

Appendix 1: Draft Decision Notice

RECOMMENDATION LDD MONITORING FORM REQUIRED

This document shows the case officer's recommended decision for the application referred to below.
This document is not a decision notice for this application.

Applicant	BL CW Holdings Ltd	Reg. Number	18/AP/1604
Application Type	Hybrid Planning Application		
Recommendation	Grant subject to Legal Agreement and Referral to the GLA	Case Number	TP/468-G

Draft of Decision Notice

Hybrid application seeking detailed planning permission for Phase 1 and outline planning permission for future phases, comprising:

Outline planning permission (all matters reserved) for the demolition of all existing structures and redevelopment to include a number of tall buildings (up to 138m AOD) and up to 656,200sqm (GEA) of floorspace comprising the following mix of uses: retail (Use Classes A1-A5), workspace (B1), hotel (C1), residential (C3), assisted living (C2), student accommodation, leisure (including a cinema) (D2), community facilities (including health and education uses) (D1), public toilets, nightclub, flexible events space, an energy centre, an interim and permanent petrol filling station, a primary electricity substation, a secondary entrance for Surrey Quays Rail Station, a Park Pavilion, landscaping including open spaces and public realm, works to the Canada Water Dock, car parking, means of access, associated infrastructure and highways works and demolition or retention with alterations of the Press Hall and Spine Building of the Printworks; and

Detailed planning permission for the following Plots in Phase 1:

- Plot A1 (south of Surrey Quays Road and west of Deal Porters Way) to provide uses comprising retail (A1-A5), workspace (B1) and 186 residential units (C3) in a 6 and 34 storey building (129.4m AOD), plus a basement;
- Plot A2 (east of Lower Road and west of Canada Water Dock) to provide a leisure centre (D2), retail (A1-A5), and workspace (B1) in a 4, 5 and 6 storey building plus a basement.
- Plot K1 (east of Roberts Close) to provide 79 residential units (C3) in a 5 and 6 storey building.
- Interim Petrol Filling Station (north of Redriff Road and east of Lower Road) to provide an 8-pump petrol filling station with kiosk, canopy and forecourt area.
-

Each plot with associated car parking, cycle parking, landscaping, public realm, plant and other relevant works.

The application is accompanied by an Environmental Statement submitted pursuant to the Town and Country Planning (Environmental Impact Assessment) Regulations 2011 (as amended).

At: CANADA WATER MASTERPLAN - LAND BOUNDED BY LOWER ROAD (WEST), REDRIFF ROAD (SOUTH), QUEBEC WAY (EAST), SURREY QUAYS ROAD AND CANADA WATER DOCK (NORTH), AND SITE AT ROBERTS CLOSE, LONDON SE16

In accordance with application received on 11/05/2018

Definitions:

"Above-Grade" means any Construction Works above ground level.

"Building" means a building or part thereof within a Development Plot.

"Construction Works" - TBC

"Development" means the Development permitted by the Planning Permission.

"Development Phase" means a phase of the Development as shown on the Phasing Plan approved pursuant to Condition 8, which phases may comprise any component part of the Development and may either individually or collectively comprise Excluded Works, Construction Works, a Development Plot (or Development Plots), a Building (or Buildings), landscaping and infrastructure or, in any case, part thereof and each and every such phase described on the approved phasing strategy shall constitute a separate phase of the development authorised by this planning permission for the purposes of the Community Infrastructure Levy Regulations 2010 (as amended).

"Development Plot" means an area of land in respect of which is a particular Building or group of Buildings is to be constructed to be defined by the relevant RMA;

"Development Zone" means each of the Development Zones shown on the Proposed Development Zones and Public Realm Plan listed below;

"Excluded Works" - TBC

"Occupation" means the use or occupation of the Development or any part thereof for the purposes permitted and does not include occupation by personnel engaged in construction, fitting out or decoration, commissioning or occupation for marketing or display or operations in relation to security operations and the phrases "Occupy" and "Occupied" and cognate expressions shall be construed accordingly;

"Phase 1 Development" – means Plot A1, Plot A2, Plot K1 and the IPFS and their associated Public Realm.

"Public Realm" means the network of spaces between the Buildings within the Development that can be freely accessed by the public, including parks, squares, roads, pedestrian areas, cycle routes and open space, including the dockside.

"Reserved Matters" means details of the:

- a) Scale;
- b) Appearance;
- c) Layout;
- d) Access; and
- e) Landscaping

"Reserved Matters Approval" means any approval of Reserved Matters in respect of the Development and the term "RMA" shall be construed accordingly;

"Reserved Matters Compliance Report" means the information set out in the Annex to this planning permission and which shall be included with each relevant application for the approval of reserved matters pursuant to condition 7.

Subject to the following conditions:**1. Approved Plans**

The development hereby permitted shall not be carried out otherwise than in accordance with the following approved plans:

Reason:

For the avoidance of doubt and in the interests of proper planning.

2. Time Limit and Reserved Matters

- a) The Development hereby permitted shall be begun before the end of three years from

the date of this permission.

- b) No part of the Development hereby approved in outline shall be commenced until details of the Reserved Matters in relation to that part of the Development have been submitted to and approved in writing by the Local Planning Authority.
- c) The reserved matters for the first Development Plot or Zone shall be submitted to the Local Planning Authority for approval by not later than the expiration of three years from the date of this permission and the development permitted by this permission shall be begun either before the end of five years from the date of this permission or before the expiration of three years from the date of the final approval of the last Reserved Matters Application for the first Development Plot/Zone, or in the case of approval on different dates, the final approval of the last such matter to be approved for the first Development Plot/Zone.
- d) Applications for the approval of Reserved Matters in respect of the Development shall be submitted to the Local Planning Authority for approval before the expiration of 20 years from the date of this decision notice.

Reason

As required by Sections 91 and 92 of the Town and Country Planning Act 1990 as amended.

3. Control Documents

The Development (excluding the Phase 1 Development) shall be developed in accordance with the following documents:

:

- The Development Specification (DP9, February 2019)
- The Parameter Plans:

Demolition Plan	CWM-AAM-MP-ZZ-DR-A-07002 Rev P1
Proposed Development Zones and Public Realm	CWM-AAM-MP-ZZ-DR-A-07003 Rev P1
Proposed Building Lines	CWM-AAM-MP-ZZ-DR-A-07004 Rev P1
Proposed Basement Extents	CWM-AAM-MP-ZZ-DR-A-07005 Rev P4
Proposed Vehicular Access from Planning Application Boundary	CWM-AAM-MP-ZZ-DR-A-07006 Rev P1
Proposed Servicing and Access	CWM-AAM-MP-ZZ-DR-A-07007 Rev P1
Proposed Predominant Ground Level Uses	CWM-AAM-MP-ZZ-DR-A-07008 Rev P1
Proposed Predominant Upper Level Uses	CWM-AAM-MP-ZZ-DR-A-07009 Rev P1
Proposed Site Levels	CWM-AAM-MP-ZZ-DR-A-07011 Rev P1
Proposed Maximum Heights	CWM-AAM-MP-ZZ-DR-A-07012 Rev P2

- The Design Guidelines Volumes 1 (June 2019) and Public Realm Design Guidelines (October 2018)

Reason:

To ensure that the development is undertaken in accordance with the approved drawings and documents, including the Environmental Statement, and otherwise conforms to the principles of sustainable development as described in the National Planning Policy Framework 2019

4. Floorspace cap

The total amount of floorspace across the Development (excluding the Phase 1 Development) shall not exceed the 656,200 sqm GEA (excluding parking, plant and public toilets) stated in Table 3 of the approved Development Specification.

Reason:

Reason: To ensure that the Development is carried out in accordance with the approved plans and other submitted details and to ensure that the quantum of floorspace remains within the approved parameters as assessed pursuant to the Environmental Impact Assessment of the Development.

5. Development Zones and Permitted Uses

The quantum of built floorspace across the Development (excluding Phase 1) shall not exceed the maximum floorspace figures (GEA) for each permitted land use or for each Development Zone specified in Table 3 of the approved Development Specification, as follows:

Development Zone	Use Class	Zone B GEA SQ M	Zone C GEA SQ M	Zone D GEA SQ M	Zone E GEA SQ M	Zone F GEA SQ M	Zone G GEA SQ M	Zone H GEA SQ M	Zone J GEA SQ M	Zone L GEA SQ M	Zone M GEA SQ M	Zone N GEA SQ M	Zone P GEA SQ M	MAXIMUM GEA CAP BY USE (SQ M)
Retail	A1-A5	9,000	2,800	32,700	6,600	3,700	21,700	5,300	3,000	800	400	500	150	86,650
Workspace	B1	41,500	27,600	80,300	19,000	38,500	5,000	67,600	1,500	11,500	-	-	-	282,500
Hotel	C1	-	-	7,500	-	-	-	-	-	-	-	-	-	7,500

Community Facilities	D1	4,600	-	4,600	2,900	33,500	5,000	-	4,000	4,000	2,500	-	150	45,650
Leisure/ Cultural	D2	-	-	20,000	7,500	7,500	-	25,000	-	-	-	-	-	51,500*
Night Club	Sui Generis	-	-	1,500	-	-	-	1,500	-	-	-	-	-	1,500
Student Accommodation	Sui Generis	27,300	23,000	-	-	31,200	30,000	-	-	-	-	-	-	50,300
Energy Centre	Sui Generis	2,000	2,000	-	-	-	-	-	-	-	-	-	-	2,000
Primary Sub-Station	Sui Generis	-	-	-	3,000	-	-	-	-	3,000	-	-	-	3,000
Multi-Storey Car Park	Sui Generis	-	17,200	-	17,200	-	-	-	-	-	-	-	-	17,200
Petrol Filling Station	Sui Generis	-	3,000	-	3,000	-	-	-	-	-	-	-	-	3,000
Transport Infrastructure (potential second entrance to SQ Station)	Sui Generis	500	-	-	-	-	-	-	-	-	-	500	-	500
Flexible Events Space	Sui Generis	-	-	5,000	-	-	-	-	-	-	-	-	-	5,000
Parking and Plant	-	10,200	7,300	30,400	10,500	8,000	31,000**	18,400	13,700	3,400	400	250	200	133,750
Public Toilets	Sui Generis	-	-	-	-	-	-	-	-	-	-	-	-	500***
MAXIMUM GEA CAP PER ZONE (SQ M) (excluding public toilets, parking and plant)	-	76,000	48,900	159,800	36,600	89,900	65,900	82,500	60,700	29,800	5,200	750	150	

Reason:

To ensure that the Development is carried out in accordance with the approved plans and other submitted details and to ensure that the quantum of floorspace remains within the approved parameters as assessed pursuant to the Environmental Impact Assessment of the Development.

