

Improving Inpatient Mental Health Services for Lambeth

Joint HOSC Meeting Briefing Pack

An architectural rendering of a modern building with a courtyard. The building is a multi-story structure with a light-colored, textured facade and numerous windows. The courtyard in the foreground features a paved walkway, several trees, and a few people walking. The scene is overlaid with a semi-transparent dark grey filter.

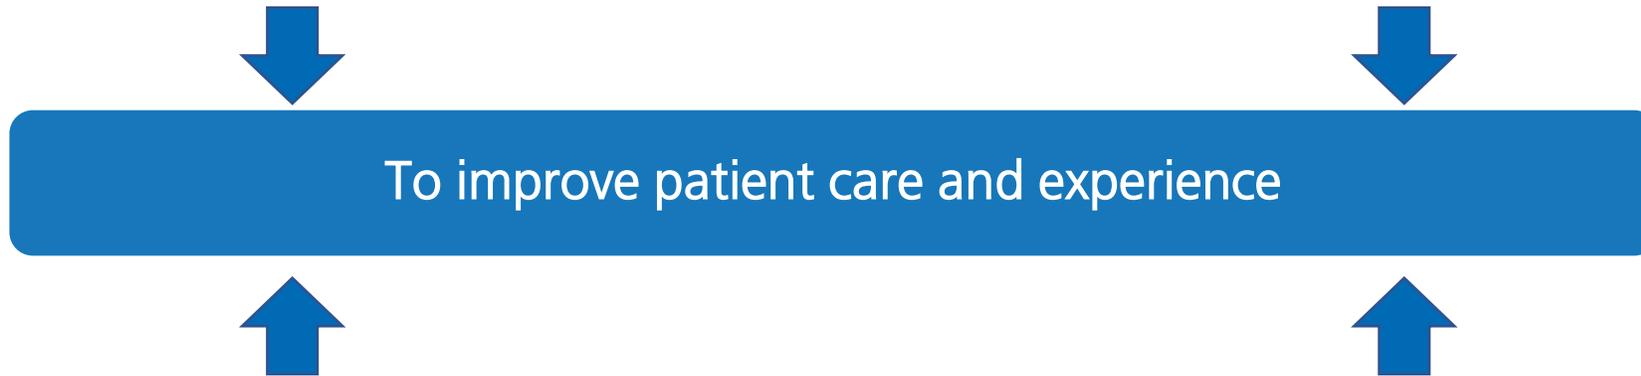

Section 1

Recap of the previous JHOSC session on 27th
March 2020

What we want to achieve

1. We must improve the quality and safety of our inpatient wards to meet the most basic needs of our patients

2. We are committed to supporting people in Lambeth who are experiencing mental illness or distress

3. There is an opportunity to build a new purpose built mental health unit

4. Together with our partners, as a health economy, we are planning for the future and recognise the need to consider all patients, across all our boroughs

