BCF Planning Template 2023-25

1. Guidance

Overview

Note on entering information into this template

Throughout the template, cells which are open for input have a yellow background and those that are pre-populated have a blue background, as below:

Data needs inputting in the cell

Pre-populated cells

2. Cover

- 1. The cover sheet provides essential information on the area for which the template is being completed, contacts and sign off.
- 2. Question completion tracks the number of questions that have been completed; when all the questions in each section of the template have been completed the cell will turn green. Only when all cells are green should the template be sent to the Better Care Fund Team: england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).
- 3. The checklist helps identify the sheets that have not been completed. All fields that appear highlighted in red with the word 'no', should be completed before sending to the Better Care Fund Team.
- 4. The checker column, which can be found on each individual sheet, updates automatically as questions are completed. It will appear 'Red' and contain the word 'No' if the information has not been completed. Once completed the checker column will change to 'Green' and contain the word 'Yes'.
- 5. The 'sheet completed' cell will update when all 'checker' values for the sheet are green containing the word 'Yes'.
- 6. Once the checker column contains all cells marked 'Yes' the 'Incomplete Template' cell (below the title) will change to 'Template
- 7. Please ensure that all boxes on the checklist are green before submission.
- 8. Sign off HWB sign off will be subject to your own governance arrangements which may include delegated authority.

4. Capacity and Demand

Please see the guidance on the Capacity&Demand tab for further information on how to complete this section.

5. Income

- 1. This sheet should be used to specify all funding contributions to the Health and Wellbeing Board's (HWB) Better Care Fund (BCF) plan and pooled budget for 2023-25. It will be pre-populated with the minimum NHS contributions to the BCF, iBCF grant allocations and allocations of ASC Discharge Fund grant to local authorities for 2023-24. The iBCF grant in 2024-25 is expected to remain at the same value nationally as in 2023-24, but local allocations are not published. You should enter the 2023-24 value into the income field for the iBCF in 2024-25 and agree provisional plans for its use as part of your BCF plan
- 2. The grant determination for the Disabled Facilities Grant (DFG) for 2023-24 will be issued in May. Allocations have not been published so are not pre populated in the template. You will need to manually enter these allocations. Further advice will be provided by the BCF
- 3. Areas will need to input the amount of ASC Discharge Fund paid to ICBs that will be allocated to the HWB's BCF pool. These will be checked against a separate ICB return to ensure they reconcile. Allocations of the ASC discharge funding grant to local authority will need to be inputted manually for Year 2 as allocations at local level are not confirmed. Areas should input an expected allocation based on the published national allocation (£500m in 2024-25, increased from £300m in 2023-24) and agree provisional plans for 2024-25 based on this.
- 4. Please select whether any additional contributions to the BCF pool are being made from local authorities or ICBs and enter the amounts in the fields highlighted in 'yellow'. These will appear as funding sources in sheet 5a when you planning expenditure.
- 5. Please use the comment boxes alongside to add any specific detail around this additional contribution.
- 6. If you are pooling any funding carried over from 2022-23 (i.e. underspends from BCF mandatory contributions) you should show these as additional contributions, but on a separate line to any other additional contributions. Use the comments field to identify that these are underspends that have been rolled forward. All allocations are rounded to the nearest pound.
- 7. Allocations of the NHS minimum contribution are shown as allocations from each ICB to the HWB area in question. Where more than one ICB contributes to the area's BCF plan, the minimum contribution from each ICB to the local BCF plan will be displayed.
- 8. For any questions regarding the BCF funding allocations, please contact england.bettercarefundteam@nhs.net (please also copy in your Better Care Manager).

6. Expenditure

This sheet should be used to set out the detail of schemes that are funded via the BCF plan for the HWB, including amounts, units, type of activity and funding source. This information is then aggregated and used to analyse the BCF plans nationally and sets the basis for future reporting.

The information in the sheet is also used to calculate total contributions under National Condition 4 and is used by assurers to ensure that these are met.

The table is set out to capture a range of information about how schemes are being funded and the types of services they are providing. There may be scenarios when several lines need to be completed in order to fully describe a single scheme or where a scheme is funded by multiple funding streams (eg: iBCF and NHS minimum). In this case please use a consistent scheme ID for each line to ensure integrity of aggregating and analysing schemes.

