

Item No. 2	Classification: OPEN	Date: 14 October 2010	Meeting Name: Dulwich Community Council
Report title:	Development Management planning application: Council's own development Application 10-AP-1803 for: Council's Own Development - Reg. 3 Address: GOOSE GREEN PRIMARY SCHOOL, TINTAGEL CRESCENT, LONDON, SE22 8HG Proposal: Single storey extension providing additional school accommodation; external alterations to annexe to provide children's centre.		
Ward(s) or groups affected:	East Dulwich		
From:	Head of Development Management		
Application Start Date 25/06/2010		Application Expiry Date 20/08/2010	

RECOMMENDATION

- 1 For consideration by Dulwich Community Council as the property is owned by the Council, and objections have been received.

BACKGROUND INFORMATION

Site location and description

- 2 The application site is Goose Green Primary School; a former Board School (c. 1900). Goose Green Primary School is a primary and nursery school for boys and girls aged 3 - 11. It is situated close to Goose Green, between Grove Vale Road and Tintagel Crescent. The current school role is 380 pupils with 25 full-time and 25 part-time places.
- 3 The site comprises the original site and building developed in 1901 by the School Board for London. The main school building is a Grade II listed 4 storey brick building. A smaller annexe building is located to the west of the site.
- 4 The composition has been undermined by the construction of two 2-storey toilet blocks by the former 'boys' and 'girls' entrances. These additions were constructed prior to the building being listed.
- 5 The main school is a Grade II listed 4 storey brick building. The building, formerly known as the Grove Vale School, is in the Baroque Revival style and is constructed of terracotta, red and black brick with stone dressings. The roof is tiled with a metal cupola.
- 6 The school is accessible from Tintagel Crescent for pedestrians and vehicles. Goose Green Primary School is situated on a tight site, and all the spaces between the buildings utilised as play areas. The historic and principal elevation of the building is

on the north-east side fronting onto Grove Vale. The current main working entrance to the school is at the rear on Tintagel Crescent. Architecturally the rear elevation repeats the scheme on the principal elevation but is less elaborate and grand.

Details of proposal

- 7 The application under consideration here relates to the creation of a new children's centre in the existing annexe building, reconfiguration of part of the listed building and a single storey extension at the rear to accommodate the reception as well as a flue to the west elevation. The application follows a pre-application enquiry LBS Reg: 10-AP-0041. A separate Listed Building Consent application (10-AP1278) has already been approved for the conversion of the school hall on the second floor into two classrooms and a full planning application and listed building application have been approved for the creation of an external playdeck and the creation of new doors to the north elevation (10/AP/0422 & 10/AP/0423).
- 8 The main element of the proposal is the construction of a single storey extension to the south elevation of the building, situated between the two existing 1960's additions. This will accommodate a new reception area and meeting rooms. The extension will have sandblasted glazing as rainscreen cladding, with glazed screens extending to floor level. Timber louvres are proposed for the front elevation. A glazed rooflight is proposed at rooflevel of the extension.
- 9 The overall height of the extension is 3.3 m, with a width of 14.9 m and a depth of approx 3.6 m. The extension will be set forward of the existing 1960's block by 0.3 m. New entrance doors and a high level window are proposed for the existing toilet blocks.
- 10 Internal works include remodelling the existing administration area to install a new kitchen and the creation of a new servery (these are discussed in more detail in the listed building consent application).
- 11 In relation to the annexe building, it is proposed to convert this element into a children's centre on the ground and first floor. There will be shared space on the ground floor with an After School and Breakfast Club.
- 12 This will involve internal works (this is described in detail in the officer report for the listed building consent application) as well as works to the external elevations. On the east elevation new timber framed double glazed windows are proposed for the ground floor, as well as the replacement of a number of windows, conversion of an existing door to a window, and the infilling of one of the arches with a render. A small ramp is proposed to provide level access.
- 13 Alterations to the south elevation include a new entrance and a new opening to accommodate a timber double glazed window. This new entrance will enable independant access from Tintagel Crescent outside school hours.
- 14 Works to the north elevation include new timber frame double glazed window into the existing opening.
- 15 5 new flues are proposed at roof level of the annexe building.
- 16 Works to the main building include a new flue for the kitchen extraction, which will be painted matt black. This will be 1.8 m in height and 0.35 m in width. A new air intake is proposed for the kitchen above the kitchen delivery entrance.
- 17 Internal works to accommodate the new kitchen areas and new internal layout are

also proposed and these are described in detail in the listed building consent application.