The current vs proposed ward

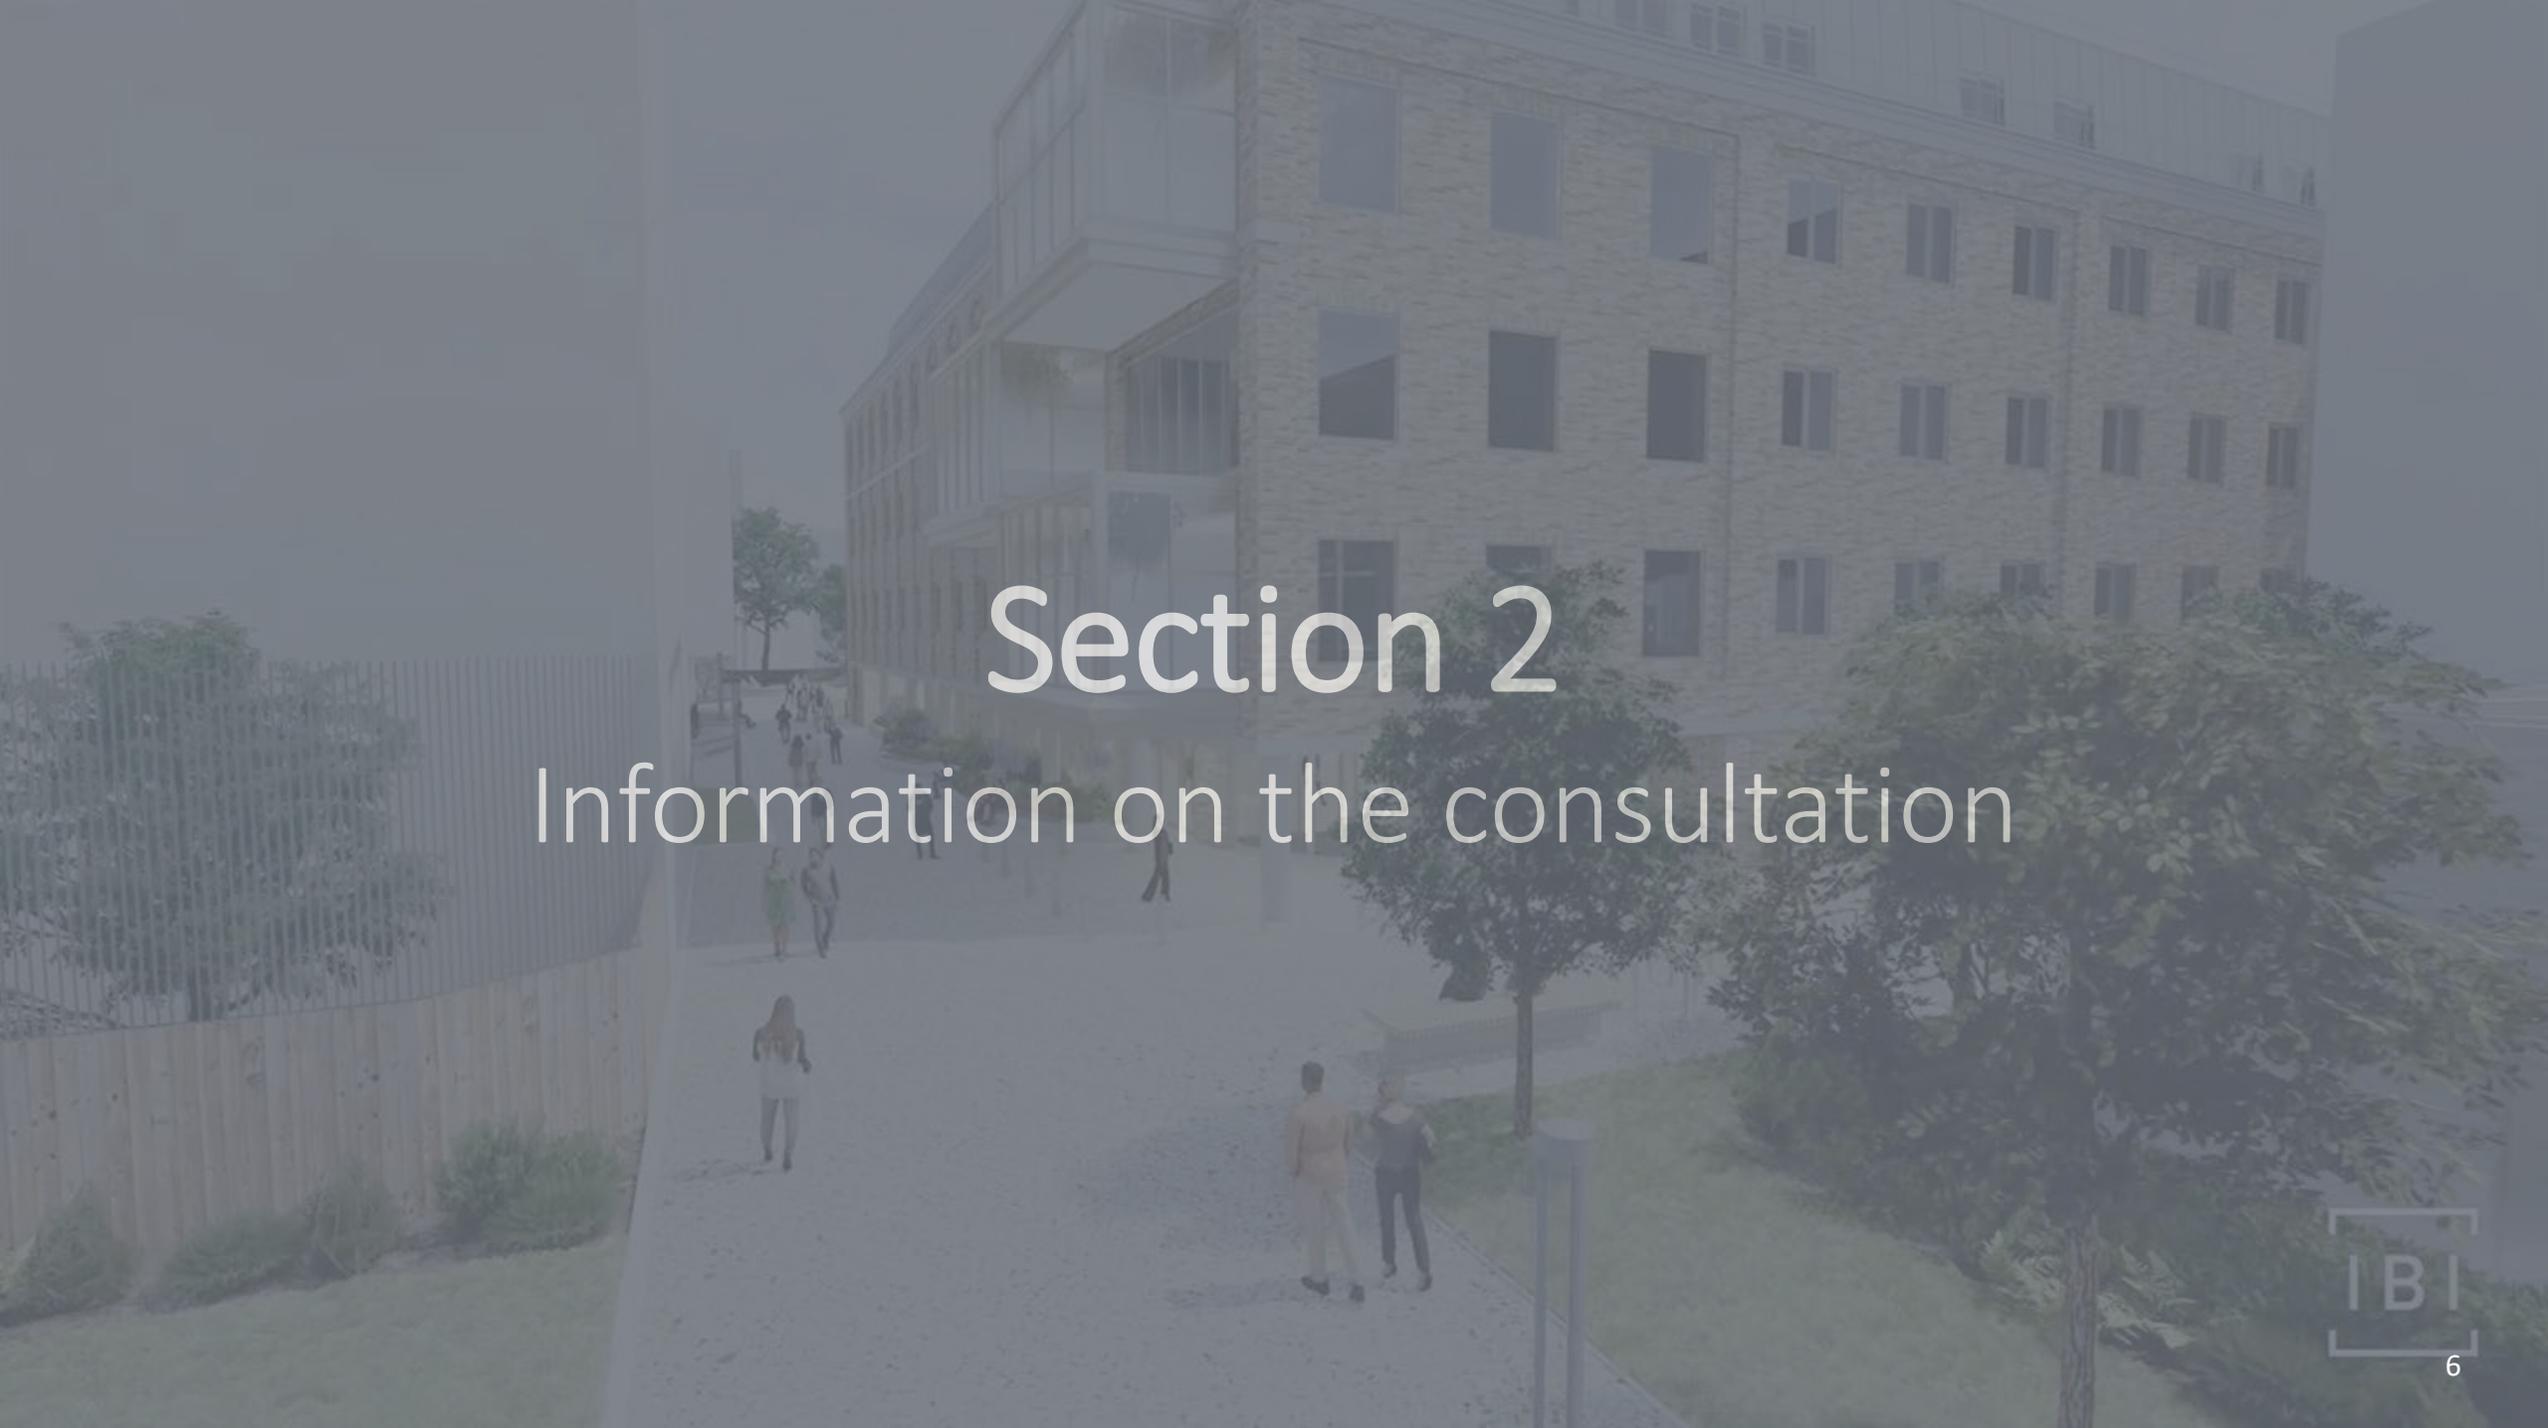

The preferred option

The public consultation will specifically seek views on options for the Lambeth Hospital site wards with other services being managed through concurrent separate engagement processes. The options are:

- **Option 1:** Remain as we are (do nothing)
- **Option 2:** [Preferred] Relocate four acute wards and the Psychiatric Intensive Care Unit (PICU) to the Maudsley site
 - Rosa Parkes (acute admission ward)
 - Nelson (acute admission ward)
 - Luther King (acute admission ward)
 - Leo (early intervention inpatient ward)
 - Eden (PICU) – into new DBH

An option to develop a new high-quality facility on the Lambeth Hospital site was also looked at. However, this failed to meet for two key tests:

- Was the option realistic? This option requires additional capital of between £30m and £35m due to additional infrastructure and loss of capital receipts which is coupled with a need to decant at least one ward to Bethlem and another to Maudsley causing significant disruption making the option unrealistic.
- Was the option sustainable? A greater level of efficiency savings would be required to service the additional capital charges. The additional efficiency savings, along with the base case efficiency savings, makes the requirement too great and thus unsustainable

An architectural rendering of a modern building complex. The main building is a multi-story structure with a light-colored, textured facade and a grid of windows. In the foreground, there is a paved courtyard area with several people walking. To the left, there is a wooden fence and some greenery. To the right, there are trees and a grassy area. The overall scene is presented in a muted, semi-transparent style.

Section 2

Information on the consultation

Background and history to the consultation

- The consultation launched on the 4th March and will run through to the 31st May; this was 7 days before the WHO declared COVID-19 outbreak a pandemic
- A full consultation programme had been created using the usual channels and public set piece meetings common across consultations