On this sheet please enter the following information:

- 1. Scheme ID:
- This field only permits numbers. Please enter a number to represent the Scheme ID for the scheme being entered. Please enter the same Scheme ID in this column for any schemes that are described across multiple rows.
- Scheme Name:
- This is a free text field to aid identification during the planning process. Please use the scheme name consistently if the scheme is described across multiple lines in line with the scheme ID described above.
- 3. Brief Description of Scheme
- This is a free text field to include a brief headline description of the scheme being planned. The information in this field assists assurers in understanding how funding in the local BCF plan is supporting the objectives of the fund nationally and aims in your local plan.
- 4. Scheme Type and Sub Type:
- Please select the Scheme Type from the drop-down list that best represents the type of scheme being planned. A description of each scheme is available in tab 6b.
- Where the Scheme Types has further options to choose from, the Sub Type column alongside will be editable and turn "yellow". Please select the Sub Type from the drop down list that best describes the scheme being planned.
- Please note that the drop down list has a scroll bar to scroll through the list and all the options may not appear in one view.
- If the scheme is not adequately described by the available options, please choose 'Other' and add a free field description for the scheme type in the column alongside. Please try to use pre-populated scheme types and sub types where possible, as this data is important in assurance and to our understanding of how BCF funding is being used nationally.
- The template includes a field that will inform you when more than 5% of mandatory spend is classed as other.
- 5. Expected outputs
- You will need to set out the expected number of outputs you expect to be delivered in 2023-24 and 2024-25 for some scheme types. If you select a relevant scheme type, the 'expected outputs' column will unlock and the unit column will pre populate with the unit for that scheme type.
- You will not be able to change the unit and should use an estimate where necessary. The outputs field will only accept numeric characters.

You do not need to fill out these columns for certain scheme types. Where this is the case, the cells will turn blue and the column will remain empty.

6. Area of Spend:

- Please select the area of spend from the drop-down list by considering the area of the health and social care system which is most supported by investing in the scheme.
- Please note that where 'Social Care' is selected and the source of funding is "NHS minimum" then the planned spend would count towards eligible expenditure on social care under National Condition 4.
- If the scheme is not adequately described by the available options, please choose 'Other' and add a free field description for the scheme type in the column alongside.
- We encourage areas to try to use the standard scheme types where possible.

7. Commissioner:

- Identify the commissioning body for the scheme based on who is responsible for commissioning the scheme from the provider.
- Please note this field is utilised in the calculations for meeting National Condition 3. Any spend that is from the funding source 'NHS minimum contribution', is commissioned by the ICB, and where the spend area is not 'acute care', will contribute to the total spend on NHS commissioned out of hospital services under National Condition 4. This will include expenditure that is ICB commissioned and classed as 'social care'.
- If the scheme is commissioned jointly, please select 'Joint'. Please estimate the proportion of the scheme being commissioned by the local authority and NHS and enter the respective percentages on the two columns 8. Provider:
- Please select the type of provider commissioned to provide the scheme from the drop-down list.
- If the scheme is being provided by multiple providers, please split the scheme across multiple lines.

- 9. Source of Funding:
- Based on the funding sources for the BCF pool for the HWB, please select the source of funding for the scheme from the drop down list. This includes additional, voluntarily pooled contributions from either the ICB or Local authority
- If a scheme is funded from multiple sources of funding, please split the scheme across multiple lines, reflecting the financial contribution from each.
- 10. Expenditure (£) 2023-24 & 2024-25:
- Please enter the planned spend for the scheme (or the scheme line, if the scheme is expressed across multiple lines)
- 11. New/Existing Scheme
- Please indicate whether the planned scheme is a new scheme for this year or an existing scheme being carried forward.
- 12. Percentage of overall spend. This new requirement asks for the percentage of overall spend in the HWB on that scheme type. This is a new collection for 2023-25. This information will help better identify and articulate the contribution of BCF funding to delivering capacity.

You should estimate the overall spend on the activity type in question across the system (both local authority and ICB commissioned where both organisations commission this type of service). Where the total spend in the system is not clear, you should include an estimate. The figure will not be subject to assurance. This estimate should be based on expected spend in that category in the BCF over both years of the programme divided by both years total spend in that same category in the system.

7. Metrics

This sheet should be used to set out the HWB's ambitions (i.e. numerical trajectories) and performance plans for each of the BCF metrics in 2023-25. The BCF policy requires trajectories and plans agreed for the fund's metrics. Systems should review current performance and set realistic, but stretching ambitions for 2023-24.

A data pack showing more up to date breakdowns of data for the discharge to usual place of residence and unplanned admissions for ambulatory care sensitive conditions is available on the Better Care Exchange.