6. Floorspace minimums

For the avoidance of doubt, at its completion the development hereby permitted will deliver as a minimum 2,000 residential units (use class C3) and the following amounts of non-residential development within the outline element of the development:

- 45,962sqm retail and leisure floorspace (use classes A1-A5 and D2)

- 45,962sqm workspace (use class B1)
- 500qm community use floorspace (use class D1)

Reason:

To ensure a mixed and balanced Town Centre in accordance with the objectives of the Canada Water Area Action Plan (2015)

7. Reserved Matters Compliance Statement

Each application for Reserved Matters submitted pursuant to Condition 3 shall contain such information as is set out in the Reserved Matters Compliance Report included at Annex 1 of this Decision Notice.

Reason:

To ensure that the development is undertaken in accordance with the plans and documents approved herein

8. Phasing

No part of the Development (excluding the Phase 1 Development) shall be carried out unless and until a phasing strategy showing the location of each Development Phase and including details of the order in which the Development Phases will be commenced, has been submitted to and approved by the Local Planning Authority.

The Development shall only be carried out in accordance with the approved phasing strategy, subject to such amendments to such phasing strategy as may be approved by the Local Planning Authority from time to time.

Reason:

In order to provide a coordinated approach to the delivery of the Development Plots and their associated infrastructure and public realm and in the interests of proper planning

9. Retail Controls

At its completion, the Development will provide:

- A minimum of 50% of its retail floorspace as Use Class A1;
- A minimum of 10% of its retail floorspace as small shops;
- No hot-food takeaways (Use Class A5) within 400m of a secondary school boundary and no more than 5% A5 premises within any single shopping frontage ; and
- Only 1 petrol station operational at any point in time

Reason:

In order to deliver a diverse retail environment as described in the Canada Water Area Action (2015)

Phase 1 Conditions (Plots A1, A2, K1 and the IPFS)

These conditions in relation to Development Plots A1, A2, K1 and IPFS, collectively described as the "Phase 1 Development", shall be required to be discharged for each Development Plot individually but this shall not preclude the discharge of the conditions for Development Plots collectively where appropriate:

Pre-commencement condition(s) - the details required to be submitted for approval by the condition(s) listed below must be submitted to and approved by the council before any work in connection with implementing this permission is commenced.

Advanced infrastructure and enabling works

10. No development shall take place within a Development Zone or Development Plot until such time as details of any necessary advanced infrastructure and enabling works have been submitted to the Local Planning Authority and approved in writing.

Details may include, but are not limited to, initial enabling and site set-up works, the establishment of temporary welfare or site accommodation, installation of construction plant, temporary drainage, power and/or water supplies or the diversion of existing services, and the construction of site access/egress points pertinent to the construction of any Development Plot or Zone. The submitted details shall include plans demonstrating the extent of works required.

Reason:

In order to ensure that all necessary enabling works required to facilitate the approved development for any Zone and/or Plot are undertaken to the satisfaction of the local planning authority in a timely manner and avoiding adverse impacts on local amenity insofar as possible in accordance with Saved Policy 3.2 of the Southwark Plan (2007)

11. **Contamination – Site Investigations**

Prior to the commencement of any development, a Phase 2 site investigation and risk assessment shall be conducted in accordance with the approved Phase 1 desk-based assessment detailed in the approved Environmental Statement. The results of the Phase 2 investigation shall be submitted to the Local Planning Authority for approval in writing prior to the commencement of any remediation that might be required.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

12. **Contamination – Remediation**

In the event that contamination is present on any part of the site, a detailed remediation strategy to bring the relevant parts of the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and the natural and historical environment shall be prepared and submitted to the Local Planning Authority for approval in writing. The detailed remediation strategy shall ensure that the site would not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation.

The approved remediation scheme (if one is required) shall be carried out in accordance with its terms prior to the commencement of development other than that required to carry out remediation, unless otherwise agreed in writing by the Local Planning Authority. The Local Planning Authority shall be given two weeks written notification of commencement of the remediation scheme works.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

13. **Contamination – Verification**

Following the completion of the measures identified in the approved remediation strategy, a verification report providing evidence that all work required by the remediation strategy has been completed shall be submitted to and approved in writing by the Local Planning Authority.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

14. Piling and foundation design

Prior to the commencement of development (excluding demolition), details of the proposed piling method and foundation design shall be submitted to the local planning authority for approval in writing (in consultation with the Environment Agency) to demonstrate that there is no resultant unacceptable risk to groundwater. The development shall be carried out in accordance with the approved details.

Reason:

Piling can create pathways for contaminants and this presents a risk to underlying controlled waters unless appropriate methodologies and mitigation are utilised in accordance with Strategic Policy SP13 'High Environmental Standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

15. Tunnel protection measures

The development hereby permitted shall not be commenced until detailed design and method statements (in consultation with London Underground) for each stage of the development affecting London Underground assets for demolition, foundations, basement and ground floor structures, or for any other structures below ground level, including piling (temporary and permanent), have been submitted to and approved in writing by the local planning authority which:

- provide details on all structures;
- provide details on the use of tall plant/scaffolding;
- accommodate the location of the existing London Underground structures and tunnels;
- accommodate ground movement arising from the construction thereof;
- and mitigate the effects of noise and vibration arising from the adjoining operations within the structures and tunnels.

The development shall thereafter be carried out in all respects in accordance with the approved design and method statements, and all structures and works comprised within the development hereby permitted which are required by the approved design statements in order to procure the matters mentioned in paragraphs of this condition shall be completed, in their entirety, before any part of the building hereby permitted is occupied.

Reason:

To ensure that the development does not impact on existing London Underground transport infrastructure, in accordance with London Plan 2016 Table 6.1, draft London Plan policy T3 and 'Land for Industry and Transport' Supplementary Planning Guidance 2012.

16. Basement impact/groundwater flooding – Plots A1 and A2

Prior to the commencement of any works below grade, a detailed basement impact assessment (BIA)(prepared following guidance in Southwark's Strategic Flood Risk Assessment 2017 or any replacement thereof) shall be submitted to the local planning authority for approval in writing identifying existing groundwater levels, flows and fluctuations, if appropriate, demonstrating that appropriate mitigation measures are integrated into the basement design to prevent groundwater flooding. The development shall proceed in accordance with any approval given and any mitigation measures shall be retained and maintained in perpetuity.

Reason:

To minimise the potential for the site to contribute to changes in groundwater conditions and any subsequent flooding in accordance with Southwark's SFRA, saved policy 3.9 'Water' of the Southwark Plan (2007), Strategic Policy 13 'High environmental standards' of the Core Strategy (2011), Policy 5.12 'Flood Risk Management' of the London Plan 2016 and the National Planning Policy Framework 2019.

17. Sustainable drainage

Prior to the commencement of development (excluding demolition), a detailed surface water drainage strategy shall be submitted to the local planning authority for approval in writing (in consultation with Thames Water and the Environmental Agency) setting out the range of sustainable drainage measures to be implemented across this part of the site to deliver a reduction in surface water runoff to greenfield rates for storm events up to a 1% annual exceedance probability plus climate change allowance, unless it can be demonstrated that discharge to a local waterbody justifies a higher runoff rate. The development shall proceed in accordance with any approval granted.

Reason:

To minimise the potential of the site to contribute to surface water flooding in accordance with Saved Policy 3.9 'Water' of the Southwark Plan (2007), Strategic Policy 13 'High environmental standards' of the Core Strategy (2011), Policy 5.12 'Flood Risk Management' of the London Plan 2016 and the National Planning Policy Framework 2019.

18. Archaeology

- a) Before any work hereby authorised begins on Development Plots A1, A2, K1 or the IPFS, the applicant shall secure the implementation of a programme of archaeological and geoarchaeological investigation work for that Plot in accordance with a written scheme of investigation which shall be submitted to and approved in writing by the Local Planning Authority.
- b) Before any work hereby authorised begins, the applicant shall secure the implementation of a programme of archaeological mitigation works in accordance with a written scheme of investigation, which shall be submitted to and approved in writing by the Local Planning Authority.

Reason:

In order that the archaeological operations are undertaken to an acceptable standard, that legitimate archaeological interest in the site is satisfied and that any programme of works is appropriate and responds to the extent and nature of any archaeological remains on site in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011, Saved Policy 3.19 Archaeology of the Southwark Plan 2007 and the National Planning Policy Framework 2019.

19. Tree Protection Measures

Prior to works commencing, including any demolition, an Arboricultural Method Statement including an Arboricultural Survey shall be submitted to and approved in writing by the Local Planning Authority.

a) A pre-commencement meeting shall be arranged, the details of which shall be notified to the Local Planning Authority for agreement in writing prior to the meeting and prior to works commencing on site, including any demolition, changes to ground levels, pruning or tree removal.

b) A detailed Arboricultural Method Statement showing the means by which any retained trees on or directly adjacent to the site are to be protected from damage by demolition works, excavation, vehicles, stored or stacked building supplies, waste or other materials, and building plant, scaffolding or other equipment, shall then be submitted to and approved in writing by the Local Planning Authority. The method statements shall include details of facilitative pruning specifications and a supervision schedule overseen by an accredited arboricultural consultant.

c) Cross sections shall be provided to show surface and other changes to levels, special

engineering or construction details and any proposed activity within root protection areas required in order to facilitate demolition, construction and excavation.

The existing trees on or adjoining the site which are to be retained shall be protected and both the site and trees managed in accordance with the recommendations contained in the method statement. Following the pre-commencement meeting all tree protection measures shall be installed, carried out and retained throughout the period of the works, unless otherwise agreed in writing by the Local Planning Authority. In any case, all works must adhere to BS5837: (2012) Trees in relation to demolition, design and construction and BS3998: (2010) Tree work - recommendations.

If within the expiration of 5 years from the date of the occupation of the building for its permitted use any retained tree is removed, uprooted is destroyed or dies, another tree shall be planted at the same place and that tree shall be of such size and species, and shall be planted at such time, as may be specified in writing by the Local Planning Authority.