- Following the Lockdown and the need for social distancing, the engagement programme was converted to a 'virtual' one with the view of creating the opportunities for people to engage but without face to face mechanisms
- This was tested widely with the CCG, Lambeth and Southwark Joint HOSC, NHS England (London), the Provider Trust and key stakeholders including the Living Well Network Alliance, Black Thrive and HealthWatch
- The consultation continued, as it was already live and good levels of feedback were already being received, with a clear focus on monitoring the ongoing levels of engagement that were being seen.
- Feedback has been very positive from the public and service users to the service change itself and the continuation of the consultation with many people getting involved and giving feedback and as such the consultation has continued.

Engagement before the consultation went live

In order to ensure that we understood the thoughts and views of key groups before launching the consultation a great deal of pre-consultation engagement was undertaken starting in May 2019 and going through to the launch in March 2020.

May 2019

- Staff engagement about proposals before Public Board meeting
- Letters issued to key stakeholders ahead of Public Board meeting

July 2019

- Staff pre-consultation engagement

September 2019

- Meeting with Cllr Jim Dickson and Cllr Ed Davie (Lambeth Council) about proposal (Cllr Dyer unable to attend – separately briefed by Neil Robertson)
- Meeting with Lambeth Council comms team
- Presentation at Lambeth Living Well Collaborative
- Meeting with Keep our NHS Public

October 2019

- Presentation at Lambeth Living Well Collaborative Breakfast

November 2019

- London Clinical Senate
- Meeting with Southwark Council and Southwark CCG
- Lambeth Carers' Hub

January 2020

- Lambeth Medical Advisory Committee
- Lambeth Healthwatch engagement with service users, carers/families and staff - 33 existing patients (19 individually and 14 in meetings on the wards.)