For each metric, areas should include narratives that describe:

- a rationale for the ambition set, based on current and recent data, planned activity and expected demand
- the local plan for improving performance on this metric and meeting the ambitions through the year. This should include changes to commissioned services, joint working and how BCF funded services will support this.
- 1. Unplanned admissions for chronic ambulatory care sensitive conditions:
- This section requires the area to input indirectly standardised rate (ISR) of admissions per 100,000 population by quarter in 2023-24. This will be based on NHS Outcomes Framework indicator 2.3i but using latest available population data.
- The indicator value is calculated using the indirectly standardised rate of admission per 100,000, standardised by age and gender to the national figures in reference year 2011. This is calculated by working out the SAR (observed admission/expected admissions*100) and multiplying by the crude rate for the reference year. The expected value is the observed rate during the reference year multiplied by the population of the breakdown of the year in question.
- The population data used is the latest available at the time of writing (2021)
- Actual performance for each quarter of 2022-23 are pre-populated in the template and will display once the local authority has been selected in the drop down box on the Cover sheet.
- Please use the ISR Tool published on the BCX where you can input your assumptions and simply copy the output ISR: https://future.nhs.uk/bettercareexchange/view?objectId=143133861
- Technical definitions for the guidance can be found here:

https://digital.nhs.uk/data-and-information/publications/statistical/nhs-outcomes-framework/march-2022/domain-2---enhancing-quality-of-life-for-people-with-long-term-conditions-nof/2.3.i-unplanned-hospitalisation-for-chronic-ambulatory-care-sensitive-conditions

2. Falls

- This is a new metric for the BCF and areas should agree ambitions for reducing the rate of emergency admissions to hospital for people aged 65 or over following a fall.
- This is a measure in the Public Health Outcome Framework.
- This requires input for an Indicator value which is directly age standardised rate per 100,000. Emergency hospital admissions due to falls in people aged 65 and over.
- Please enter provisional outturns for 2022-23 based on local data for admissions for falls from April 2022-March 2023.
- For 2023-24 input planned levels of emergency admissions
- In both cases this should consist of:
 - emergency admissions due to falls for the year for people aged 65 and over (count)
 - estimated local population (people aged 65 and over)
 - rate per 100,000 (indicator value) (Count/population x 100,000)
- The latest available data is for 2021-22 which will be refreshed around Q4.

Further information about this measure and methodolgy used can be found here:

https://fingertips.phe.org.uk/profile/public-health-outcomes-

framework/data#page/6/gid/1000042/pat/6/par/E12000004/ati/102/are/E06000015/iid/22401/age/27/sex/4

- 3. Discharge to normal place of residence.
- Areas should agree ambitions for the percentage of people who are discharged to their normal place of residence following an inpatient stay. In 2022-23, areas were asked to set a planned percentage of discharge to the person's usual place of residence for the year as a whole. In 2023-24 areas should agree a rate for each quarter.
- The ambition should be set for the health and wellbeing board area. The data for this metric is obtained from the Secondary Uses Service (SUS) database and is collected at hospital trust. A breakdown of data from SUS by local authority of residence has been made available on the Better Care Exchange to assist areas to set ambitions.
- Ambitions should be set as the percentage of all discharges where the destination of discharge is the person's usual place of residence.
- Actual performance for each quarter of 2022-23 are pre-populated in the template and will display once the local authority has been selected in the drop down box on the Cover sheet.

4. Residential Admissions:

- This section requires inputting the expected numerator of the measure only.
- Please enter the planned number of council-supported older people (aged 65 and over) whose long-term support needs will be met by a change of setting to residential and nursing care during the year (excluding transfers between residential and nursing care)
- Column H asks for an estimated actual performance against this metric in 2022-23. Data for this metric is not published until October, but local authorities will collect and submit this data as part of their salt returns in July. You should use this data to populate the estimated data in column H.
- The prepopulated denominator of the measure is the size of the older people population in the area (aged 65 and over) taken from Office for National Statistics (ONS) subnational population projections.
- The annual rate is then calculated and populated based on the entered information.

5. Reablement:

- This section requires inputting the information for the numerator and denominator of the measure.
- Please enter the planned denominator figure, which is the planned number of older people discharged from hospital to their own home for rehabilitation (or from hospital to a residential or nursing care home or extra care housing for rehabilitation, with a clear intention that they will move on/back to their own home).
- Please then enter the planned numerator figure, which is the expected number of older people discharged from hospital to their own home for rehabilitation (from within the denominator) that will still be at home 91 days after discharge.
- Column H asks for an estimated actual performance against this metric in 2022-23. Data for this metric is not published until October, but local authorities will collect and submit this data as part of their salt returns in July. You should use this data to populate the estimated data in column H.
- The annual proportion (%) Reablement measure will then be calculated and populated based on this information.