Reason

To avoid damage to the existing trees which represent an important visual amenity in the area, in accordance with Saved Policies 3.2 Protection of amenity; Policy 3.12 Quality in Design; Policy 3.13 Urban Design and Policy 3.28 Biodiversity Saved Policies of The Southwark Plan 2007, Strategic Policies SP11 'Open spaces and nature conservation', SP12 'Design and conservation' 13 'High Environmental Standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

20. Cycle parking – Plots A1 & A2

Prior to first occupation of the Phase 1 building(s) hereby granted, detailed 1:50 drawings of the secure, convenient and weatherproof long and short stay cycle parking and ancillary facilities for storage and/or maintenance shall be submitted to and approved in writing by the Local Planning Authority. For the avoidance of doubt, all staircases serving basement cycle stores will be sized and configured to facilitate the convenient manoeuvring of cycles, including gullies being fitted in all cases.

Thereafter the cycle parking facilities provided shall be retained and the space used for no other purpose and the development shall not be carried out otherwise in accordance with any such approval given.

Reason

In order to ensure that satisfactory safe and secure cycle parking and changing facilities are provided and can be easily accessed by users in order to encourage the use of cycling as an alternative means of transport to the development and to reduce reliance on the use of the private car in accordance with Part 9 of the National Planning Policy Framework 2018, Strategic Policy 2 'Sustainable Transport' of The Core Strategy 2011 and Saved Policy 5.3 'Walking and Cycling' of the Southwark Plan 2007.

21. Erection of Cranes

No cranes or scaffolding shall be erected for each phase unless and until construction methodology and diagrams clearly presenting the location, maximum operating height, radius and start/finish dates for the use of cranes during the Development has been submitted to and approved by the Local Planning Authority (in consultation with London City Airport). The development shall proceed in accordance with any approval given.

Reason:

In the interests of aircraft safety

Commencement of works above grade - the details required to be submitted for approval by the condition(s) listed below must be submitted to and approved by the council before any work above grade is commenced. The term 'above grade' here means any works above ground level.

22. Radar Mitigation Strategy – Plot A1

No works above grade shall be undertaken on Development Plot A1 until a Radar Mitigation Scheme (RMS) has been approved in writing with the Local Planning Authority (in consultation with NATS). The approved RMS shall be implemented in full and no later than the construction progressing above 80m AOD.

Reason:

In the interests of aircraft safety and the operations of NATS En-route PLC.

23. Samples panel and mock-ups

Prior to commencement of works above grade, sample panels of all external facing materials to be used in the construction of the building(s) within an individual Plot shall be presented on site (or an alternative location agreed with the local planning authority) and a detailed schedule of such materials submitted to the local planning authority for approval in writing.

For Development Plots A2 and K1, this shall include 1m x 1m sample panels of all cladding materials including bond, coursing and jointing finishes and details

For Development Plot A1, a full-scale mock-up of the principal elements of the facades shall be constructed and presented on-site. A detailed plan of the mock-up should be agreed with the local planning authority prior to the construction of the mock-up.

The development shall not proceed other than in accordance with any such approval given.

Reason:

In order that the local planning authority can be satisfied that the consented development will be delivered to a high quality and makes an appropriate contextual response to the site in accordance with Saved Policy 3.12 'Quality in design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011), Policies 7.4 'Local character' and 7.6 'Architecture' of the London Plan (2016) and the National Planning Policy Framework (2019).

24. Detailed section drawings

Prior to the commencement of works above grade (excluding cores), typical section drawings at a scale of 1:5/1:10 through the following building elements shall be submitted to the local planning authority for approval in writing:

- The facades
- Shopfronts
- Parapets and roof edges
- Balconies
- Entrances to internal servicing yards
- Heads, cills and jambs of all openings

The development shall not be carried out other than in accordance with any such approval given.

Reason:

In order that the Local Planning Authority may be satisfied that the consented buildings will be constructed with the necessary level of technical expertise to achieve the high quality architecture presented in the application material in accordance with Saved Policy 3.12 'Quality in design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011), Policies 7.4 'Local character' and 7.6 'Architecture' of the London Plan (2016) and the National Planning Policy Framework (2019).

25. Top of the tower – Plot A1

No development above grade (excluding cores) shall commence until detailed plans, sections and elevations at a scale of 1:20/1:50 of the top three storeys of each of the tower elements of Plot A1 have been submitted to the Local Planning Authority for approval in writing.

Reason:

To ensure the detailed design of the tower elements demonstrate the special architectural quality required given the impact of these buildings on the London skyline in accordance with Saved Policies 3.12 'Quality in design' and 3.13 'Urban design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011), Policy 7.6 'Architecture' of the London Plan (2016) and the National Planning Policy Framework 2019.

26. Ghost sign – Plot K1

Prior to Construction Works Above Grade being carried out for Development Plot K1, detailed drawings to show the location, size, appearance and material(s) of any "ghost sign" to be applied to the façade shall be submitted to the Local Planning Authority for approval in writing. The development shall not be carried out other than in accordance with any such approval given.

Reason:

In order that the local planning authority can be satisfied that the consented development will be delivered to a high quality, in accordance with Saved Policy 3.12 'Quality in design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011) and Policies 7.4 'Local character' and 7.6 'Architecture' of the London Plan (2016), and the National Planning Policy Framework (2019).

27. Hard and soft landscaping

Before any above grade work hereby authorised begins, detailed drawings of a hard and soft landscaping scheme for all areas of the site not covered by buildings and, specifically:

- Development Plot A1 roof gardens
- Development Plot A2 planted terraces
- Dock Office Courtyard
- Dock Office Walk
- Development Plot K1 courtyard

Shall be submitted to the local planning authority for approval in writing. Details will include cross sections and plans, detailed planting specifications, surfacing materials of any parking, access or pathways layouts, materials, design of play space and equipment, details of sustainable drainage or other water features and details of the treatment of any edges/boundaries or other means of enclosure. Details shall be provided of the intended maintenance regime for all areas of landscaping.

The landscaping shall not be carried out otherwise than in accordance with any such approval given and shall be retained and maintained for the duration of the use.

The planting, seeding and/or turfing shall be carried out in the first planting season following completion of building works and any trees or shrubs that is found to be dead, dying, severely damaged or diseased within five years of the completion of the building works OR five years of the carrying out of the landscaping scheme (whichever is later), shall be replaced in the next planting season by specimens of the same size and species in the first suitable planting season. Planting shall comply to BS: 4428 Code of practice for general landscaping operations, BS: 5837 (2012) Trees in relation to demolition, design and construction and BS 7370-4:1993 Grounds maintenance Recommendations for maintenance of soft landscape (other than amenity turf).

Reason:

So that the Council may be satisfied with the details of the landscaping scheme in accordance with The National Planning Policy Framework 2019 Chapters 8, 12, 15 & 16 and policies of The Core Strategy 2011: SP11 Open spaces and wildlife; SP12 Design and conservation; SP13 High environmental standards, and Saved Policies of The Southwark Plan 2007: Policy 3.2 Protection of amenity; Policy 3.12 Quality in Design; Policy 3.13 Urban Design and Policy 3.28 Biodiversity

28. Brown roofs – Plot K1

Before any works above grade in relation to Plot K1, detailed plans, sections and specifications for the brown roofs to be installed on the principal K1 building and associated plant room shall

be submitted the local planning authority for approval in writing. Details shall include :

- The depth of substrate (to be a minimum of 100mm);
- The incorporation of measures to maximise the habitat value of the roof;
- That an appropriate management and maintenance regime is in place.

These roofs will not be used as recreational spaces and access will be limited to essential maintenance or escape in the case of emergency.

Reason:

To ensure the development provides the maximum possible provision towards creation of habitats and valuable areas for biodiversity in accordance with Saved Policy 3.28 of the Southwark Plan (2007), Strategic Policy 11 'Open Space and Nature Conservation' of the Core strategy (2011) and Policies 5.10 'Urban Greening' and 5.11 'Green roofs and development site environs' of the London Plan 2016.

29. Biodiversity, habitat and ecology

Prior to the commencement of works above grade, details shall be submitted to demonstrate the integration of the following habitat features within the specified Development Plots:

Development Plot A1

20x swift bricks on the eastern elevation

Development Plot A2

9x swift bricks (to be located under the eaves on the eastern elevation)

6x sparrow terraces (to be located under the eaves on the rear section of the building)

12x bat tubes (facing Canada Water on the north-east elevation)

Development Plot K1

12x swift bricks (on the end of each flank of the courtyard, facing the Woodland)

10x sparrow terraces (to be located beneath the eaves on the woodland facing elevation)

12x bat tubes (three on each elevation)

The measures shall be installed prior to occupation and retained and maintained thereafter.

Reason:

To ensure the proposal protects and enhances biodiversity in accordance with Saved Policy 3.28 'Biodiversity' of the Southwark Plan (2007), Strategic Policy SP11 'Open Spaces and wildlife' of the Core Strategy (2011) and Policy 7.19 ' Biodiversity and access to nature' of the London Plan (2016).

30. Security measures

Before any above grade work hereby authorised begins, details of security measures, including any CCTV, shall be submitted to the Local Planning Authority for approval in writing. Any such security measures shall be implemented/installed prior to the occupation of the buildings hereby consented in accordance with the approved details, which shall seek to achieve the 'Secured by Design' accreditation award from the Metropolitan Police.

Reason:

In pursuance of the Local Planning Authority's duty under section 17 of the Crime and Disorder Act 1998 to consider crime and disorder implications in exercising its planning functions and to improve community safety and crime prevention in accordance with The National Planning Policy Framework 2018, Strategic Policy 12 'Design and conservation' of The Core Strategy 2011 and Saved Policy 3.14 'Designing out crime' of the Southwark plan 2007.

31. Shopfront design

Prior to the carrying out works above grade for any Development in Plots A1 or A2, details of the design code for the proposed retail frontages facing streets, routes and public spaces (including shopfront design(s), advertisement zones, ventilation grilles, awnings and spill out zones) shall be submitted to the Local Planning Authority for approval in writing. The development shall be implemented in accordance with the approved details.

