226,608 of this is being made available for winter grants including funding for SEND provision. £21,600 has been budgeted to procure Take and Make boxes and £3,500 has been budgeted to procure fresh fruit, which will be provided to children who attend the programme each week. A maximum of £18,350 has been allocated for coordination, contingency planning and promotion costs and £15,000 has been allocated to fund a culture and wellbeing offer where holiday providers will access free tickets from local cultural organisations across the borough to enhance their programmes. The holiday programme team are researching the cost of supplying families attending the programme an extra care package of food and household essentials to further support them through the cost of living crisis. This will come out of the remaining £14,284 available from the budget.

52. The recommended total base grant funding amount is £201,608. This comes within budget and leaves up to £25,000 available to be allocated across the hubs who make provision available for children with SEND needs. Allocations for SEND will be dependent on holiday clubs providing registration and attendance data and evidence of SEND-specific expenditure, with these details being cross-checked and verified by Southwark Council.

Consultation

53. Continuously throughout Southwark's Food and Fun programme which began in Summer 2020, the HAF team have engaged with various stakeholders to understand their experience of the holiday programme and to identify areas for improvement for the future.
54. Stakeholders consulted included holiday club providers, pre-prepared meals suppliers, children and families, the holiday provision coordinators, other local authorities running HAF programmes and the Southwark Holiday Provision Network, which comprises of both providers and staff from relevant council departments who are involved in supporting holiday provision.
55. Feedback and insights gained from previous programmes have directly influenced planning for the 2022 programme.
56. The Holiday Provision Network continues to meet and will be consulted throughout the 2022 programme.
57. In 2021, the Holiday Activities and Food (HAF) Programme Steering Group was set up involving Councillor Evelyn Akoto, Councillor Jasmine Ali and representatives from Public Health, Education, Children's services, Youth services, Leisure and Communications. Funded holiday providers are also invited to share the impact of this programme on their communities and the challenges faced by their organisations and service users so that the programme team can be receptive to these needs when planning future holiday cycles. The group will continue to meet in 2022 to be regularly consulted about the programme and to provide oversight for the 2023 programme.

SUPPLEMENTARY ADVICE FROM OTHER OFFICERS

Director of Law and Governance

58. This report seeks approval to allocate funding to 22 providers identified for the Winter of Food and Fun Holiday Programme as part of the Holiday Activities and Food (HAF) programme for 2022. The funding has been allocated by the Department for Education (DfE) and is to be made available for winter grants, including funding for SEND provision.

59. The report notes from paragraphs 10 to 13 the DfE and council criteria that applicant organisations are required to satisfy and the factors that have been taken into account in order to ensure that the local allocation is fair and reasonable, both in its inclusivity and geographical reach. The report also confirms that a robust and transparent process for inviting and evaluating applications for funding has been followed and that this has been informed both by a consultation exercise and by the joint Equalities and Health Impact Assessment which has been undertaken in order to assess the need for the provision to be delivered in this programme and the cohort of children and families who would be most likely to benefit from the programme.
60. The report also notes that recipients of the grant awards will be required to observe and comply with the council's conditions of grant funding and will be monitored in order to ensure appropriate service delivery and value.
61. The decision to approve the recommendations in this report is one which is expressly reserved to the Cabinet Member under Part 3D of the council Constitution.

Strategic Director of Finance and Governance REF: [27AS2022-23]

62. The Strategic Director of Finance and Governance notes the recommendations of the report to allocate £201,608 for the Winter of Food and Fun Holiday Programme as part of the Holiday Activities and Food (HAF) programme among 22 organisations according to the criteria outlined in paragraphs 10-14. In addition to this, £25,000 will be spent on providing additional funding for those who provide places for children with SEND needs, an amount similar to the budget allocated for SEND provision over winter 2021.
63. These allocations will be funded from the £1,522,530 allocation received by the council for the HAF programme for 2022 by the Department for Education, as detailed in paragraph 54, as well as £50,000 from the Community Health Ambassador budget. These together make up a total HAF programme budget of £1,572,530 for 2022.
64. These allocations will be subject to the council's Conditions of Grant Funding as detailed in paragraph 34 and will be monitored to ensure value for money and appropriate service delivery. Breaches of these conditions will be treated according to the course of action outlined in paragraph 35.