8. Planning Requirements

This sheet requires the Health and Wellbeing Board to confirm whether the National Conditions and other Planning Requirements detailed in the BCF Policy Framework and the BCF Planning Requirements document are met. Please refer to the BCF Policy Framework and BCF Planning Requirements documents for 2023-2025 for further details.

The sheet also sets out where evidence for each Key Line of Enquiry (KLOE) will be taken from.

The KLOEs underpinning the Planning Requirements are also provided for reference as they will be utilised to assure plans by the regional assurance panel.

- 1. For each Planning Requirement please select 'Yes' or 'No' to confirm whether the requirement is met for the BCF Plan.
- 2. Where the confirmation selected is 'No', please use the comments boxes to include the actions in place towards meeting the requirement and the target timeframes.

2. Cover

Version 1.1.3

- Please Note:

 The BCF planning template is categorised as 'Management information' and data from them will published in an aggregated form on the NHSE website and gov.uk. This will include any narrative section. Also a reminder that as is usually the case with public body information, all BCF information collected here is subject to Freedom of Information requests.

 All social level is for the HWB to devide what information in reducts to publish as part of wider local government reporting and transparency requirements. Until BCF information is published, recipients of BCF reporting information (including recipients who access any information placed on the BCE) are prohibited from making this information available on any public domain or providing this information for the purposes of journalism or research without prior consent from the HWB (where it concerns a single HWB) or the BCF national partners for the aggregated information.

 All information will be supplied to BCF partners to inform policy development.

 This template is password protected to ensure data integrity and accurate aggregation of collected information. A resubmission may be required if this is breached.

Better Care Fund 2023-24 Capacity & Demand Template

3. Capacity & Demand

Selected Health and Wellbeing Board:

Southwark

Guidance on completing this sheet is set out below, but should be read in conjunction with the guidance in the BCF planning requirements

3.1 Demand - Hospital Discharge

This section requires the Health & Wellbeing Board to record expected monthly demand for supported discharge by discharge pathway.

Data can be entered for individual hospital trusts that care for inpatients from the area. Multiple Trusts can be selected from the drop down list in column F. You will then be able to enter the number of expected discharges from each trust by Pathway for each month. The template aligns tothe pathways in the hospital discharge policy, but separates Pathway 1 (discharge home with new or additional support) into separate estimates of reablement, rehabilitation and short term domiciliary care)

If there are any trusts taking a small percentage of local residents who are admitted to hospital, then please consider aggregating these trusts under a single line using the 'Other' Trust option

The table at the top of the screen will display total expected demand for the area by discharge pathway and by month.

Estimated levels of discharge should draw on:

- Estimated numbers of discharges by pathway at ICB level from NHS plans for 2023-24
- Data from the NHSE Discharge Pathways Model.

Management information from discharge hubs and local authority data on requests for care and assessment.

You should enter the estimated number of discharges requiring each type of support for each month.

This section collects expected demand for intermediate care services from community sources, such as multi-disciplinary teams, single points of access or 111. The template does not collect referrals by source, and you should input an overall estimate each month for the number of people requiring intermediate care or short term care (non-discharge) each month, split by different type of intermediate care.

Further detail on definitions is provided in Appendix 2 of the Planning Requirements.

The units can simply be the number of referrals.

3.3 Capacity - Hospital Discharge

his section collects expected capacity for services to support people being discharged from acute hospital. You should input the expected available capacity to support discharge across these different service types:

- Social support (including VCS)
- Reablement at Home Rehabilitation at home
- Short term domiciliary care
- Reablement in a bedded setting
- Rehabilitation in a bedded setting
- Short-term residential/nursing care for someone likely to require a longer-term care home placement

Please consider the below factors in determining the capacity calculation. Typically this will be (Caseload*days in month*max occupancy percentage)/average duration of service or length of stay

Caseload (No. of people who can be looked after at any given time)

Average stay (days) - The average length of time that a service is provided to people, or average length of stay in a bedded facility

Please consider using median or mode for LoS where there are significant outliers

Peak Occupancy (percentage) - What was the highest levels of occupany expressed as a percentage? This will usually apply to residential units, rather than care in a person's own home. For services in a person's own home then this would need to take into account how many people, on average, that can be provided with services.

At the end of each row, you should enter estimates for the percentage of the service in question that is commissioned by the local authority, the ICB and jointly.

This section collects expected capacity for community services. You should input the expected available capacity across the different service types.