Reason:

To ensure that the quality of the design and details are in accordance with Saved Policies 'Quality in design' and 'Urban design' of the Southwark Plan (2007), Strategic Policy 12 'Design and conservation' of the Core Strategy (2011) and the National Planning Policy Framework (2019).

32. Cycle parking – Plot K1

Prior to works above grade in relation to Development Plot K1, detailed 1:50 drawings of the secure, convenient and weatherproof long and short stay cycle parking and associated facilities shall be submitted to and approved in writing by the Local Planning Authority. For the avoidance of doubt, this shall include measures to enhance the security of the external courtyard cycle store. Thereafter the cycle parking facilities provided shall be retained and the space used for no other purpose and the development shall not be carried out otherwise in accordance with any such approval given.

Reason

In order to ensure that satisfactory safe and secure cycle parking and changing facilities are provided and can be easily accessed by users in order to encourage the use of cycling as an alternative means of transport to the development and to reduce reliance on the use of the private car in accordance with Part 9 of the National Planning Policy Framework 2018, Strategic Policy 2 'Sustainable Transport' of The Core Strategy 2011 and Saved Policy 5.3 'Walking and Cycling' of the Southwark Plan 2007.

33. BREEAM

- a) Prior to commencement of fit out works to Development Plots A1/A2 of the development, an independently verified BREEAM report (detailing performance in each category, overall score, BREEAM rating and a BREEAM certificate of building performance) demonstrating that all reasonable steps have been undertaken to achieve a minimum accreditation of BREEAM 'Excellent' rating for the workspace and retail elements of the buildings and BREEAM "Very Good" for the leisure centre shall be submitted to the Local Planning Authority for approval in writing and the development shall not be carried out otherwise than in accordance with any such approval given;
- b) Before the first occupation of these Development Plots, a certified Post Construction Review (or other verification process agreed with the local planning authority) shall be submitted to and approved in writing by the Local Planning Authority, confirming that the agreed standards at (a) have been met.

Reason:

To ensure the proposal is completed to the highest possible standards of environmental sustainability in accordance Section 14 of The National Planning Policy Framework 2018, Policy 5.3 'Sustainable design and construction' of the London Plan 2016, Strategic Policy 13 'High Environmental Standards' of The Core Strategy 2011 and Saved Policies 3.3 'Sustainability' and 3.4 'Energy Efficiency' of the Southwark Plan 2007.

34. Tower obstruction lighting scheme – Plot A1

Prior to commencement of works above grade for Plot A1, a scheme of obstruction lighting for the A1 tower building shall be submitted to the Local Planning Authority (in consultation with London City Airport) . The development shall be carried out in accordance with any approval given and the lighting retained and maintained in perpetuity unless otherwise agreed in writing by the Local Planning Authority.

Reason:

To ensure that tall building are appropriately illuminated to aid visibility for aircraft without contributing to glare in accordance with guidance issued by the Civil Aviation Authority, London Plan Policy 7.7 and the National Planning Policy Framework 2019.

Pre-occupation condition(s) - the details required to be submitted for approval by the condition(s) listed below must be submitted to and approved by the council before the building(s) hereby permitted are occupied or the use hereby permitted is commenced.

35. External/artificial lighting – public realm

Prior to occupation of any Development Plot, details of any external lighting (including design, specification, power) to be installed in any adjoining public realm shall be submitted to the local planning authority for approval in writing. Submitted details shall include lighting contours to demonstrate lighting intensity levels at any nearby sensitive residential or ecological receptors, having regard to guidance published by the Institute of Lighting Professionals (ILE), where relevant.

Reason:

In order that the council may be satisfied that external lighting is appropriate designed and located to balance the safe illumination of the public realm with the amenity of existing/future residential occupiers and important ecological receptors, including pathways for migrating bats, in accordance with Saved Policies 3.2 'Protection of amenity', 3.14 'Designing out crime' and 3.28 'Biodiversity' of the Southwark Plan (2007), Strategic Policies SP10 'Open Spaces and wildlife, SP12 'Design and conservation' and SP13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019

External artificial lighting – buildings

- 36.** Prior to occupation of the building within a Development Plot, details of any external lighting (including design, specification, power) to be affixed to the building(s) shall be submitted to the local planning authority for approval in writing. Submitted details shall include lighting contours to demonstrate lighting intensity levels at any nearby sensitive residential or ecological receptors, having regard to guidance published by the Institute of Lighting Professionals (ILE), where relevant.

Reason:

In order that the council may be satisfied that external lighting is appropriate designed and located to balance the safe illumination of the public realm with the amenity of existing/future residential occupiers and important ecological receptors, including pathways for migrating bats, in accordance with Saved Policies 3.2 'Protection of amenity', 3.14 'Designing out crime' and 3.28 'Biodiversity' of the Southwark Plan (2007), Strategic Policies SP10 'Open Spaces and wildlife, SP12 'Design and conservation' and SP13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019

37. Information board and Sculpture

Prior to Construction Works Above Grade in Development Zone A, details of any works to relocate and re-install the heritage information plaque on the dock railings, and the statue of deal porters within the dock shall be submitted to the local planning authority for approval in writing. The heritage information plaque and statue shall be re-installed in accordance with any such approval given.

Reason:

To ensure these local heritage features are incorporated suitably within the development, in accordance with Strategic Policy 12 'Design and conservation' of the Core Strategy (2011) and the National Planning Policy Framework (2019).

38. Noise from Plant – Plots A1 and A2

The Rated sound level from any plant, together with any associated ducting shall not exceed the Background sound level (LA90 15min) at the nearest noise sensitive premises. Furthermore, the Specific plant sound level shall be 10dB(A) or more below the background sound level in this location. For the purposes of this condition the Background, Rating and Specific Sound levels shall be calculated fully in accordance with the methodology of BS4142:2014.

Prior to the occupation of each Development Plot, a validation test shall be carried out and the results submitted to the Local Planning Authority for approval in writing to demonstrate

compliance with the above standard.

Reason:

To ensure that occupiers of neighbouring premises do not suffer a loss of amenity by reason of noise nuisance or the local environment from noise creep due to plant and machinery in accordance with the National Planning Policy Framework 2012, Strategic Policy 13 High Environmental Standards of the Core Strategy 2011 and Saved Policy 3.2 Protection of Amenity of the Southwark Plan (2007).

39. Noise from Plant – K1

The combined noise level from the Development Plot K1 energy centre shall not exceed a Rating level of 40dB during the hours of 07.00-23.00 and 30dB during the hours of 23.00-07.00 when measured externally at any sensitive receptor. The rating level shall be calculated in accordance with the methodology of BS4142:2014.

Prior to occupation of the dwellings in Development Plot K1, a validation assessment shall be submitted to and approved by the local planning authority to demonstrate compliance with the above standard.

Reason:

To ensure that occupiers of neighbouring premises do not suffer a loss of amenity due by reason of excess noise due to plant and machinery in accordance with Saved Policy 3.2 'Protection of Amenity' of the Southwark Plan (2007), Strategic Policy 13 'High Environmental Standards' of the Core Strategy 2011 and the National Planning Policy Framework 2019.

40. Internal noise levels for new homes

The dwellings hereby permitted in Development Plots A1 and K1 shall be designed to ensure that the following internal noise levels are not exceeded due to environmental noise:

Bedrooms - 35dB LAeq T†, 30 dB LAeq T*, 45dB LAFmax T *
Living rooms- 35dB LAeq T †
Dining room - 40 dB LAeq T †

* - Night-time - 8 hours between 23:00-07:00

† - Daytime - 16 hours between 07:00-23:00

Prior to occupation of any Development Plots A1 and K1 (respectively), a report shall be submitted to the local planning authority for approval in writing demonstrating that the above standards have been achieved having carried out a validation test on a relevant sample of properties (minimum 10%). The building(s) shall not be occupied until such time as the submitted details are approved and any measures required, implemented or installed in order to achieve the above standards shall be maintained permanently thereafter.

Reason

To ensure that the occupiers and users of the development do not suffer a loss of amenity by reason of excess noise from environmental and transportation sources in accordance with Saved policies 3.2 'Protection of amenity' and 4.2 'Quality of residential accommodation' of the Southwark Plan (2007), Strategic Policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

41. Noise transfer between commercial and residential elements – Plot A1

The habitable rooms within Development Plot A1 sharing a party ceiling/floor with workspace (use class B1) or retail (use classes A1-A5) uses hereby permitted shall be designed and constructed to provide reasonable resistance to the transmission of sound sufficient to ensure that noise from the commercial activities does not exceed NR20.

Prior to occupation of the residential or commercial elements of Plot A1, a validation test shall be undertaken and the results submitted to the Local Planning Authority for approval in writing to demonstrate that this standard has been achieved.

Reason:

To ensure that the occupiers and users of the development do not suffer a loss of amenity by reason of excess noise from environmental and transportation sources in accordance with Saved policies 3.2 'Protection of amenity' and 4.2 'Quality of residential accommodation' of the Southwark Plan (2007), Strategic Policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

42. Ventilation/Extraction from Leisure Centre – Plot A2

The Leisure Centre use hereby permitted in Plot A2 shall not be begun until full particulars and details of a scheme of extraction ventilation for the pool and pool plant have been submitted to the local planning authority for approval in writing. The scheme shall include details of discharge height and location and the technical specification of the extraction system and shall demonstrate that there shall be no impact on residential amenity from extracted air or odours. The development shall be carried out in accordance with the approval given.

Reason

In order that the Local Planning Authority may be satisfied that the ventilation, ducting, filtration/treatment and ancillary equipment is incorporated as an integral part of the development in the interests of residential amenity in accordance with Strategic Policy 13 – High Environmental Standards of the Core Strategy 2011 and saved policy 3.2 Protection of Amenity of the Southwark Plan 2007.

43. Kitchen extract systems – Plots A1 and A2

Prior to the commencement of the use of any Class A3 ('restaurants and cafes') or Class A5 ("Hot food takeaways") units, details of kitchen extract systems including the routing of any ducting shall be provided and shall demonstrate that high level discharge is achieved and away from any intake locations. Details of odour & grease filtration systems required to supplement high level discharges shall be provided to reduce odour to acceptable levels.

Reason

In order to ensure that that the ventilation ducting and ancillary equipment will not result in an odour, fume or noise nuisance to nearby sensitive receptors or at street level and will not detract from the appearance of the building in the interests of amenity in accordance with The National Planning Policy Framework 2019, Strategic Policy 13 High Environmental Standards of the Core Strategy 2011 and Saved Policy 3.2 Protection of Amenity of The Southwark Plan 2007.