Planning history

- 18 10/AP/1278 Listed building consent approved for conversion of a school hall on the second floor into two classrooms. Recreation of toilets in storage rooms on first floor mezzanine level.
- 19 10/AP/0423 & 10/AP/0422 Full planning and listed building consent approved for the creation of new external door to north-east elevation to provide level access to new raised deck area in existing external playground

Planning history of adjoining sites

- 20 None relevant

KEY ISSUES FOR CONSIDERATION

Summary of main issues

- 21 The main issues to be considered in respect of this application are:
- 22 a) the principle of the development in terms of land use and conformity with strategic policies.
- 23 b) design issues and impact on the setting on the Grade II listed building
- 24 c) impact on amenity
- 25 d) traffic issues

Planning policy

- 26 Southwark Plan 2007 (July)
- 27 Policy 3.2 'Impact on amenity'
Policy 3.12 'Quality in design'
Policy 3.13 'Urban design'
Policy 3.15 'Conservation of the historic environment'
Policy 3.16 'Listed buildings'
Policy 3.17 'Setting of listed buildings, conservation areas and world heritage sites'
- 28 London Plan 2008 consolidated with alterations since 2004
Policy 4B.11 London's built heritage
Policy 4B.12 Heritage Conservation
Policy 4B.13 Historic conservation led regeneration

Core Strategy

- 29 The Council submitted the draft Core Strategy to the Secretary of State on 26 March 2010 and the Examination in Public hearings took place in July 2010. The Core Strategy policies should be considered as currently having no weight when determining planning applications as they are awaiting the Inspector's report and his finding of soundness. Applications should continue to be determined pending receipt of the Inspector's report primarily in accordance the saved policies in the Southwark

Plan 2007 and the London Plan 2008.

- 30 The Inspector's report on the Core Strategy is expected in October 2010. With a recommendation of soundness from the inspector there will be a very high degree of certainty that the Core Strategy will be adopted and that a number of existing Southwark Plan policies will be replaced. In view of this, on publication of the inspector's report, all core strategy policies should be given significant weight in determining planning applications. Less weight should be given to existing policies which are soon to be replaced. Formal adoption of the core strategy is expected in January 2011.

Planning Policy Guidance (PPG) and Planning Policy Statements (PPS)

- 31 PPS 5 Planning for the historic environment

Principle of development

- 32 The principle of development in this instance is acceptable subject to compliance with relevant policies.

Impact of proposed development on amenity of adjoining occupiers and surrounding area

- 33 It is not considered that there will be an adverse impact on the amenity of surrounding occupiers, having regard to visual amenity and noise. In relation to the proposed single storey extension it is not considered that any adverse visual impact will result from this element (see design discussion below). No additional noise issues will arise as a result of this extension.
- 34 In relation to the proposed conversion of the annexe building to a children's centre it is not considered that the use of this building for this purpose will have an impact over and above the existing use of the building for class rooms. While the utilisation of the building as a children's centre will result in a change in the way the building is currently used, it is not considered that this will result in significant impact on noise levels. It is noted that a large area of the existing site is given over to play areas which already generate a significant amount of noise during school hours as is to be expected for such a use, which is long established at this location.
- 35 In relation to the flue on the west elevation of the main building it is considered that there is sufficient distance between the flue and the closest residential properties so as to ensure that there is no detrimental impact on these properties.
- 36 It is not considered that the smaller flues on the annex building will result in a detrimental impact on amenity.

Traffic issues

- 37 The above application will not generate a significant negative impact on the performance and safety of the surrounding highway network. The implementation of the children's centre will result in additional pupil numbers but it is not considered that the additional traffic will be material having regard to the overall numbers in the school.

Design issues

New Extension

- 38 Consideration is given to the appropriateness of the proposed fabric, geometry and function of the proposal as well as the overall concept for the scheme.
- 39 The design of the new extension has been through a number of changes since the original pre-application submission.
- 40 The rear elevation of Goose Green Primary School continues the scheme on the primary elevation but is simpler and less elaborate. Red brick treated as rusticated blocks across the ground floor, with a black brick plinth anchoring the building. Articulation to the facade is provided by the window ranges and the decorative terracotta and stonework. The existing toilets blocks fail to enhance the rear elevation of this grade II listed building. The 2 storey flat roofed blocks were constructed prior to the statutory listing of the building. Whilst these toilet blocks interrupt the original composition of the rear elevation, the facade still remains discernible.
- 41 It is considered that the amended scheme proposed here, has sought to take on board advice given at pre-application stage. The proposed infill extension would maintain the symmetry of the facade and proposes openings which line through with those above. The proposed sandblasted glazed extension with the glazed rooflight would maintain a degree of lightness that would not dominate this facade. The timber louveres are considered to be acceptable as these add interest to the extension and also help to maintain privacy to the offices.