You should include expected available capacity across these service types for eligible referrals from community sources. This should cover all service intermediate care services to support recovery, including Urgent Community Response and VCS support. The template is split into 7 types of service

- Social support (including VCS)
- Urgent Community Response
- Reablement at home
- Rehabilitation at home
- Other short-term social care
- Reablement in a bedded setting
- Rehabilitation in a bedded setting

Please consider the below factors in determining the capacity calculation. Typically this will be (Caseload*days in month*max occupancy percentage)/average duration of service or length of stay

Caseload (No. of people who can be looked after at any given time)

Average stay (days) - The average length of time that a service is provided to people, or average length of stay in a bedded facility

Please consider using median or mode for LoS where there are significant outliers

Peak Occupancy (percentage) - What was the highest levels of occupany expressed as a percentage? This will usually apply to residential units, rather than care in a person's own home. For services in a person's own home then this would need to take into account how many people, on average, that can be provided with services.

At the end of each row, you should enter estimates for the percentage of the service in question that is commissioned by the local authority, the ICB and jointly,

Virtual wards should not form part of capacity and demand plans because they represent acute, rather than intermediate, care. Where recording a virtual ward as a referral source, pease select the relevant trust from the list. Further guidance on all sections is available in Appendix 2 of the BCF Planning Requirements.

average numbers of hours committed to a homecare package that have been used to derive the number of expected packages.

Analysis gives best estimates, caveated due to data issues including limitations in reporting on requested Please include your considerations and assumptions for Length of Stay and data items. Rehab, UCR and at home estimates only based on last available 12 months data before system outage. Capcity and demand data to be built on during the year as community health provider mplements new data system. Discharge data reflects estimated apportionment of ICB Operating Plan ajectories to borough level. Estimated 5% pathway zero receive some form of social or VCS support. Demand for intermediate care from the community for vol sector services is zero as VCS do not provide ormal Intermediate Care. Short term domiciliary care / other social care incorporated into reablement. Unmet need data not available hence capacity reflects demand in baseline data and projections. Mental nealth not included as comparable data not available.

Further guidance for completing Expenditure sheet

Schemes tagged with the following will count towards the planned **Adult Social Care services spend** from the NHS min:

Area of spend selected as 'Social Care'
Source of funding selected as 'Minimum NHS Contribution'

Schemes tagged with the below will count towards the planned **Out of Hospital spend** from the NHS min:

• Area of spend selected with anything except 'Acute'

• Commissioner selected as 'ICB' (if 'Joint' is selected, only the NHS % will contribute)

• Source of funding selected as 'Minimum NHS Contribution'