44. Communal satellite system

No Building shall be occupied until details of any communal satellite (or other equivalent) system to be placed on the top of the Building has been submitted to and approved in writing by the Local Planning Authority and the development shall not be carried out otherwise than in accordance with any such approval given.

Reason

To restrict the installation of multiple satellite dishes to the elevations of the buildings to ensure that the elevations and roof profile remain free from unsightly satellite dishes and associated telecommunications infrastructure in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011 and Saved Policies 3.12 Quality in Design of the Southwark Plan 2007.

45. Waste Management

Before the first occupation of each of the Development Plot details of the arrangements for the storage, compaction and collection of refuse and recycling for all consented uses shall be submitted to the Local Planning Authority for approval in writing and the facilities approved shall be provided and made available for use by the occupiers of the commercial premises and the facilities shall thereafter be retained and shall not be used or the space used for any other purpose.

Reason

To ensure that the refuse will be appropriately stored within the site and located to facilitate

convenient collection thereby protecting the amenity of the site and the area in general from litter, odour and potential vermin/pest nuisance in accordance with The National Planning Policy Framework 2018, Strategic Policy 13 'High Environmental Standards' of the Core Strategy 2011 and Saved Policies 3.2 'Protection of Amenity' and 3.7 'Waste Reduction' of The Southwark Plan 2007

Other condition(s) - the following condition(s) are to be complied with and discharged in accordance with the individual requirements specified in the condition(s).

46. Contamination – Unexpected Contaminants

In the event that contamination is found at any time when carrying out the approved development that was not previously identified, it shall be reported in writing immediately to the Local Planning Authority, and a scheme of investigation and risk assessment, a remediation strategy and verification report (if required) shall be submitted to the Local Planning Authority for approval in writing.

Reason:

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

47. Archaeological reporting

Within six months of the completion of archaeological site works, an assessment report detailing the proposals for post-excavation works, publication of the site and preparation of the archive shall be submitted to and approved in writing by the Local Planning Authority and that the works detailed in this assessment report shall not be carried out otherwise than in accordance with any such approval given.

Reason

In order that the archaeological interests of the site are secured with regard to the details of the post-excavation works, publication and archiving to ensure the preservation of archaeological remains by record in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011, Saved Policy 3.19 Archaeology of the Southwark Plan 2007 and the National Planning Policy Framework 2019.

Compliance condition(s) - the following condition(s) impose restrictions and/or other requirements that must be complied with at all times in relation to each Development Plot.

48. Accessible housing

A minimum of 10% of the dwellings hereby consented shall be delivered as M4(3) 'wheelchair user dwellings' as defined in Approved Document M of the Building Regulations and the remaining units shall all be designed to achieve the M4(2) 'accessible and adaptable' accessibility standard

Reason:

In order to ensure that new housing can be easily adapted to meet the changing needs of occupiers and that a suitable proportion of units conform to the specific needs of wheelchair users in accordance with Strategic Policy SP5 'Providing New Homes' of the Core Strategy (2011) and Policy 3.8 'Housing Choice' of the London Plan 2016

49. Use of communal amenity spaces and facilities

All residents within an individual Building shall be permitted equal access to any communal amenity spaces proposed to serve residents of that Building

Reason:

To ensure all residents have adequate and equitable access to high quality communal amenity space in accordance with Saved policy 4.2 'Quality of Accommodation' of the Southwark Plan (2007) and the 2015 Technical Update to the Residential Design Standards SPD 2011.

50. Use of external terraces – Plot A2

The private roof terrace at 6th floor level of Development Plot A2 shall not be used, other than for maintenance/repair purposes or means of escape between the hours of 22:00-08:00.

The terraces on the stepped-elevation of Development Plot A2 on the boundary with Hothfield Place shall not be used as recreational spaces by occupiers of the A2 building at any time other than for maintenance/repair purposes or means of escape.

Reason

To ensure that occupiers of neighbouring premises do not suffer a loss of amenity by reason of noise nuisance in accordance with Strategic Policy 13 High Environmental Standards of the Core Strategy 2011, Saved Policy 3.2 Protection of Amenity of the Southwark Plan (2007), and the National Planning Policy Framework 2018.

51. Wind mitigation measures – A1 terraces

The wind mitigation measures cited in the Design and Access Statement – Volume III Addendum Plot A1 (October 2018) and Pedestrian Level Wind Microclimate Assessment in the Environmental Statement Addendum (October 2018), including targeted planting, balustrades and pergolas, shall be incorporated into the detailed design of the roof terraces for Development Plot A1 and such features shall be retained and maintained in perpetuity unless otherwise agreed in writing with the local planning authority.

52. Disabled car parking

Prior to first occupation of the Development Plot A2, 2x disabled parking spaces shall be delivered and made available for commercial occupants as shown on approved plan A-099/Rev1; and

Prior to first occupation of Development Plot K1, 4x disabled parking spaces shall be delivered and made available for residential occupiers as shown on approved plan A-(01)110/RevP1

This parking provision shall be retained for the purposes of car parking for the disabled for as long as the development is occupied.

Reason

To ensure that the parking spaces for disabled people are provided and retained in accordance with The National Planning Policy Framework 2018, Strategic Policy 2 'Sustainable Transport' of The Core Strategy 2011 and Saved Policy 5.7 'Parking standards for disabled people and the mobility impaired' of the Southwark Plan 2007.

53. Protection from Vibration

The development must be designed to ensure that habitable rooms in the residential element of the development are not exposed to vibration dose values in excess of 0.13 m/s during the night-time period of 23.00 – 07.00hrs or re-radiated noise in excess of 35dB LASmax.

Reason

To ensure that the occupiers and users of the proposed development do not suffer a loss of amenity by reason of excess vibration from transportation sources in accordance with strategic policy 13 'High environmental standards' of the Core Strategy (2011), saved Policy 3.2 Protection of Amenity of the Southwark Plan (2007) and the National Planning Policy Framework 2019.

54. Emergency Plant Noise Test Limits

Routine testing of emergency plant shall only take place during the hours of 09.00 to 17.00 Monday to Friday and not on any public holiday. The combined noise level from emergency plant shall not exceed 60dB(A) at any sensitive façade.

Reason:

To ensure that the occupiers and users of the development do not suffer a loss of amenity by reason of excess noise in accordance with Saved policies 3.2 'Protection of amenity' and 4.2 'Quality of residential accommodation' of the Southwark Plan (2007), Strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

55. Potable Water

All residential units shall be designed and constructed to achieve a potable water use target of 105L per person per day

Reason:

To conserve water in accordance with Saved Policy 3.9 'Water' of the Southwark Plan (2007), Strategic Policy SP13 'High Environmental Standards' of the Core Strategy (2011) and the council's Sustainable Design and Construction SPD (2009)

56. Hours of use for retail units – Development Plots A1 and A2

The permitted hours of use for the retail uses (Use class A1-A5) in Plots A1 and A2 shall operate between 6am and 12am unless otherwise agreed in writing with the Local Planning Authority

Reason:

In order that the ambition to broaden the vitality of the Town Centre at Canada Water does not conflict with the need to protect residential amenity in accordance with Saved Policy 3.2 'Protection of amenity' of the Southwark Plan (2007) and the National Planning Policy Framework 2019.

57. No roof top structures beyond that shown on plans

No roof plant, equipment or other structures other than as approved pursuant to a condition of this permission shall be placed on a roof or be permitted to project above the roofline of any part of the building(s) or shall be permitted to extend outside of any roof plant enclosure(s) of any building(s) without the prior written consent of the Local Planning Authority.

Reason:

In order to ensure that roof top plant does not detract from the appearance of the buildings hereby consented, does not detract from the visual amenity of the area and does not infringe or harm protected viewing corridors passing over the application site in accordance with Saved Policies 3.2 'Protection of Amenity', 3.12 'Quality in design' and 3.13 'Urban design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and conservation' of the Core Strategy (2011).

58. Removal of office PD rights

Notwithstanding the provisions of Schedule 2 Part 7 Class F of the Town and Country Planning (General Permitted Development) Order 2015 (as amended or re-enactment thereof), no extension nor alteration of an office building shall be carried out.

Reason:

To safeguard the character and the amenities of the premises and adjoining properties in accordance with Strategic Policies 12 'Design and conservation' and 13 'High environmental standards' of the Core Strategy (2011), and Saved Policies 3.2 'Protection of amenity' and 3.12 'Quality in design' of the Southwark Plan (2007) and the National Planning Policy Framework (2019).

The Development (excluding the Phase 1 Development)

The following conditions shall be discharged for each individual Development Zone and/or Plot that is the subject of its own Reserved Matters Application.

Pre-commencement conditions - the details required to be submitted for approval by the condition(s) listed below must be submitted to and approved by the council before any work in connection with implementing this permission is commenced.

59. Contamination – Site Investigations

Prior to the commencement of any Development Phase, a Phase 2 site investigation and risk assessment shall be conducted in accordance with the approved Phase 1 desk-based assessment detailed in the approved Environmental Statement. The results of the Phase 2 investigation shall be submitted to the Local Planning Authority for approval in writing prior to the commencement of any remediation that might be required.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

60. Contamination – Remediation

In the event that contamination is present, a detailed remediation strategy to bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and the natural and historical environment shall be prepared and submitted to the Local Planning Authority for approval in writing. The scheme shall ensure that the site would not qualify as contaminated land under Part 2A of the Environmental Protection Act 1990 in relation to the intended use of the land after remediation. The approved remediation scheme (if one is required) shall be carried out in accordance with its terms prior to the commencement of development other than that required to carry out remediation, unless otherwise agreed in writing by the Local Planning Authority. The Local Planning Authority shall be given two weeks written notification of commencement of the remediation scheme works.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

61. Contamination – Verification

Following the completion of the measures identified in the approved remediation strategy, a verification report providing evidence that all work required by the remediation strategy has been completed shall be submitted to and approved in writing by the Local Planning Authority.

Reason

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

62. Piling and foundation design

Prior to the commencement of any Development Plot (excluding demolition), details of the proposed piling method and foundation design shall be submitted to the local planning authority

for approval in writing (in consultation with the Environment Agency) to demonstrate that there is no resultant unacceptable risk to groundwater. The development shall be carried out in accordance with the approved details.