February 2020

- Meeting with Keep Our NHS Public
- Presentation at Lambeth Living Well Collaborative Breakfast
- Lambeth and Southwark JHOSC
- NHS Regional Review Panel
- Lambeth Carers' Hub

March 2020 - Governing Body – including public session beforehand

The consultation documents

- Consultation documents produced, including full consultation doc, summary doc, flyer, easy read version and translated versions, poster and print survey
- Freephone, freepost and email address created to collate all feedback

A table comparing the two options

Benefit	OPTION 1 Don't move	OPTION 2 Move to Maudsley
The wards The wards are purpose-built, with a modern, safe and therapeutic environment for service users. The wards are fit for purpose and meet the requirements of our regulator, the Care Quality Commission (CQC), which monitors the quality of our services. Wards are light, bright and are safer, with good lines of sight for staff. All bedrooms have their own ensuite bathrooms giving service users more dignity. All wards have direct, unsupervised access to large outdoor balconies and fresh air. All wards have access to supervised outdoor garden space. Wards are adaptable to provide single sex accommodation. Private areas are available for staff. No disruption for services users and staff as a result of moving the wards.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Staff Staff morale, recruitment and retention is improved by working in a modern, safe and therapeutic environment. Access on one site to a larger pool of staff reducing the use of bank and agency staff.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Journeys Journeys to and from the inpatient wards remain familiar for service users, families, carers and staff as there is no change in the location of the wards. Journey times and access via public transport to and from the inpatient wards is better for the majority of service users, families, carers and staff.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
The buildings Buildings are more energy efficient and need less maintenance. Value can be released from the Lambeth Hospital site, providing funds to modernise other wards and clinical environments for service users in Croydon, Lewisham, Lambeth and Southwark.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

The consultation adverts

- Hard copy of flyer distributed to residents and businesses located around Lambeth Hospital (4,342 addresses) and Maudsley Hospital (1,530 addresses)
- Delivered hard copies of posters and summary documents to the 66 pharmacies within Lambeth to help promote consultation
- Delivered hard copies of all consultation materials to Lambeth Hospital and Maudsley Hospital

Improving Inpatient Mental Health Services for Lambeth

Public consultation on proposals to improve inpatient (hospital) mental health services for adults in Lambeth

Consultation runs from 4 March 2020 until 31 May 2020

Indicative images showing what the new wards in Douglas Bennett House, on the Maudsley Hospital site, would look like.

A public consultation is taking place on proposals to improve adult inpatient mental health services in Lambeth.

The 12-week consultation began on 4 March 2020 and is being led by NHS Lambeth Clinical Commissioning Group and supported by South London and Maudsley NHS Foundation Trust. We are seeking views on a proposal to move the adult inpatient mental health services at Lambeth Hospital, in Landor Road, to a new, purpose-built building on the Maudsley Hospital site, in Denmark Hill, to improve patient care, dignity and safety. The wards at Lambeth Hospital no longer meet modern standards and are not fit for purpose. This impacts on people's recovery, the experience of the care they receive and on staff recruitment and retention. Our preferred option is to move the services into a new building on the Maudsley Hospital site (Douglas Bennett House), which would provide a modern, safe and therapeutic environment for our patients. We want to hear your views. Please complete our online survey.

If you have any questions please contact us.

We were planning to have public events in Lambeth and Southwark as part of our consultation. However as a result of the coronavirus (COVID-19) outbreak, face-to-face engagement is currently not possible. This is following Government advice and to protect the health and wellbeing of the local community and our teams. During this period please get in touch using the contact details provided. If you or someone you know would welcome a consultation or more information about these proposals.

Improving Inpatient Mental Health Services for Lambeth

Public consultation on proposals to improve inpatient (hospital) mental health services for adults in Lambeth

Consultation runs from 4 March 2020 until 31 May 2020

Lambeth Hospital, in Landor Road.

What would happen to the Lambeth Hospital site?

The Trust's clinical and estate strategies have shown that only by releasing the value from some of its land can it start the process of modernising and improving the inpatient facilities for patients across its borough in south London.

The Trust is working closely with Lambeth Council to explore what could be delivered on the Lambeth Hospital site. We understand that the site could accommodate approximately 500 homes, targeting 30% affordable homes, with private gardens and public open and play spaces and other amenities for the local community.

A separate planning consultation about the future of the site will take place later this year where more detail will be shared to hear people's views.

A final plan for the site will only be progressed if the proposed move of inpatient beds from Lambeth Hospital is agreed following the public consultation.

For more information about the proposed move of inpatient wards from Lambeth Hospital and to complete our survey please:

ACCESS FREE PARENTING SUPPORT

Lambeth Offers help for parents

As the current lockdown causes significant additional stress within family homes, Lambeth's Parenting Team want to ensure that parents are equipped with the necessary tools and techniques to manage behaviour, reduce their stress levels and provide the emotional support children and young people need during this crisis. The service has suspended face to face courses, but they have made these courses available online as well as one to one virtual support around co-parenting relationships. If you would like some support to help you manage the impact of the lockdown on your family

-  **Visit:** lambethtogether.net/lambethhospital
-  **Call:** 0800 307 7650
-  **Email:** lamccg.hospitalconsultation@nhs.net