2023-25 Revised Scheme types

Number		Sub type	Description
1	Assistive Technologies and Equipment	Assistive technologies including telecare	Using technology in care processes to supportive self-management,
		Digital participation services Community based equipment	maintenance of independence and more efficient and effective delivery of care. (eg. Telecare, Wellness services, Community based equipment, Digital
ı		4. Other	participation services).
2	Care Act Implementation Related Duties	Independent Mental Health Advocacy	Funding planned towards the implementation of Care Act related duties. The
		2. Safeguarding 3. Other	specific scheme sub types reflect specific duties that are funded via the NHS minimum contribution to the BCF.
3	Carers Services	1. Respite Services	Supporting people to sustain their role as carers and reduce the likelihood of
		Carer advice and support related to Care Act duties Other	crisis.
		S. Collection	This might include respite care/carers breaks, information, assessment, emotional and physical support, training, access to services to support wellbeing and improve independence.
4	Community Based Schemes	Integrated neighbourhood services	Schemes that are based in the community and constitute a range of cross
		Multidisciplinary teams that are supporting independence, such as anticipatory care Low level social support for simple hospital discharges (Discharge to Assess pathway 0) Other	sector practitioners delivering collaborative services in the community typically at a neighbourhood/PCN level (eg: Integrated Neighbourhood Teams)
			Reablement services should be recorded under the specific scheme type 'Reablement in a person's own home'
	DFG Related Schemes	Adaptations, including statutory DFG grants Discretionary use of DFG	The DFG is a means-tested capital grant to help meet the costs of adapting a property; supporting people to stay independent in their own homes.
		3. Handyperson services	
		4. Other	The grant can also be used to fund discretionary, capital spend to support people to remain independent in their own homes under a Regulatory Reform Order, if a published policy on doing so is in place. Schemes using this flexibility can be recorded under 'discretionary use of DFG' or 'handyperson services' as appropriate
6	Enablers for Integration	1. Data Integration	Schemes that build and develop the enabling foundations of health, social
		System IT Interoperability Programme management	care and housing integration, encompassing a wide range of potential areas
		4. Research and evaluation	including technology, workforce, market development (Voluntary Sector Business Development: Funding the business development and preparedness
		Workforce development New governance arrangements	of local voluntary sector into provider Alliances/ Collaboratives) and programme management related schemes.
		7. Voluntary Sector Business Development	programme management related schemes.
		8. Joint commissioning infrastructure	Joint commissioning infrastructure includes any personnel or teams that
		9. Integrated models of provision 10. Other	enable joint commissioning. Schemes could be focused on Data Integration, System IT Interoperability, Programme management, Research and
			evaluation, Supporting the Care Market, Workforce development,
			Community asset mapping, New governance arrangements, Voluntary Sector Development, Employment services, Joint commissioning
			infrastructure amongst others.
7	High Impact Change Model for Managing Transfer of Care	1. Early Discharge Planning	The eight changes or approaches identified as having a high impact on
		Monitoring and responding to system demand and capacity Multi-Disciplinary/Multi-Agency Discharge Teams supporting discharge	supporting timely and effective discharge through joint working across the social and health system. The Hospital to Home Transfer Protocol or the 'Red
		Home First/Discharge to Assess - process support/core costs	Bag' scheme, while not in the HICM, is included in this section.
		5. Flexible working patterns (including 7 day working)	
		6. Trusted Assessment 7. Engagement and Choice	
		8. Improved discharge to Care Homes	
		9. Housing and related services 10. Red Bag scheme	
		11. Other	
В	Home Care or Domiciliary Care	Domiciliary care packages Domiciliary care to support hospital discharge (Discharge to Assess pathway 1)	A range of services that aim to help people live in their own homes through the provision of domiciliary care including personal care, domestic tasks,
		3. Short term domiciliary care (without reablement input)	shopping, home maintenance and social activities. Home care can link with
		Domiciliary care workforce development Other	other services in the community, such as supported housing, community health services and voluntary sector services.
		3. One	neard services and voluntary sector services.
	Housing Related Schemes		This covers expenditure on housing and housing-related services other than adaptations; eg: supported housing units.
.0	Integrated Care Planning and Navigation	Care navigation and planning	Care navigation services help people find their way to appropriate services
		Assessment teams/joint assessment Support for implementation of anticipatory care	and support and consequently support self-management. Also, the assistance offered to people in navigating through the complex health and
		Support for implementation of anticipatory care A. Other	social care systems (across primary care, community and voluntary services
			and social care) to overcome barriers in accessing the most appropriate care
			and support. Multi-agency teams typically provide these services which can be online or face to face care navigators for frail elderly, or dementia
			navigators etc. This includes approaches such as Anticipatory Care, which
			along the consider the Hotele concentrated and the concentration of the laterale
			aims to provide holistic, co-ordinated care for complex individuals.
			Integrated care planning constitutes a co-ordinated, person centred and
			Integrated care planning constitutes a co-ordinated, person centred and proactive case management approach to conduct joint assessments of care needs and develop integrated care plans typically carried out by professionals as part of a multi-disciplinary, multi-agency teams.

The care is person-centred and

12	Home-based intermediate care services	1. Reablement at home (to support discharge) 2. Reablement at home (to prevent admission to hospital or residential care) 3. Reablement at home (accepting step up and step down users) 4. Rehabilitation at home (to support discharge) 5. Rehabilitation at home (to prevent admission to hospital or residential care) 6. Rehabilitation at home (accepting step up and step down users) 7. Joint reablement and rehabilitation service (to support discharge) 8. Joint reablement and rehabilitation service (to prevent admission to hospital or residential care) 9. Joint reablement and rehabilitation service (to prevent admission to hospital or residential care) 10. Other	Provides support in your own home to improve your confidence and ability to live as independently as possible
13	Urgent Community Response		Urgent community response teams provide urgent care to people in their homes which helps to avoid hospital admissions and enable people to live independently for longer. Through these teams, older people and adults with complex health needs who urgently need care, can get fast access to a range of health and social care professionals within two hours.
14	Personalised Budgeting and Commissioning		Various person centred approaches to commissioning and budgeting, including direct payments.
15	Personalised Care at Home	Mental health /wellbeing Physical health/wellbeing Other	Schemes specifically designed to ensure that a person can continue to live at home, through the provision of health related support at home often complemented with support for home care needs or mental health needs. This could include promoting self-management/expert patient, establishment of 'home ward' for intensive period or to deliver support over the longer term to maintain independence or offer end of life care for people. Intermediate care services provide shorter term support and care interventions as opposed to the ongoing support provided in this scheme type.
16	Prevention / Early Intervention	1. Social Prescribing 2. Risk Stratification 3. Choice Policy 4. Other	Services or schemes where the population or identified high-risk groups are empowered and activated to live well in the holistic sense thereby helping prevent people from entering the care system in the first place. These are essentially upstream prevention initiatives to promote independence and well being.
17	Residential Placements	Supported housing Learning disability Settra care 4. Care home S. Nursing home 6. Short-term residential/nursing care for someone likely to require a longer-term care home replacement 7. Short term residential care (without rehabilitation or reablement input) 8. Other	Residential placements provide accommodation for people with learning or physical disabilities, mental health difficulties or with sight or hearing loss, who need more intensive or specialised support than can be provided at home.
18	Workforce recruitment and retention	I. Improve retention of existing workforce Local recruitment initiatives Increase hours worked by existing workforce A. Additional or redeployed capacity from current care workers Other	These scheme types were introduced in planning for the 22-23 AS Discharge Fund. Use these scheme decriptors where funding is used to for incentives or activity to recruit and retain staff or to incentivise staff to increase the number of hours they work.
19	Other		Where the scheme is not adequately represented by the above scheme types, please outline the objectives and services planned for the scheme in a short description in the comments column.