Proposed Annexe Building

- 42 There is no objection in principle to the proposed conversion of the Annexe building and the amended proposals for this element are considered to be acceptable subject to additional information and detailed drawings being provided by way of condition.
- 43 The windows should reflect the proportions and linearity of the host building. The amended drawings show proposed windows are more vertical in their emphasis. However it should be ensured that these windows are not 'off the peg' and should be bespoke in order to maintain the historic character and appearance of the building, This can be ensured by way of condition.

Impact on the grade II listed building

- 44 Goose Green Primary School is statutorily listed Grade II. The proposed development should have regard to national planning policies, set out in PPS 5 'Planning for the Historic Environment and the following Council planning policies relating to listed buildings:
- 45 Policy 3.17 'Listed buildings of the Southwark Plan (2007) seeks to ensure that new development proposals involving a listed building should preserve the building and its features of special architectural or historic interest. Planning permission for proposals which involve an alteration or extension to a listed building will only be permitted where there is no loss of important historic fabric and that the development is not detrimental to the special architectural or historic interest of the building. The development should relate sensitively to the listed building and respects the period, style, detailing and context of the listed building or later alterations of architectural or historic interest. Existing detailing and important later additional features of the building are preserved, repaired or, if missing, replaced.
- 46 Policy 3.18 'Setting of listed buildings, conservation areas and world heritage sites' of

the Southwark Plan (2007) seeks to ensure that new developments should preserve or enhance the immediate or wider setting of a listed building; or important view(s) of a listed building.

- 47 These policies are reinforced by the London Plan Policies 4B.11 'London's built heritage' and 4B.12 'Heritage Conservation', which requires a demonstration that the scheme, protects and enhance London's historic environment. Also that the proposal seeks to maintain and increase the contribution of the built heritage to London's environmental quality, to the economy, both through tourism and the beneficial use of historic assets, and to the well-being of London's people while allowing for London to accommodate growth in a sustainable manner.
- 48 A number of significant alterations and interventions to the plan form of the main school building and the annexe building are proposed. The following paragraphs in the PPS 5 'Planning for the Historic Environment: Historic Environment Practice Guide', are particularly relevant:
- 49 Paragraph 179 *'The fabric will always be an important part of the asset's significance. Retention of as much historic fabric as possible is therefore a fundamental part of any good alteration or conversion, together with the use of appropriate materials and methods of repair. It is not appropriate to sacrifice old work simply to accommodate the new.'*
- 50 Paragraph 180 *'The junction between new work and the existing fabric needs particular attention, both for its impact on the significance of the existing asset and the impact on the contribution of its setting. Where possible it is preferable for new work to be reversible, so that changes can be undone without harm to the fabric. However, reversibility alone does not justify alteration. If alteration is justified on other grounds then reversible alteration is preferable to non-reversible. New openings need to be considered in the context of architectural and historic significance of that part of the asset. Where new work or additions make elements with significance redundant, such as doors or decorative features, there is likely to be less impact on the asset's aesthetic, historic or evidential value if they are left in place.'*
- 51 Paragraph 182 *'The plan form of a building is frequently one of its most important characteristics and internal partitions, staircases (whether decorated or plain, principal or secondary) and other features are likely to form part of its significance. Indeed they may be its most significant feature. Proposal to remove or modify internal arrangements, including the insertion of new opening or extension underground, will be subject to the same considerations of impact on significance (particularly architectural interest as external visible alterations).'*
- 52 Part of the works proposed involves the creation of a kitchen in the main building. Currently there is no working kitchen and meals are prepared off site and delivered to the school. Whilst the desire for a kitchen on site is accepted, in listed building terms the creation of one can be problematic within the confines of the existing listed building and in this case detailed drawings of proposed interventions will be required by condition.
- 53 It is noted that a flue is required to serve the kitchen. This flue is a much smaller version of that originally proposed. This is considered acceptable, subject to detailed drawings, as it preserves the appearance of this elevation, which is of particular merit due to the decorative plaque bearing the insignia of the London Board School and the words Grove Vale School.
- 54 The drawing implies that the proposed air intake would be cut into the rusticated brick

work. A detailed method statement should be submitted in order to ensure that this work is carried out with the minimal impact on the fabric of the listed building.

