Pigeon Mesh Protection to Bridges

Following a significant number of complaints and a high level of ad-hoc enquiries for repairs to existing arrangements, it is proposed to install/renew the pigeon mesh for a number of highway structures.

River Walls

Southwark Council maintains 7.4km of river walls comprising sheet piles, timber, masonry and concrete construction. A full investigation has been carried out of all Southwark Council managed and maintained river wall structures and a planned programme of works is to be implemented over the next number of years.