Scheme type	Units
Assistive Technologies and Equipment	Number of beneficiaries
Home Care and Domiciliary Care	Hours of care (Unless short-term in which case it is packages)
Bed Based Intermediate Care Services	Number of placements
Home Based Intermeditate Care Services	Packages
Residential Placements	Number of beds/placements
DFG Related Schemes	Number of adaptations funded/people supported
Workforce Recruitment and Retention	WTE's gained
Carers Services	Beneficiaries

Yes

Long-term support needs of older people (age 65 and over) met by admission to residential and nursing care homes, per 100,000 population (aged 65+) population projections are based on a calendar year using the 2018 based Sub-National Population Projections for Local Authorities in England:

 $\underline{https://www.ons.gov.uk/releases/subnational population projections for england 2018 based}$

8.5 Reablement

		2021-22 Actual	2022-23 Plan		2023-24 Plan	Rationale for how ambition was set	Local plan to meet ambition
	Annual (%)	86.6%	83.0%	92.4%	90.0%	Taking into account long term trends in this data it is considered that 90% reflects	Streamlining care and support via the new transfer of care team (new team that
	Numerator	161	760	871	849	optimal performance and is a stretching target to maintain. Benchmarking data supports this, with only 3 Inner-London	transfers patients from hospital to home). Intermediate Care Southwark working hard to ensure the right people receive
						boroughs above 90%. Although the 2022/23 level was slightly higher this is	reablement at the right time.
Proportion of older people (65 and over) who were still at home 91 days after discharge from hospital						viewed as a "blip". We do not predict it will continue to rise taking into account the	
into reablement / rehabilitation services						range of needs levels of referrals being accepted into the service. The needs of	
						those discharged from hospital varies and figures can be affected by only a handful of	
						complex cases, and it is to be expected that a proportion of these will not hit the target.	
	Denominator	186	916	943	943

V.

Please note that due to the demerging of Cumbria information from previous years will not reflect the present geographies.

As such, the following adjustments have been made for the pre-populated figures above:

- Actuals and plans for Cumberland and Westmorland and Furness are using the Cumbria combined figure for all metrics since a split was not available; Please use comments box to advise.
- 2022-23 and 2023-24 population projections (i.e. the denominator for **Residential Admissions**) have been calculated from a ratio based on the 2021-22 estimates.

