Dear Jon

## **Elephant & Castle ticket hall enhancements to support the Bakerloo line extension**

I am writing to confirm TfL's decision to commit match funding of up to £7.5m to support the delivery of an integrated station box at Elephant & Castle as part of the planned new Northern line ticket-hall. This is contingent upon the agreement of the London Borough of Southwark to provide 50% funding for the additional infrastructure

This additional infrastructure would enable a single integrated Northern and Bakerloo line station entrance and ticket hall to be delivered. This decision authorises TfL to continue to develop plans for an integrated ticket hall to support the Bakerloo line extension at an additional cost of up to £15m, which is expected to be required in FY 2023/24.

As you are aware, the Bakerloo line extension is a key Mayoral priority. The provision of a combined station will further enhance the case for the scheme by delivering a better station for passengers and the local area. In particular, it will provide single focal point for accessing the Underground that fits with the existing and planned changes to the wider town centre and also enables the opportunity for a fully accessible station, including interchange between the Bakerloo and Northern lines.

Crucially, this represents a unique opportunity to safeguard the future delivery of the Bakerloo line extension and provide the first piece of infrastructure for the extension. This decision by TfL and Southwark Council to jointly support this initiative is an important demonstration of the ongoing commitment by both

parties to the redevelopment of Elephant & Castle as well as to the Bakerloo line extension more widely. We look forward to continuing to work closely with you.

Yours sincerely