Reason:

Piling can create pathways for contaminants and this presents a risk to underlying controlled waters unless appropriate methodologies and mitigation are utilised in accordance with Strategic Policy SP13 'High Environmental Standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

63. Tunnel protection measures

The development hereby permitted shall not be commenced until detailed design and method statements (in consultation with London Underground) for each stage of the development affecting London Underground assets for demolition, foundations, basement and ground floor structures, or for any other structures below ground level, including piling (temporary and permanent), have been submitted to and approved in writing by the local planning authority which:

- provide details on all structures;
- provide details on the use of tall plant/scaffolding;
- accommodate the location of the existing London Underground structures and tunnels;
- accommodate ground movement arising from the construction thereof;
- and mitigate the effects of noise and vibration arising from the adjoining operations within the structures and tunnels.

The development shall thereafter be carried out in all respects in accordance with the approved design and method statements, and all structures and works comprised within the development hereby permitted which are required by the approved design statements in order to procure the matters mentioned in paragraphs of this condition shall be completed, in their entirety, before any part of the building hereby permitted is occupied.

Reason:

To ensure that the development does not impact on existing London Underground transport infrastructure, in accordance with London Plan 2016 Table 6.1, draft London Plan policy T3 and 'Land for Industry and Transport' Supplementary Planning Guidance 2012.

64. Basement impact/groundwater flooding

Prior to the commencement of any works below grade in relation to a Development Plot containing a basement, a detailed basement impact assessment (BIA)(prepared following guidance in Southwark's Strategic Flood Risk Assessment 2017 or any replacement thereof) shall be submitted to the local planning authority for approval in writing identifying existing groundwater levels, flows and fluctuations and, if appropriate, demonstrating that appropriate mitigation measures are integrated into the basement design to prevent groundwater flooding. The development shall proceed in accordance with any approval given and any mitigation measures shall be retained and maintained in perpetuity.

Reason:

To minimise the potential for the site to contribute to changes in groundwater conditions and any subsequent flooding in accordance with Southwark's SFRA, saved policy 3.9 'Water' of the Southwark Plan (2007), Strategic Policy 13 'High environmental standards' of the Core Strategy (2011), Policy 5.12 'Flood Risk Management' of the London Plan 2016 and the National Planning Policy Framework 2019.

65. Sustainable Drainage

Prior to the commencement of any Development Plot (excluding demolition), a detailed surface water drainage strategy shall be submitted to the local planning authority for approval in writing (in consultation with Thames Water and the Environmental Agency) setting out the range of sustainable drainage measures to be implemented across this part of the site to deliver a reduction in surface water runoff to greenfield rates for storm events up to a 1% annual exceedance probability, unless it can be demonstrated that discharge to a local waterbody justifies a higher runoff rate. The development shall proceed in accordance with any approval

granted.

Reason:

To minimise the potential for the site to contribute to surface water flooding in accordance with Policy 5.12 'Flood risk management' of the London Plan 2016, Strategic policy 13 'High environmental standards' of the Core Strategy 2011, saved policies 3.1 'Environmental effects' and 3.9 'Water' of the Southwark Plan and guidance in the Sustainable Design and Construction SPD 2009.

66. Archaeology Evaluation

Before any work hereby authorised begins (excluding demolition) in Development Zones B, C, F, G, J, M, N or P, the applicant shall secure the implementation of a programme of archaeological and geoarchaeological investigation works in accordance with a written scheme of investigation shall be submitted to and approved in writing by the Local Planning Authority.

Reason

In order that the applicants supply the necessary archaeological information to ensure suitable mitigation measures and/or foundation design proposals be presented in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011, Saved Policy 3.19 Archaeology of the Southwark Plan 2007 and the National Planning Policy Framework 2019.

67. Archaeology Mitigation

Before any work hereby authorised begins (excluding demolition) in Development Zones B, C, F, G, J, M, N or P,, the applicant shall secure the implementation of a programme of archaeological mitigation works in accordance with a written scheme of investigation, which shall be submitted to and approved in writing by the Local Planning Authority.

Reason

In order that the details of the programme of works for the archaeological mitigation are suitable with regard to the impacts of the proposed development and the nature and extent of archaeological remains on site in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011, Saved Policy 3.19 Archaeology of the Southwark Plan 2007 and the National Planning Policy Framework 2019.

68. Archaeological Watching Brief

Before any work hereby authorised begins in Zones D, E, H or L, the applicant shall secure the implementation of a programme of archaeological mitigation works, a watching brief (with the capacity to extend to full excavation if required), in accordance with a written scheme of investigation, which shall be submitted to and approved in writing by the Local Planning Authority.

Reason:

In order that the details of the programme of works for the archaeological mitigation are suitable with regard to the impacts of the proposed development and the nature and extent of archaeological remains on site in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011, Saved Policy 3.19 Archaeology of the Southwark Plan 2007 and the National Planning Policy Framework 2019.

69. Tree Protection Measures

Prior to works commencing in any Development Phase, including any demolition, an Arboricultural Method Statement including an Arboricultural Survey shall be submitted to and approved in writing by the Local Planning Authority.

a) A pre-commencement meeting shall be arranged, the details of which shall be notified to the Local Planning Authority for agreement in writing prior to the meeting and prior to works commencing on site, including any demolition, changes to ground levels, pruning or tree removal.

b) A detailed Arboricultural Method Statement showing the means by which any retained trees on or directly adjacent to the site are to be protected from damage by demolition works,

excavation, vehicles, stored or stacked building supplies, waste or other materials, and building plant, scaffolding or other equipment, shall then be submitted to and approved in writing by the Local Planning Authority. The method statements shall include details of facilitative pruning specifications and a supervision schedule overseen by an accredited arboricultural consultant.

c) Cross sections shall be provided to show surface and other changes to levels, special engineering or construction details and any proposed activity within root protection areas required in order to facilitate demolition, construction and excavation.

The existing trees on or adjoining the site which are to be retained shall be protected and both the site and trees managed in accordance with the recommendations contained in the method statement. Following the pre-commencement meeting all tree protection measures shall be installed, carried out and retained throughout the period of the works, unless otherwise agreed in writing by the Local Planning Authority. In any case, all works must adhere to BS5837: (2012) Trees in relation to demolition, design and construction and BS3998: (2010) Tree work - recommendations.

If within the expiration of 5 years from the date of the occupation of the building for its permitted use any retained tree is removed, uprooted is destroyed or dies, another tree shall be planted at the same place and that tree shall be of such size and species, and shall be planted at such time, as may be specified in writing by the Local Planning Authority.

Reason

To avoid damage to the existing trees which represent an important visual amenity in the area, in accordance with Saved Policies 3.2 Protection of amenity; Policy 3.12 Quality in Design; Policy 3.13 Urban Design and Policy 3.28 Biodiversity Saved Policies of The Southwark Plan 2007, Strategic Policies SP11 'Open spaces and nature conservation', SP12 'Design and conservation' 13 'High Environmental Standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

70. Impact studies of water supply infrastructure

No development in connection within a Plot shall not commence (save for any advance Infrastructure and enabling works or demolition) until impact studies of the existing water supply infrastructure for that Plot have been submitted to and approved in writing by the Local Planning Authority (in consultation with Thames Water).

The studies shall determine the magnitude of any new additional capacity required in the Flow Management Zone and a suitable connection point. The development shall be carried out in accordance with the approved details.

Reason

To ensure that sufficient capacity is made available to cope with new development and in order to avoid adverse environmental impacts on the community, and to ensure that the water supply infrastructure has sufficient capacity to cope with the/this additional demand in accordance with Policy 5.14 Water quality and wastewater infrastructure and Policy 5.13 Sustainable drainage of the London Plan 2011 and Saved Policies 3.1 Environmental Effects and 3.9 Water of the Southwark Plan (2007).

71. Extract/ventilation from basement car parks

Prior to the commencement of works above grade for any Development Plot containing a basement car parking and/or servicing area, details of a scheme of mechanical ventilation for the basement, including plant inlets, filters and outlets shall be submitted to the Local Planning Authority for approval in writing.

The scheme of ventilation shall be installed prior to the first occupation of any Building within the above Development Zones and retained and maintained for the duration of the consented use.

Reason:

To ensure that basement ventilation systems do not adversely impact the amenity of adjoining

uses and/or the quality of the public realm by way of noise and/or odour in accordance with Saved Policy 3.2 'Protection of amenity' of the Southwark Plan (2007), Strategic Policy 13 'High Environmental Standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

Above Grade conditions - the details required to be submitted for approval by the condition(s) listed below must be submitted to and approved by the council before any work above grade is commenced. The term 'above grade' here means any works above ground level.

72. Sample Materials and Mock-ups

Prior to commencement of works above grade, sample panels of all external facing materials to be used in the construction of the building(s) within an individual Plot shall be presented on site (or an alternative location agreed with the local planning authority) and a detailed schedule of such materials submitted to the local planning authority for approval in writing.

For all Buildings within a Development Plot or Zones for which a Reserved Matters Application is submitted, 1m x 1m samples panels of all cladding materials including bond, coursing and jointing finishes and details.

For Development Plots comprising buildings rising to a height in excess of 50m AOD, a full-scale mock-up of the principal elements of the facades shall be constructed and presented on-site. A detailed plan of the mock-up should be agreed with the local planning authority prior to the construction of the mock-up.

The development shall not proceed other than in accordance with any such approval given.

Reason:

In order that the local planning authority can be satisfied that the consented development will be delivered to a high quality and makes an appropriate contextual response to the site in accordance with Saved Policy 3.12 'Quality in design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011), Policies 7.4 'Local character' and 7.6 'Architecture' of the London Plan (2016) and the National Planning Policy Framework (2019).

73. Detailed section drawings

Prior to the commencement of works above grade (excluding cores), typical section drawings at a scale of 1:5/1:10 through the following building elements shall be submitted to the local planning authority for approval in writing:

- The facades
- Shop fronts
- Servicing yard entrances
- Parapets and Roof edges
- Balconies and projecting features
- Heads, cills and jambs of all openings

The development shall not be carried out other than in accordance with any such approval given.