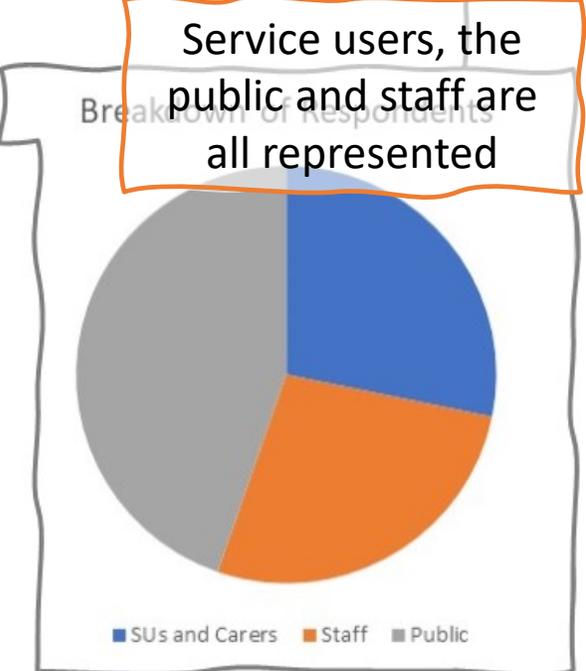

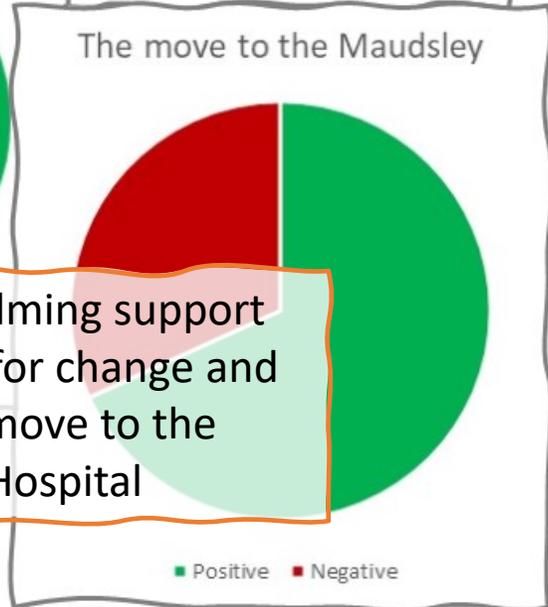

The consultation runs until 31 May 2020.

Feedback analysis (01/05)

There is overwhelming support both for the case for change and the proposed move to the Maudsley Hospital

Feedback on the need for change

The majority of respondents are supportive of the need to change, feeling that:

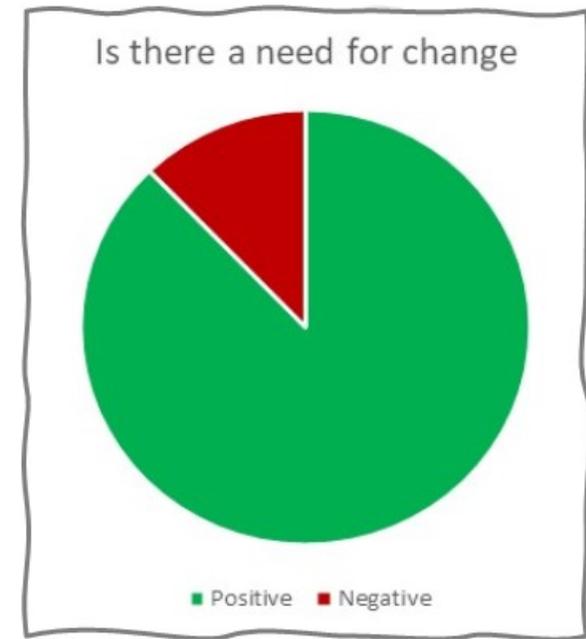

- The environment will be more fit for purpose – including consideration of green space and having space for visitors away from patients
- It will improve, streamline and standardise services that are delivered
- There are benefits in being located so close to the Denmark Hill site
- Would lead to accessing better facilities that would be more conducive to recovery
- Better use could be made of the Lambeth Hospital site, including providing housing, new shops, cafes and centres for the community

In relation to the current site, a small number of comments have been received saying:

- Were keen to improve the existing facilities and keep services within the borough
- Disagreed with the assessment that the current site is not fit for purpose – there was a perception that the facilities at the current Lambeth Hospital site are in better condition than spaces on the Maudsley site

General / individual comments included:

- One respondent commented “it is really obvious which way you want people to vote” and suggested information was biased
- Ensuring continued investment in mental health services and being able to recruit and retain high quality staff, which were felt to be important alongside improvements to the environment
- A suggestion that the CGI images were misleading
- Mixed views about the current ward layouts within Lambeth Hospital and whether these should be replicated or discontinued going forward
- Wondering how the new building/ facilities at the Maudsley will be funded