- 55 PPS 5 Practice Guidance (paragraph 189) states that: *'...new services, both internal and external can have a considerable, and often a cumulative, effect on the appearance of a building and can affect significance. The impact of necessary services can be minimised by avoiding damage to decorative features by carefully routeing and finishing and by use of materials appropriate to the relevant period.'*
- 56 As such the impact of any new services proposed should be minimised in order to ensure that the fabric of the building is preserved.
- 57 With regards the general works proposed to the listed building the Schedule of Works is considered too generic. Where repairs to the historic fabric are proposed little information is provided on methodology and materials. Furthermore, a new manhole and drainage runs are proposed within the listed building, the information provided regarding this work is limited. A more detailed Schedule of Work and information with regarding the drainage works is required in order to ascertain the impact on the listed building and potential loss of historic fabric. This can be done by way of condition.
- 58 PPS 5 - Policy HE9.1 sets out the presumption in favour of the conservation of designated assets. Any harmful impact on the significance of a designated asset needs to be justified on the grounds set out in HE9.2 (substantial harm or total loss) or HE9.4 (less than substantial harm). The works do not propose the complete removal of the gallery, but would significantly alter the appearance of this important central space. Therefore it is considered that the proposed works would have a detrimental impact but would not lead to substantial harm or total loss of significance as referred to in Policy HE9.2 and therefore the guidance in Policy HE9.4 is relevant. Policy HE9.4 states *'where a proposal has a harmful impact on the significance of a designated heritage asset which is less than substantial harm, in all cases local planning authorities should: (i) weigh the public benefit of the proposal (for example, that it helps to secure the optimum viable use of the heritage asset in the interests of its long-term conservation) against the harm; and (ii) recognise that the greater the harm to the significance of the heritage asset the greater justification will be needed for any loss.'* Whilst the public benefit of the scheme is acknowledged, more detailing is required on the internal works proposed which can be requested by detail method statements required by condition.
- 59 While the concerns of the amenity societies are noted (Council for British Archeology and the Victorian Society, it is considered that the amended drawings deal with the issues raised in the objections subject to additional details being provided by way of condition. No response was received from the above bodies in relation to the amended drawings.

Conclusion on planning issues

- 60 Having regard to the above, the proposal is acceptable subject to detailed conditions and as such the recommendation is to grant planning permission.

Community impact statement

- 61 In line with the Council's Community Impact Statement the impact of this application has been assessed as part of the application process with regard to local people in respect of their age, disability, faith/religion, gender, race and ethnicity and sexual orientation. Consultation with the community has been undertaken as part of the

application process.

- 62 a) The impact on local people is set out above.

Consultations

- 63 Details of consultation and any re-consultation undertaken in respect of this application are set out in Appendix 1.

Consultation replies

- 64 Details of consultation responses received are set out in Appendix 2.

Internal

- 65 Design and Conservation: Recommend conditions
Transport: Request an updated school travel plan
Building Control (verbal): Noted that flue was not required to be carried to eaves level

Summary of consultation responses

- 66 Council for British Archaeology:
- Object on the grounds that the proposals for the annexe, extension of the main block and the external flue attached to the main block were unacceptable and would cause substantial harm to the Heritage assets and their setting.
 - No objections to the remodelling of the annexe in principle but the proposed new annexe windows were considered inappropriate given their horizontal emphasis which was at odds with the historic architecture
 - alterations to the main building would harm the significance of the listed building in a way that was considered disproportionate to the advantages to the school
 - objection to the extension and also to the proposed external flue
- 67 English Heritage
- Application should be determined in accordance with national and local policy guidance and on the basis of your specialist conservation advice.
- 68 The Victorian Society
- Object to proposals which will have a detrimental impact on the external appearance of the listed building.
 - accept the need for a more prominent entrance and administration area and do not object in principle to an extension
 - building across the main facade will add to the clutter of extensions in contrasting styles on what otherwise would be an impressive elevation
 - opportunity should be taken to remove the 1960's extensions by removing them and attaching new facilities to either side of the wings
 - urge Council to refuse permission

Human rights implications

- 69 This planning application engages certain human rights under the Human Rights Act 2008 (the HRA). The HRA prohibits unlawful interference by public bodies with conventions rights. The term 'engage' simply means that human rights may be affected or relevant.
- 70 This application has the legitimate aim of providing additional educational accommodation. The rights potentially engaged by this application, including the right

to a fair trial and the right to respect for private and family life are not considered to be unlawfully interfered with by this proposal.