Reason:

In order that the Local Planning Authority may be satisfied that the consented buildings will be constructed with the necessary level of technical expertise to achieve the high quality architecture presented in the application material in accordance with Saved Policy 3.12 'Quality in design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011), Policies 7.4 'Local character' and 7.6 'Architecture' of the London Plan (2016) and the National Planning Policy Framework (2019).

74. Tops of towers

No development above grade (excluding cores) shall commence for any detailed Development Plot containing a tower element of over 100m until detailed plans, sections and elevations at a

scale of 1:20/1:50 of the top three storeys of each of the tower elements have been submitted to the Local Planning Authority and approved in writing. The development shall proceed strictly in accordance with any such approval given.

Reason:

To ensure the detailed design of the tower elements demonstrate the special architectural quality required given the impact of these buildings on the London skyline in accordance with Saved Policies 3.12 'Quality in design' and 3.13 'Urban design' of the Southwark Plan (2007), Strategic Policy SP12 'Design and Conservation' of the Core Strategy (2011), Policy 7.6 'Architecture' of the London Plan (2016) and the National Planning Policy Framework 2019.

75. Shopfront design

Prior to the carrying out works above grade for any Development Phase containing Retail Uses (Use Class A1-A5), details of the design code for the proposed frontage of the retail units facing streets and routes (including shopfront design(s), advertisement zones, ventilation grilles, awnings and spill out zones) shall be submitted to the Local Planning Authority for approval in writing. The development shall be implemented in accordance with the approved details.

Reason:

To ensure that the quality of the design and details are in accordance with Saved Policies 'Quality in design' and 'Urban design' of the Southwark Plan (2007), Strategic Policy 12 'Design and conservation' of the Core Strategy (2011) and the National Planning Policy Framework (2019).

76. External/artificial lighting – public realm

Prior to occupation of any Development Plot or Zone, details of any external lighting (including design, specification, power) to be installed in any adjoining public realm shall be submitted to the local planning authority for approval in writing. Submitted details shall include lighting contours to demonstrate lighting intensity levels at any nearby sensitive residential or ecological receptors, having regard to guidance published by the Institute of Lighting Professionals (ILE), where relevant.

Reason:

In order that the council may be satisfied that external lighting is appropriate designed and located to balance the safe illumination of the public realm with the amenity of existing/future residential occupiers and important ecological receptors, including pathways for migrating bats, in accordance with Saved Policies 3.2 'Protection of amenity', 3.14 'Designing out crime' and 3.28 'Biodiversity' of the Southwark Plan (2007), Strategic Policies SP10 'Open Spaces and wildlife, SP12 'Design and conservation' and SP13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019

77. External artificial lighting – buildings

Prior to occupation of the building within a Development Plot, details of any external lighting (including design, specification, power) to be affixed to the building(s) shall be submitted to the local planning authority for approval in writing. Submitted details shall include lighting contours to demonstrate lighting intensity levels at any nearby sensitive residential or ecological receptors, having regard to guidance published by the Institute of Lighting Professionals (ILE), where relevant.

Reason:

In order that the council may be satisfied that external lighting is appropriate designed and located to balance the safe illumination of the public realm with the amenity of existing/future residential occupiers and important ecological receptors, including pathways for migrating bats, in accordance with Saved Policies 3.2 'Protection of amenity', 3.14 'Designing out crime' and 3.28 'Biodiversity' of the Southwark Plan (2007), Strategic Policies SP10 'Open Spaces and wildlife, SP12 'Design and conservation' and SP13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019

78. Security measures

Before any above grade work hereby authorised begins, details of security measures, including

any CCTV, shall be submitted to the Local Planning Authority for approval in writing. Any such security measures shall be implemented/installed prior to the occupation of the buildings hereby consented in accordance with the approved details, which shall seek to achieve the 'Secured by Design' accreditation award from the Metropolitan Police.

Reason

In pursuance of the Local Planning Authority's duty under section 17 of the Crime and Disorder Act 1998 to consider crime and disorder implications in exercising its planning functions and to improve community safety and crime prevention in accordance with The National Planning Policy Framework 2018, Strategic Policy 12 'Design and conservation' of The Core Strategy 2011 and Saved Policy 3.14 'Designing out crime' of the Southwark plan 2007.

79. Hard and soft landscaping

Before any above grade work hereby authorised begins for any Development Zone and/or Plot, detailed drawings of a hard and soft landscaping scheme for all areas of the site not covered by buildings shall be submitted to the local planning authority for approval in writing.

Details will include cross sections and plans, detailed planting specifications, surfacing materials of any parking, access or pathways layouts, materials, design of play space and equipment, details of sustainable drainage or other water features and details of the treatment of any edges/boundaries or other means of enclosure.

The landscaping shall not be carried out otherwise than in accordance with any such approval given and shall be retained and maintained for the duration of the use.

The planting, seeding and/or turfing shall be carried out in the first planting season following completion of building works and any trees or shrubs that is found to be dead, dying, severely damaged or diseased within five years of the completion of the building works OR five years of the carrying out of the landscaping scheme (whichever is later), shall be replaced in the next planting season by specimens of the same size and species in the first suitable planting season. Planting shall comply to BS: 4428 Code of practice for general landscaping operations, BS: 5837 (2012) Trees in relation to demolition, design and construction and BS 7370-4:1993 Grounds maintenance Recommendations for maintenance of soft landscape (other than amenity turf).

Reason

So that the Council may be satisfied with the details of the landscaping scheme in accordance with The National Planning Policy Framework 2018 Chapters 8, 12, 15 & 16 and policies of The Core Strategy 2011: SP11 Open spaces and wildlife; SP12 Design and conservation; SP13 High environmental standards, and Saved Policies of The Southwark Plan 2007: Policy 3.2 Protection of amenity; Policy 3.12 Quality in Design; Policy 3.13 Urban Design and Policy 3.28 Biodiversity

80. Green roofs and walls

Before any works above grade, detailed specifications for any green/brown/biodiverse roofs and/or walls shall be submitted to the local planning authority for approval in writing. Details shall demonstrate:

- The depth of substrate (to be between 100 and 200mm for biodiverse roofs)
- An appropriate planting mix that prioritises native species;
- No more than 25% sedum coverage for any green roof;
- An appropriate irrigation system for any green walls;
- That an appropriate management and maintenance regime is in place

Green roofs shall be planted in the first planting season following practical completion of building works. Green roofs will not be used as recreational spaces and access will be limited to essential maintenance or escape in the case of emergency.

Reason:

To ensure the development provides the maximum possible provision towards creation of habitats and valuable areas for biodiversity in accordance with Saved Policy 3.28 of the

Southwark Plan (2007), Strategic Policy 11 'Open Space and Nature Conservation' of the Core strategy (2011) and Policies 5.10 'Urban Greening' and 5.11 'Green roofs and development site environs' of the London Plan 2016 and the National Planning Policy Framework (2019).

81. Biodiversity, habitat and ecology

Prior to the commencement of works above grade (excluding cores) for any Development Phase, an environmental action plan shall be submitted to the local planning authority for approval in writing, setting out the measures that will be implemented/integrated within the relevant Development Zone or Plot to maximise its habitat value. Details shall include, but not be limited to:

- Provision of bat bricks/boxes;
- Provision of bird boxes;
- Provision of bespoke insect habitat;
- Appropriate native planting;
- Rain gardens and/or other sustainable drainage features offering biodiversity value;
- Zone/Plot specific responses that relate to the submitted PERA and/or other Ecological findings set out in the relevant chapter of the ES;
- Establishing appropriate links to or otherwise enhancing valuable habitats in the vicinity of the Zone and/or Plot, particularly within any designated Sites of Importance for Nature Conservation (SINC)

These measures shall seek to maximise the biodiversity of the development, having regard to the Urban Greening Factor described in the London Plan. Any such measures shall be installed/implemented, retained and maintained thereafter.

Reason:

To ensure the development provides the maximum possible provision towards creation of habitats and valuable areas for biodiversity in accordance with Saved Policy 3.28 of the Southwark Plan (2007), Strategic Policy 11 'Open Space and Nature Conservation' of the Core strategy (2011) and Policies 5.10 'Urban Greening' and 5.11 'Green roofs and development site environs' of the London Plan 2016 and the National Planning Policy Framework (2019)

82. Wind mitigation measures

Prior to the commencement of above ground works (excluding cores), full details of wind mitigation measures designed to ensure a comfortable environment for standing at building entrances, street level, in the new ground level public realm and for a combination of standing and sitting in the roof gardens shall be submitted to the local planning authority for approval in writing. Individual mitigation measures shall be implemented at the earliest opportunity in the construction programme depending on whether they are delivered in Phase 1 or Phase 2 with all measures being in place prior to first occupation of Phase 2.

Reason

To ensure that the development does not lead to adverse wind and microclimate impacts that would detract from the quality of the development or the amenity of the local area in accordance with Part 12 of the National Planning Policy Framework 2018, Strategic Policies 12 'Design and conservation' and 13 'High environmental standards' of the Core Strategy (2011) and saved policies 3.2 'Protection of amenity' and 3.12 'Quality in design' of the Southwark Plan (2007).

83. BREEAM

- a) Prior to commencement of fit out works of any building with a non-residential element in excess of 500sqm, an independently verified BREEAM report (detailing performance in each category, overall score, BREEAM rating and a BREEAM certificate of building performance) demonstrating that all reasonable steps have been undertaken to achieve a minimum accreditation of BREEAM 'Excellent' rating for any workspace (use class B1) or retail (use classes A1-A5) elements of the buildings or BREEAM "Very Good" for any buildings in community use (use class D1) shall be submitted to the Local Planning Authority for approval in writing and the development shall not be carried out otherwise than in accordance with any such approval given;
- b) Before the first occupation of these Plots, a certified Post Construction Review (or other

verification process agreed with the local planning authority) shall be submitted to and approved in writing by the Local Planning Authority, confirming that the agreed standards at (a) have been met.

Reason:

To ensure the proposal is completed to the highest possible standards of environmental sustainability in accordance Section 14 of The National Planning Policy Framework 2018, Policy 5.3 'Sustainable design and construction' of the London Plan 2016, Strategic Policy 13 'High Environmental Standards' of The Core Strategy 2011 and Saved Policies 3.3 'Sustainability' and 3.4 'Energy Efficiency' of the Southwark Plan 2007.