Feedback on the move to the Maudsley

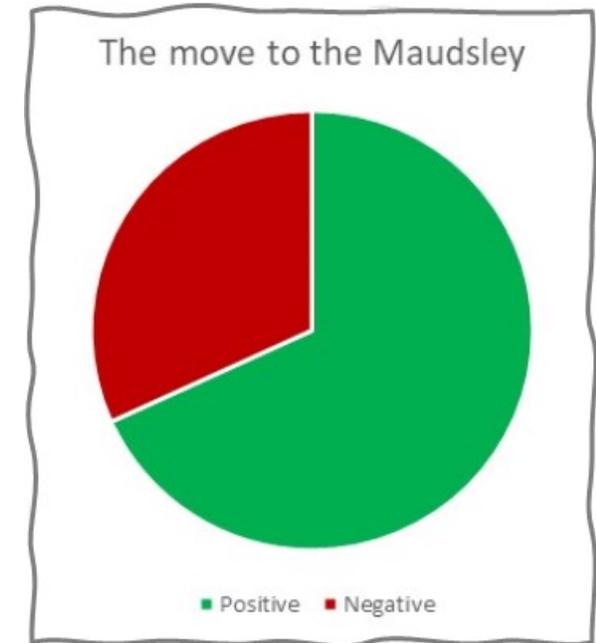

The majority of respondents are supportive of the need to move to the Maudsley

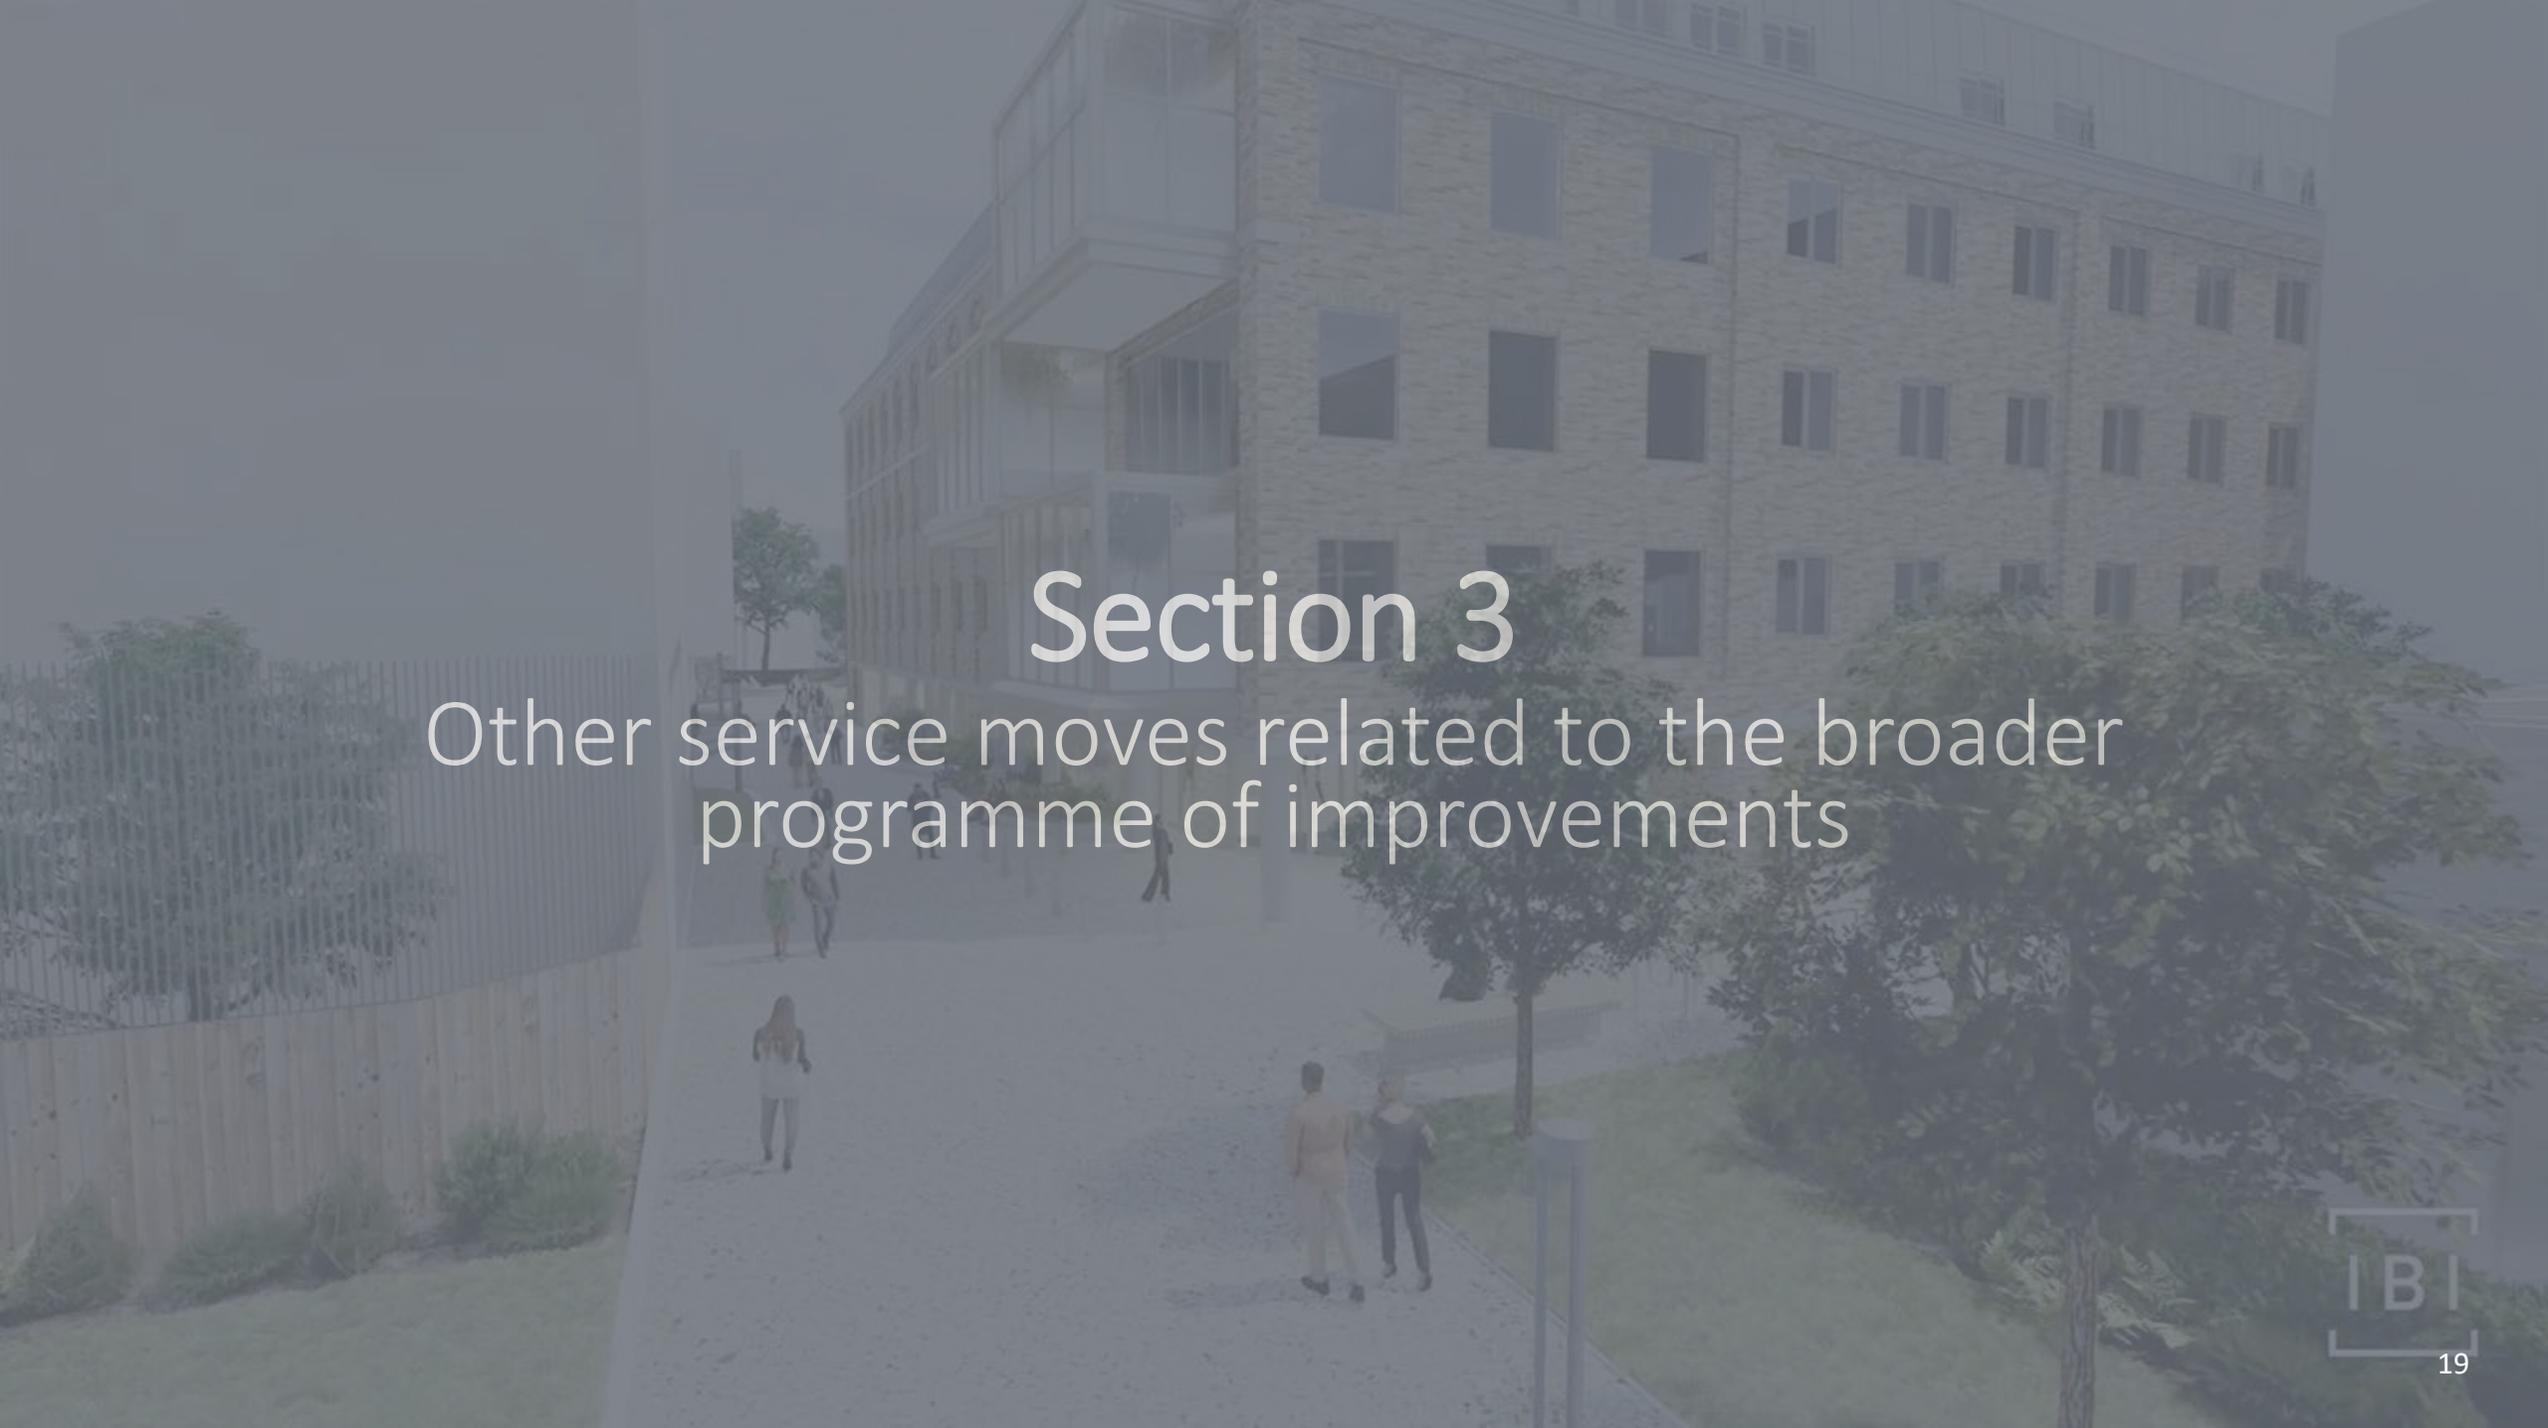

Hospital site, feeling that:

- Perceived that there will be access to a broader range of specialists and more outdoor space at the Maudsley site.
- Assume an improvement to service user experience of inpatient care which would lead to decreased violence and aggression as well as reducing the length of stay by promoting recovery
- Feel the environment will be improved with the design of bespoke wards and rooms
- Feel the quality of care will be improved
- Feel the Maudsley site has a good reputation

In relation to the current site, a small number of comments have been received saying:

- Lambeth patients should be able to access services in Lambeth where they recognise their surroundings
- Many patients collect medication from Lambeth Hospital and this could have a negative impact on their routine
- The move will not significantly increase the number of beds available in Lambeth and the perception is that Lambeth has a significant need for additional mental health services
- There has not been enough consideration of the impact of the move on other services at the Maudsley

An architectural rendering of a modern building with a courtyard. The building is multi-storied with a light-colored, textured facade and numerous windows. The courtyard in the foreground features a paved walkway, several trees, and a few people walking. The entire scene is overlaid with a semi-transparent dark grey filter.