7. Confirmation of Planning Requirements

Selected Health and Wellbeing Board: Southwark

	Code	Planning Requirement	Key considerations for meeting the planning requirement These are the Key Lines of Enquiry (KLOEs) underpinning the Planning Requirements (PR)	Confirmed through	whether your	Please note any supporting documents referred to and relevant page numbers to assist the assurers	requirement is not met,	Where the Planning requirement is not met, please note the anticipated timeframe for meeting it	<u>Complete:</u>
	PR1	A jointly developed and agreed plan that all parties sign up to	Has a plan; jointly developed and agreed between all partners from ICB(s) in accordance with ICB governance rules, and the LA; been submitted? Paragraph 11 Has the HWB approved the plan/delegated approval? Paragraph 11 Have local partners, including providers, VCS representatives and local authority service leads (including housing and DFG leads) been involved in the development of the plan? Paragraph 11 Where the narrative section of the plan has been agreed across more than one HWB, have individual income, expenditure and metric sections of the plan been submitted for each HWB concerned? Have all elements of the Planning template been completed? Paragraph 12	Expenditure plan Expenditure plan Narrative plan Validation of submitted plans Expenditure plan, narrative plan	Yes		The plan will be presented to the Health and Wellbeing Board meeting on 20/7/23. In the interim it was agreed with the chair that this draft, approved by senior ICB and Council lead officers, would be submitted.	20/07/2023	Yes
NC1: Jointly agreed plan	PR2	A clear narrative for the integration of health, social care and housing	Is there a narrative plan for the HWB that describes the approach to delivering integrated health and social care that describes: - How the area will continue to implement a joined-up approach to integration of health, social care and housing services including DFG to support further improvement of outcomes for people with care and support needs Paragraph 13 - The approach to joint commissioning Paragraph 13 - How the plan will contribute to reducing health inequalities and disparities for the local population, taking account of people with protected characteristics? This should include - How equality impacts of the local BCF plan have been considered Paragraph 14 - Changes to local priorities related to health inequality and equality and how activities in the document will address these. Paragraph 14 The area will need to also take into account Priorities and Operational Guidelines regarding health inequalities, as well as local authorities' priorities under the Equality Act and NHS actions in line with Core20PLUSS. Paragraph 15	Narrative plan	Yes				Yes
	PR3	A strategic, joined up plan for Disabled Facilities Grant (DFG) spending	is there confirmation that use of DFG has been agreed with housing authorities? Paragraph 33 • Does the narrative set out a strategic approach to using housing support, including DFG funding that supports independence at home? Paragraph 33 • In two tier areas, has: - Agreement been reached on the amount of DFG funding to be passed to district councils to cover statutory DFG? or - The funding been passed in its entirety to district councils? Paragraph 34	Expenditure plan Narrative plan Expenditure plan	Yes				Yes
NC2: Implementing BCF Policy Objective 1: Enabling people to stay well, safe and independent at home for longer		A demonstration of how the services the area commissions will support people to remain independent for longer, and where possible support them to remain in their own home	Does the plan include an approach to support improvement against BCF objective 1? Paragraph 16 Does the expenditure plan detail how expenditure from BCF sources supports prevention and improvement against this objective? Paragraph 19 Does the narrative plan provide an overview of how overall spend supports improvement against this objective? Paragraph 19 Has the intermediate care capacity and demand planning section of the plan been used to ensure improved performance against this objective and has the narrative plan incorporated learnings from this exercise? Paragraph 66	Narrative plan Expenditure plan Narrative plan Expenditure plan, narrative plan	Yes				Yes
Additional discharge funding	PR5		Have all partners agreed on how all of the additional discharge funding will be allocated to achieve the greatest impact in terms of reducing delayed discharges? <i>Paragraph</i> 41 Does the plan indicate how the area has used the discharge funding, particularly in the relation to National Condition 3 (see below), and in conjunction with wider funding to build additional social care and community-based reablement capacity, maximise the number of hospital beds freed up and deliver sustainable improvement for patients? <i>Paragraph</i> 41 Does the plan take account of the area's capacity and demand work to identify likely variation in levels of demand over the course of the year and build the workforce capacity needed for additional services? <i>Paragraph</i> 44 Has the area been identified as an area of concern in relation to discharge performance, relating to the 'Delivery plan for recovering urgent and emergency services?' If so, have they plans adhered to the additional conditions placed on them relating to performance improvement? <i>Paragraph</i> 51 Is the plan for spending the additional discharge grant in line with grant conditions?	Expenditure plan Narrative and Expenditure plans Narrative plan Narrative and Expenditure plans	Yes				Yes

NC3: Implementing BC Policy Objective 2: Providing the right car in the right place at th right time	e	A demonstration of how the services the area commissions will support provision of the right care in the right place at the right time	Does the expenditure plan detail how expenditure from BCF sources supports improvement against this objective? Paragraph 22 Does the narrative plan provide an overview of how overall spend supports improvement against this metric and how estimates of capacity and demand have been taken on board (including gaps) and reflected in the wider BCF plans? Paragraph 24 Has the intermediate care capacity and demand planning section of the plan been used to ensure improved performance against this objective and has the narrative plan incorporated learnings from this exercise? Paragraph 66 Has the area reviewed their assessment of progress against the High Impact Change Model for Managing Transfers of care and summarised progress against areas for improvement identified in 2022-237 Paragraph 23	Narrative plan Expenditure plan Narrative plan Expenditure plan, narrative plan Expenditure plan Narrative plan	Yes			Yes
NC4: Maintaining NHS contribution to adult social care and investment in NHS commissioned out of hospital services	PR7	A demonstration of how the area will maintain the level of spending on social care services from the NHS minimum contribution to the fund in line with the uplift to the overall contribution	Paragraphs 52-55	Auto-validated on the expenditure plan	Yes			Yes

-				The second secon	A to a Colored Code a consequence of the code of the c