84. No cranes

No cranes or scaffolding shall be erected for each phase unless and until construction methodology and diagrams clearly presenting the location, maximum operating height, radius and start/finish dates for the use of cranes during the Development has been submitted to and approved by the Local Planning Authority, the Local Planning Authority having consulted London City Airport.

Reason:

In the interests of aircraft safety

85. Radar Mitigation Strategy

No works above grade shall be undertaken until a Radar Mitigation Scheme (RMS) has been approved in writing with the Local Planning Authority (in consultation with NATS). The approved RMS shall be implemented in full and no later than the construction progressing above 80m AOD.

Reason:

In the interests of aircraft safety and the operations of NATS En-route PLC.

86. Tower obstruction lighting scheme

Prior to commencement of works above grade for any Zone or Plot containing tall buildings, a scheme of obstruction lighting shall be submitted to the Local Planning Authority (in consultation with London City Airport) . The development shall proceed in accordance with any approval given and the lighting retained and maintained in perpetuity unless otherwise agreed in writing by the Local Planning Authority.

Reason:

To ensure that tall building are appropriately illuminated to aid visibility for aircraft without contributing to glare in accordance with guidance issued by the Civil Aviation Authority, London Plan Policy 7.7 and the National Planning Policy Framework 2019.

87. Mechanical ventilation for residential development in Zones C, E and G

Prior to the commencement of works above grade for any Building containing residential dwellings in Development Zones C, E and/or G, details of a scheme of mechanical ventilation for the residential units, including plant inlets, filters and outlets shall be submitted to the Local Planning Authority for approval in writing. The scheme of ventilation shall be installed prior to the first occupation of any Building within the above Development Zones and retained and maintained for the duration of the residential use.

Reason:

To ensure future residential occupiers of these plots do not suffer adverse impacts on a reasonable standard of residential amenity due to the prevailing noise and/or air quality environment in accordance with Saved Policies 3.2 'Protection of amenity' and 4.2 'Quality of accommodation'.

88. Protection of Zone B from Vibration and Re-radiated Noise

Following piling but prior to commencement of above-ground construction on any building containing residential dwellings in Development Zone B, further assessment of vibration and re-radiated noise shall be conducted which shall include measurement of vibration on in-situ piles.

A report shall be submitted to the Local Planning Authority alongside a scheme of mitigation as necessary to ensure that residential occupants shall not be exposed to vibration in excess of 0.13 m/s VDV during the night-time period of 23.00 – 07.00hrs or re-radiated noise in excess of 35dB LASmax.

Reason:

To ensure that the occupiers and users of the development do not suffer a loss of amenity by reason of excess noise in accordance with Saved policies 3.2 'Protection of amenity' and 4.2 'Quality of residential accommodation' of the Soutwark Plan (2007), Strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

Pre-Occupation conditions - the details required to be submitted for approval by the condition(s) listed below must be submitted to and approved by the council before the building(s) hereby permitted are occupied or the use hereby permitted is commenced.

89. Noise from Plant

The Rated sound level from any plant, together with any associated ducting shall not exceed the Background sound level (LA90 15min) at the nearest noise sensitive premises. Furthermore, the Specific plant sound level shall be 10dB(A) or more below the background sound level in this location.

For the purposes of this condition the Background, Rating and Specific Sound levels shall be calculated fully in accordance with the methodology of BS4142:2014. In areas of low existing background sound levels variations to this standard may be agreed in writing. Following completion of the development but prior to the plant being commissioned, a validation test shall be carried out. The results shall be submitted to the LPA for approval in writing. The plant and equipment shall be installed and constructed in accordance with the approval given and shall be permanently maintained thereafter.

Reason

To ensure that occupiers of neighbouring premises do not suffer a loss of amenity by reason of noise nuisance or the local environment from noise creep due to plant and machinery in accordance with the National Planning Policy Framework 2012, Strategic Policy 13 High Environmental Standards of the Core Strategy 2011 and Saved Policy 3.2 Protection of Amenity of the Soutwark Plan (2007).

90. Cycle parking – long stay and short stay

Prior to first occupation of any building in a Development Plot or Zone, detailed 1:50 drawings of the secure, convenient and weatherproof long and short stay cycle parking shall be submitted to and approved in writing by the Local Planning Authority.

Details shall demonstrate that the opportunity to maximise the provision of accessible stands, such as Sheffield stands, has been pursued and that other storage systems have been selected having considered their ease of use for users of varying abilities. All cycle storage areas shall make provision for areas that allow for the convenient maintenance of cycles and all long-stay cycle storage servicing workspace shall include provision for changing facilities and showers.

For the avoidance of doubt, all staircases serving basement cycle stores will be sized and configured to facilitate the convenient manoeuvring of cycles, including gullies being fitted in all cases.

Thereafter the cycle parking facilities provided shall be retained and the space used for no other purpose and the development shall not be carried out otherwise in accordance with any such approval given.

Reason

In order to ensure that satisfactory safe and secure cycle parking and changing facilities are provided and can be easily accessed by users in order to encourage the use of cycling as an alternative means of transport to the development and to reduce reliance on the use of the private car in accordance with Part 9 of the National Planning Policy Framework 2019, Strategic Policy 2 'Sustainable Transport' of The Core Strategy 2011 and Saved Policy 5.3 'Walking and Cycling' of the Southwark Plan 2007.

91. Waste management

Before the first occupation of each of the buildings hereby permitted details of the arrangements for the storage, compaction and collection of refuse and recycling shall be submitted to the Local Planning Authority for approval in writing and the facilities approved shall be provided and made available for use by the occupiers of the commercial premises and the facilities shall thereafter be retained and shall not be used or the space used for any other purpose.

Reason

To ensure that the refuse will be appropriately stored within the site and located to facilitate convenient collection thereby protecting the amenity of the site and the area in general from litter, odour and potential vermin/pest nuisance in accordance with The National Planning Policy Framework 2019, Strategic Policy 13 'High Environmental Standards' of the Core Strategy 2011 and Saved Policies 3.2 'Protection of Amenity' and 3.7 'Waste Reduction' of The Southwark Plan 2007

92. Kitchen extract

Prior to the commencement of any Class A3 ('restaurants and cafes') or Class A5 ("Hot food takeaways"), details of kitchen extract systems including the routing of any ducting shall be provided and shall demonstrate that high level discharge is achieved and away from any intake locations. Details of odour & grease filtration systems required to supplement high level discharges shall be provided to reduce odour to acceptable levels.

Reason

In order to ensure that that the ventilation ducting and ancillary equipment will not result in an odour, fume or noise nuisance to nearby sensitive receptors or at street level and will not detract from the appearance of the building in the interests of amenity in accordance with The National Planning Policy Framework 2018, Strategic Policy 13 High Environmental Standards of the Core Strategy 2011 and Saved Policy 3.2 Protection of Amenity of The Southwark Plan 2007.

Other condition(s) - the following condition(s) are to be complied with and discharged in accordance with the individual requirements specified in the condition(s).

93. Contamination – Unexpected Contaminants

In the event that contamination is found at any time when carrying out the approved development that was not previously identified, it shall be reported in writing immediately to the Local Planning Authority, and a scheme of investigation and risk assessment, a remediation strategy and verification report (if required) shall be submitted to the Local Planning Authority for approval in writing.

Reason:

To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors in accordance with saved policy 3.2 'Protection of amenity' of the Southwark Plan (2007), strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

94. Archaeological reporting

Within six months of the completion of archaeological site works, an assessment report detailing the proposals for post-excavation works, publication of the site and preparation of the archive shall be submitted to and approved in writing by the Local Planning Authority and that

the works detailed in this assessment report shall not be carried out otherwise than in accordance with any such approval given.

Reason:

In order that the archaeological interests of the site are secured with regard to the details of the post-excavation works, publication and archiving to ensure the preservation of archaeological remains by record in accordance with Strategic Policy 12 - Design and Conservation of The Core Strategy 2011, Saved Policy 3.19 Archaeology of the Southwark Plan 2007 and the National Planning Policy Framework 2019.

Compliance condition(s) - the following condition(s) impose restrictions and/or other requirements that must be complied with at all times once the permission has been implemented.

95. Accessible housing

A minimum of 10% of the dwellings hereby consented shall be delivered as M4(3) 'wheelchair user dwellings' as defined in Approved Document M of the Building Regulations and the remaining units shall all be designed to achieve the M4(2) 'accessible and adaptable' accessibility standard

Reason:

In order to ensure that new housing can be easily adapted to meet the changing needs of occupiers and that a suitable proportion of units conform to the specific needs of wheelchair users in accordance with Strategic Policy SP5 'Providing New Homes' of the Core Strategy (2011) and Policy 3.8 'Housing Choice' of the London Plan 2016

96. Vibration

All Buildings must be designed to ensure that habitable rooms in the residential element of the development are not exposed to vibration dose values in excess of 0.13 m/s during the night-time period of 23.00 – 07.00hrs or re-radiated noise in excess of 35dB LASmax.

Reason

To ensure that the occupiers and users of the proposed development do not suffer a loss of amenity by reason of excess vibration from transportation sources in accordance with strategic policy 13 'High environmental standards' of the Core Strategy (2011), saved Policy 3.2 Protection of Amenity of the Southwark Plan (2007) and the National Planning Policy Framework 2019.

97. Emergency Plant Noise Test Limits

Routine testing of emergency plant shall only take place during the hours of 09.00 to 17.00 Monday to Friday and not on any public holiday. The combined noise level from emergency plant shall not exceed 60dB(A) at any sensitive façade.

Reason:

To ensure that the occupiers and users of the development do not suffer a loss of amenity by reason of excess noise in accordance with Saved policies 3.2 'Protection of amenity' and 4.2 'Quality of residential accommodation' of the Southwark Plan (2007), Strategic policy 13 'High environmental standards' of the Core Strategy (2011) and the National Planning Policy Framework 2019.

98. Precautionary Bat Survey

If more than 12 months pass between the most recent bat survey for the site and the commencement of demolition, an updated bat survey must be undertaken immediately prior to demolition by a licensed bat worker. Evidence that the survey has been undertaken shall be submitted to the Local Planning Authority for approval in writing prior to the commencement of demolition.

Reason:

In order to ensure that protected bat habitats are not subject to unnecessary harm as a result of the proposed development in accordance with Saved Policy 3.28 of the Southwark Plan (2007).