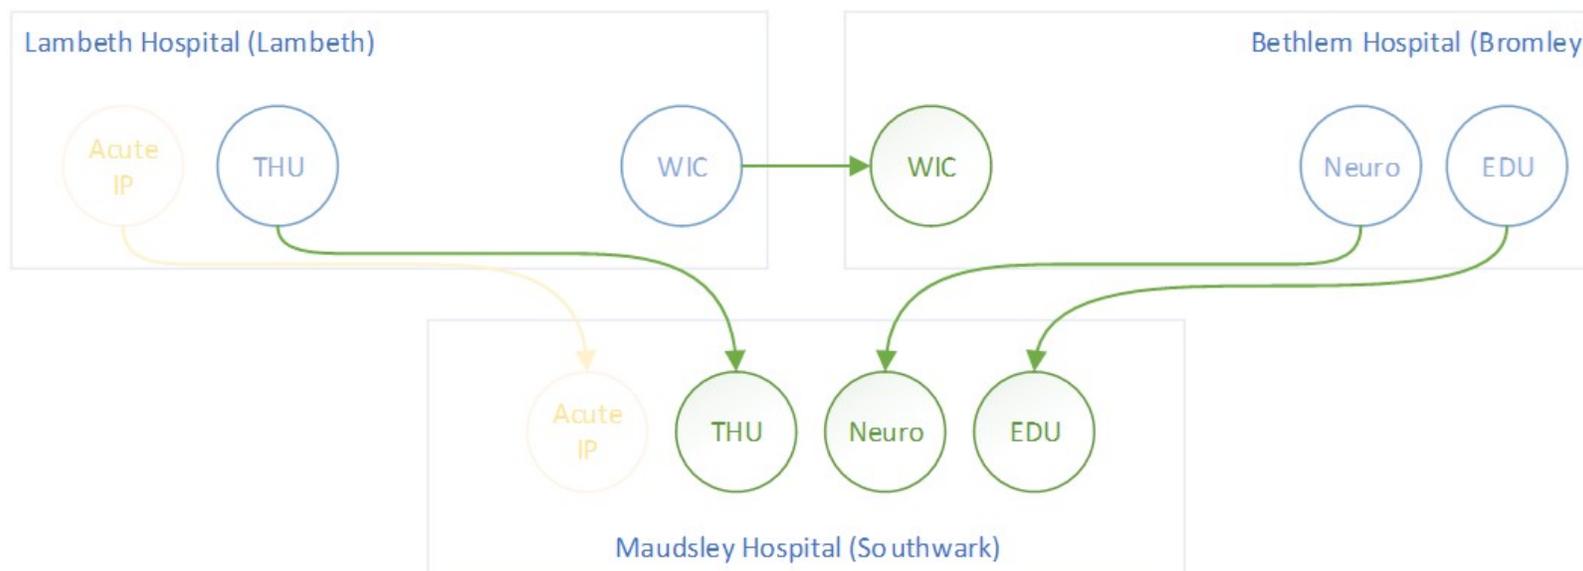

Section 3

Other service moves related to the broader programme of improvements

The broader programme of service improvement

- Should the service change proposal in the public consultation be adopted then there are a number of accessory service changes that also would be taken forward
- We are engaging with the relevant stakeholders to ensure a broad range of views are included in their development.
- These services include:

Service Name	Commissioner	Current Location	Future Location
National Neuropsychiatry Service	NHS England Specialist Commissioning	Bethlem Royal Hospital, Bromley	Maudsley Hospital, Southwark
National Eating Disorders Unit	NHS England Specialist Commissioning	Bethlem Royal Hospital, Bromley	Maudsley Hospital, Southwark
Ward in the Community	Multi-borough service; South East London CCG	Lambeth Hospital	Bethlem Royal Hospital, Bromley
Tony Hillis Rehabilitation Unit	South East London CCG	Lambeth Hospital	Maudsley Hospital, Southwark

The case for change

- In all cases there is no change to the scope or breadth of service specification and there is no reduction in the number of beds provided for service users.
- The drivers are to improve inadequate accommodation which
 - reduces the efficacy of care;
 - does not support a safe environment for service users and staff; and
 - is far behind in terms of offering dignity and respect to the service users.
- Much like the acute wards on the Lambeth Hospital site these wards are also aged and no longer provide the kind of accommodation that is reasonably expected in modern healthcare settings and as such need to be reprovided
- With the opportunity to build a new facility on the Maudsley Hospital site it also creates a possibility to incorporate these additional wards into the new building creating efficient use of the site.
- The Neuropsychiatry unit has been designed to meet their specific needs with tailored spaces such as larger bedrooms to accommodate wheelchair and 'kings fund style' beds, and step free access out into a courtyard space for fresh air
- The Eating Disorders unit has bespoke dining and kitchen spaces for use as part of the therapeutic management plans
- Importantly for these specialist services is the close proximity to the physical health services provided by King's College Hospital across the road on Denmark Hill.
- This creates the opportunity to develop much closer physical and mental health multi-disciplinary team working and allows for swift access to emergency care should a service users physical health deteriorate
